DEEP LEPIDOPTEROLOGICAL EXPLORATION OF MT CAGNO AND
SURROUNDINGS (CENTRAL ITALY), A RESTRICTED MOUNTAIN
MASSIF AND HOTSPOT FOR BUTTERFLY AND MOTH DIVERSITY
(Lepidoptera)

INTRODUCTION

Modern environmental research is more and more focusing on the Lepidoptera as a source of valuable ecological information for a variety of purposes which range from the assessment of habitat quality to studies on global change, planning of land use, environmental management, categorisation of priority areas in conservation and more theoretical studies. Detailed knowledge of the actual faunas as compared to potential ones is however a prerequisite for any work with this group of insects other than useful but speculative model exercises which probably much too often fill modern ecological and biogeographical literature. Accordingly, we deem useful to report here on the Lepidoptera fauna of a fairly restricted mountaineous area in Central Italy which is characterised by relatively weak human impact and was intensely surveyed by the authors. This impact is far not absent but essentially “old-fashioned”, consisting of traditional ways of land management in montane habitats of the Apennines, e.g. regular logging with turnover of 30-40 years, grazing by sheeps and cattle, reafforestation with pine stands, haying, quarrying and captation of water springs for civil uses by local villages. Very moderate agriculture was more developed in the past, with the building of drywalls for cultivation of the white pea (*Lathyrus sativus* L.), but it has substantially expired since the second world war.

The study area consists of the surroundings of Vallemare, a secondary village belonging to the municipality of Borbona (Province of Rieti, Latium, Central Italy) at about 1,000 m of altitude, located to the north of Mt Giano (1,826 m), the main peak of the local range. In the area also a Site of

Community Importance is fully comprised, namely that of “Monte Cagno e Colle Pratoguerra” (SIC IT6020028), which among the other was identified because of the presence of “*Euphydryas aurinia* (Rottemburg, 1775)” (Lepidoptera, Nymphalidae) and *Rosalia alpina* (Linnaeus, 1758) (Coleoptera, Cerambycidae), two species of insects listed in the “Habitat directive”.

Regular studies on the Lepidoptera of the area begun in 1967. At first they were essentially dedicated to the local butterfly fauna (Rhopalocera), but with the time they were extended so as to include the macromoths and, during the last 10 years, also several families of the so-called “micros”. Three generations of lepidopterists represented by the authors succeeded and overlapped for the undertaking of this study.

MATERIALS AND METHODS

The present work consists of a detailed account on all the Lepidoptera species which have been recorded and taxonomically identified from the study area, whereas we prefer to deal in another contribution with several species which have already been collected but have not been satisfactorily identified (approx. 50, mainly of “Microlepidoptera”), although in many cases identification of restricted species groups was achieved.

Fig. 1 – Study area and collecting sites with their altitude: 1) Fonte dei Vitelli, 849 m; 2) Pineta (Pozzo), 900 m; 3) Li Capitoni, 945 m; 4) La Pineta (1st hairpin curve), 950 m; 5) Fonte de lu Cupu, 980 m; 6) Fonte Perara, 983 m; 7) La Pineta, 1000 m; 8) Colle Petruccio, 1000 m; 9) S. Maria del Monte, 1000 m; 10) Cimitero, 1002 m; 11) Pian Mattano (Cava), 1100 m; 12) Migliaru Cerecia, 1170 m; 13) Le Cannaine, 1040 m; 14) Bivio Santa Maria del Monte - Fonte Brignola, 1300 m; 15) Pozzo dei Corvi, 1050 m; 16) Casale Manocchio, 1059 m; 17) Lu Migliaru, 1083 m; 18) Prata di Laculo, 1088 m; 19) Costa della Chiusa, 1093 m; 20) La Palombara, 1094 m; 21) Curva Via della Fonte, 1150 m; 22) Le Pacinette, 1100 m; 23) Colle Marcone, 1121 m; 24) Monte Falascone, 1135 m; 25) Casale Spaccone, 1136 m; 26) Lu Canalone, 1174 m; 27) Fonte Brignola, 1187 m; 28) Via Tratturo Cagno, 1380 m; 29) La Crociata, 1200 m; 30) Fonte Cerecia, 1220 m; 31) Monti Poponi, 1253 m; 32) Tornante Mattano-Malepasso, 1170 m; 33) Valle Orticara, 1300 m; 34) Pian Zeidenti, 1300 m; 35) Costa Rosata, 1317 m; 36) Colle Orticara, 1357 m; 37) Prata di Cagno, 1383 m; 38) Valle del Tratturo, 1394 m; 39) Le Pratelle, 1400 m; 40) Pratoguerra, 1439 m; 41) Colle Lungo, 1450 m; 42) Pozza Retorna, 1450 m; 43) Monte Pizzaro, 1300 m; 44) Curva Orticara Tratturo, 1403 m; 45) Pozza Maiale, 1480 m; 46) Prata Lungo, 1533 m; 47) Li Merchi, 1540 m; 48) La Mozza, 1544 m; 49) Colle Prato, 1463 m; 50) Monte Cerreto, Vena dell’Aquila, 1541 m; 51) Le Quattro Facce, 1600 m; 52) Prati di Monte Giano, 1790 m; 53) Monte Giano, 1820 m; 54) Colle Piano, 1200 m; 55) Valle Entamella, 1218 m.

Study area

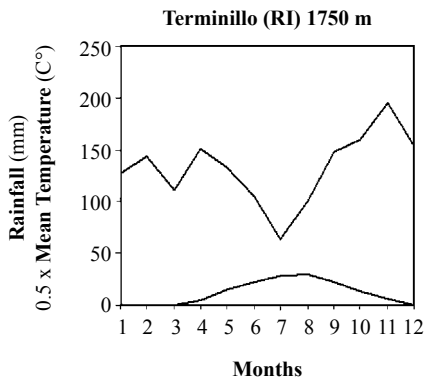

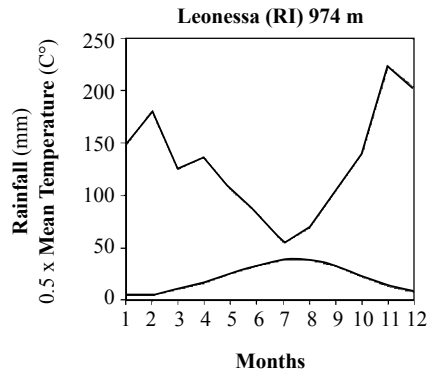

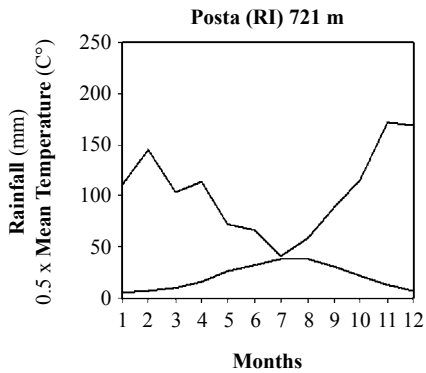

The study area extends over approximately 2,800 hectares (1,800 in projection onto plane) in the Province of Rieti and ranges between the altitudinal limits of 850 m, near the spring “Fonte dei Vitelli”, and 1,826 m above sea level, at the peak of Mt Giano. The land area is shared among four municipalities, namely Posta, with the secondary villages of Villa Camponeschi and Laculo, Borbona, with Vallemare, and not inhabited parts of the municipalities of Micigliano and Antrodoco.

In figure 1 the collecting sites are shown, some being fairly isolated whereas others are very close to each other. The reason of such apparently random distribution is that we aimed at linking any record to the very local micro-environment from which it originated. The sites are as a whole 55 (plus another one limital), a figure which simply reflects our intention to provide a detailed account on the local distribution of the Lepidoptera in the study area, pending on an analysis of the microecological distribution of the species within the area to come. The fact that the more in altitude the less are the sites is due to mounting coverage by beechwood, which maintains fairly homogeneous conditions over broader topographical areas. Official toponyms which are present in the available cartography are often unsuitable to fulfil with the detailed recording scheme that we followed, accordingly, when they are used they almost precisely relate to the actual spot marked in figure 1. We used also local vernacular names, some of which about to disappear from the speech by natives, for a number of punctual localities.

In the study area three main lithological formations are represented, namely (a) marnes and marly limestone, (b) bioclast calcarenites and (c) limestone (each of these types is represented by a different symbol Fig. 1). The first, less resistant to erosion, prevail to the North and Northwest of the area, from low altitude up to nearly 1,200 m a.s.l., calcarenites to the East up to approx. 1,600 m, and limestone to the South up to the highest peak of the area (Mt Giano).

Flatlands are either of alluvial or carsic origin. In the first case they appear as small detrital plains in compluvia linked to faults, in the second they are real dolinas, usually corresponding to clearings inside the beechwoods. These sites, where brown calcareous soils develop, were in the past cultivated with wheat, lentil, maize and potato, but they are currently used at the most as pastures, and occasionally undergo haying.

Climate diagrams drawn after the Bagnouls-Gausson system for the nearby localities of Posta (721 m), Leonessa (974 m) and Mt Terminillo (1,750 m) indicate that in general no summer drought occurs (Fig. 2). From a phytoclimatic standpoint the most of the study area is comprised within the lower montane thermotype, upper humid/lower hyperhumid ombrotype, mesaxeric/axeric region (hypomesaxeric and cold temperate subregion), with just some limital

| Weather station | Mean annual temperature [°C] | Mean annual rainfall [mm] |
|--------------------|------------------------------|---------------------------|
| Posta 721 m | 10.63 | 1,189.31 |
| Leonessa 974 m | 10.22 | 1,577.18 |
| Terminillo 1,750 m | 5.57 | 1,576.54 |

Fig. 2 – Climate diagrams drawn after the Bagnouls-Gaussens system for the localities of Posta (721 m), Leonessa (974 m) and Mt Terminillo (1,750 m) (averages on 21 years, period 1955-1975, from “Annali Idrologici del Ministero dei Lavori Pubblici”).

collecting sites (nos. 1-2, 4, and 7-8 in Fig. 1) in the lower, warmer unit (Blasi, 1994).

As a rule, the most interesting sites for Lepidoptera correspond to montane grassland habitats and slopes, particularly if steep and rocky, all areas which were deeply exploited in the past for grazing but nowadays suffer from a much weaker pressure by cattle and sheeps (Figs 3-10).

List of the collecting sites with main reference altitudes thereto (Fig. 1):

Municipality of Posta

Surroundings of Laculo (secondary village of Posta)

1) Fonte dei Vitelli, 849 m;

Surroundings of Villa Camponeschi (secondary village of Posta)

8) Colle Petruccio, 1000 m;

24) Monte Falascone, 1135 m;

54) Colle Piano, 1200 m;

Municipality of Borbona

2) Pineta (Pozzo), 900 m;

3) Li Capitoni, 945 m;

4) La Pineta (1st hairpin curve), 950 m;

5) Fonte de lu Cupu, 980 m;

6) Fonte Perara, 983 m;

7) La Pineta, 1000 m;

9) S. Maria del Monte, 1000 m;

11) Pian Mattano, quarry at 1100 m;

16) Casale Manocchio, 1059 m;

22) Le Pacinette, 1100 m;

25) Casale Spaccone, 1136 m;

27) Fonte Brignola, 1187 m;

32) Tornante Mattano-Malepasso, hairpin curve at 1170 m;

33) Valle Orticara, 1300 m;

34) Pian Zeidenti, 1300 m;

35) Costa Rosata, 1317 m;

36) Colle Orticara, 1357 m;

Idem, surroundings of Vallemare (secondary village of Borbona)

10) Cimitero (Cemetery), 1002 m;

12) Migliaru Cerecia, 1170 m;

13) Le Cannaine, 1040 m;

14) Bivio Santa Maria del Monte-Fonte Brignola, 1300 m;

15) Pozzo dei Corvi, 1050 m;

- 17) Lu Migliaru, 1083 m;
- 18) Prata di Laculo, 1088 m;
- 19) Costa della Chiusa, 1093 m;
- 20) La Palombara, 1094 m;
- 21) Curva Via della Fonte, 1150 m;
- 23) Colle Marcone, 1121 m;
- 26) Lu Canalone, 1174 m;
- 28) Via Tratturo Cagno, 1380 m;
- 29) La Crociata, 1200 m;
- 30) Fonte Cerecia, 1220 m;
- 31) Monti Poponi, 1253 m;
- 37) Prata di Cagno, 1383 m;
- 38) Valle del Tratturo, 1394 m;
- 39) Le Pratelle, 1400 m;
- 40) Pratoguerra, 1439 m;
- 41) Colle Lungo, 1450 m;
- 42) Pozza Retorna, 1450 m;
- 43) Monte Pizzaro, 1300 m;
- 44) Curva Orticara Tratturo, 1403 m;
- 45) Pozza Maiale, 1480 m;
- 46) Prato Lungo, 1533 m;
- 47) Li Merchi, 1540 m;
- 49) Colle Prato, 1463 m;
- 50) Monte Cerreto, Vena dell'Aquila, 1541 m;
- 55) Valle Entamella, 1150 m;

Municipality of Micigliano

- 48) surr. (surroundings) La Mozza (*Abies alba* L. stand), 1544 m;

Municipality of Antrodoco

- 51) Le Quattro Facce, 1600 m;
- 52) Prati di M. Giano, 1790 m;
- 53) Monte Giano, 1820 m.

Sampling and collecting techniques

A variety of systems has been employed in order to survey as many Lepidoptera species as possible; these were: netting for the day-active species, lamps and light-trapping for the night-flying ones (Mixed Light 160 W; Mercury Vapour 250 W; fluorescent actinic tubes 15 W), either mounted in fixed sites with electricity available or powered with portable generators or batteries, sugaring, synthetic pheromones (mainly for the Sesiidae) and direct search

of preimaginal stages. On occasion, at given sites and dates several easily distinguishable species were simply recorded without collecting any specimens (“sightings”).

Study and identification

Voucher specimens of all species were taken for proper identification. Except when otherwise stated these are preserved in the authors’ collections and Museo Civico di Zoologia (Rome). Taxa were identified either after external habitus, whenever sufficient, or by dissections of the genitalia. Genital parts were either mounted on microscopic slides or glycerol-preserved into microtubes under the specimens themselves. The full list of works used for the taxonomic identifications is omitted here for the sake of brevity and included in the references, but we briefly mention here the main reference works: Hepialoidea (Toll, 1959; Freina & Witt, 1990), Nepticuloidea (Buszko, 1981; Johansson et al., 1990), Incurvarioidea (Wojtusiak, 1972, 1976; Razowski, 1978; Razowski & Wojtusiak, 1978a, 1978b), Tischerioidea (Toll, 1959), Tineoidea (Pierce & Metcalfe 1935, 1938; Kozhanchikov, 1956; Petersen, 1957, 1959, 1969, 1983; Zagulajev, 1966, 1968, 1988; Capuse, 1968; Robinson, 1979; Gaedike, 1983, 1987; Hättenschwiler, 1997, 1999; Sauter & Hättenschwiler, 1999; Kuznetsov & Baryshnikova, 2003), Yponomeutoidea (Buszko, 1981; Friese, 1960, 1969; Baraniak, 2007), Gelechioidea (Hannemann, 1953, 1995; Laar, 1961; Toll, 1963, 1964; Sattler, 1967; Englert, 1974; Patzak, 1976; Traugott-Olsen & Nielsen, 1977; Buszko, 1978; Gozmany, 1962, 1978; Baldizzone, 1981, 1982a, 1982b, 1985, 1986; Huemer 1988, 1998; Palm, 1989; Razowski, 1990; Bengtsson, 1998; Elsner et al., 1999; Huemer & Karsholt, 1999, 2002; Povolny, 2002; Koster & Sinev, 2003; Karsholt & Rutten, 2005; Tokár et al., 2005), Zygaenoidea (Bertaccini & Fiumi, 1999; Naumann et al., 1999), Sesiioidea (Freina & Witt, 1997; Lastuvka & Lastuvka, 2001; Bertaccini & Fiumi, 2002), Tortricioidea (Razowski, 1970, 1984, 2002, 2003), Epermenioidea (Buszko & Skalski, 1980), Alucitoidea (Buszko, 1977; Sutter, 1990; Scholz & Jäckh, 1994), Pterophoroidea (Gielis, 1996), Pyraloidea (Marion, 1953-

Figs 3-10 – Selection of biotopes representing the study area (numbers between brackets relate to position marked in Fig. 1): Monti Poconi [31], 1253 m (3); sight from Le Prata di Laculo [18], 1088 m, with ditches of La Fonte de lu Cupu (foreground) [5], 980 m, Fonte Perara [6], 983 m (between the poplars and pine stands), Li Capitoni [3], 945 m (beyond) and pinewood and Sanctuary of S. Maria del Monte [9], 1000 m (far to the left) (4); La Pineta [7], 1000 m (5); Costa della Chiusa [19], 1093 m (6); Colle Orticara [36], 1357 m, viewed from Valle Orticara [33] 1300 m (7); Colle Lungo [41], 1450 m, and Valle del Tratturo [38], 1394 m, with the Plain of Cascina (middle distance), already in the Abruzzi (8); massif of Monte Giano viewed from Le Pratelle [39], 1400 m (9); beechwood in Pratoguerra [40], 1439 m (10).

1955, 1959-1977; Bleszynski, 1965; Roesler, 1973, 1993; Slamka, 1995, 2006, 2008; Goater et al., 2005), Bombycoidea and Noctuoidea (in part) (Bertaccini et al., 1994, 1997; Freina & Witt, 1987, 1990; Leraut, 2006), Hesperioidea and Papilionoidea (Higgins, 1975; Higgins & Riley 1970; Verity, 1940, 1943, 1947[-1950], 1950[-1951], 1953), Geometroidea (Culot, 1917-1919, 1919-1920; Fajcik 2003; Forster & Wohlfahrt, 1981; Hausmann, 2001, 2004; Mironov, 2003; Leraut, 2009), Noctuoidea (in part) (Berio 1985, 1991; Bertaccini et al., 2008; Culot 1909-1913, 1914-1917; Fibiger, 1990, 1993, 1997; Ronkay & Ronkay, 1994, 1995; Ronkay et al., 2002; Hacker et al., 2002; Goater et al., 2003; Zilli et al., 2005; Fibiger & Hacker, 2007; Fibiger et al., 2009, 2010), and the works by Medvedev (1987, 1989) and Parenti (2000). The most of the Coleophoridae and a number of Psychidae were kindly studied and identified by G. Baldizzone (Asti, Italy) and E. Bertaccini (Roncadello, FC, Italy), respectively.

Layout of results

In order to better enable traceability of the records, the systematic arrangement and sequence of taxa which are followed in the special section are still those of the most popular list of the European Lepidoptera printed at the end of the last century, namely Karsholt & Razowski's (1996), irrespective of a number of profound modifications which, after several papers entangling classifications often clashing to each other, have added over the years (e.g. Zahiri et al., 2010). Nomenclature of single species has however been updated after the last version of Fauna Europaea (Karsholt & Nieuwerkerken, 2010), with some modifications including outcomes of recentmost findings, where necessary. Subgeneric and subspecific names are omitted in the list for the sake of simplicity.

The records are given after alphabetic order of the collecting sites and, within these, they are arranged chronologically. Semicolons may either separate different sites or, in case of collectors, relate to all preceding records, whereas commas separate different records from a same site or, in case of collectors, relate to responsables for single records. A number of sightings of supposedly easily identifiable "species" which subsequent to the beginning of the field work have subsequently been shown to consist of two sibling species are simply attributed to the immediately more inclusive taxon (e.g. a genus, the relevant sister species pair).

Responsibles for single records and sightings are given in the special section, with the notion that in order to distinguish between the first two authors, those due to the first one are mentioned with the given name in full. The taxa followed by an asterisk are briefly commented in the section "notes" following the list.

List of species

MICROPTERIGOIDEA

MICROPTERIGIDAE

1. *Micropterix rothenbachii* Frey, 1856

RECORDS. 1 ♀, **Costa della Chiusa**, 1093 m, 5.V.1990 (gen. praep. MICROP 1, M. Pinzari); 1 ♀, **Pian Mattano**, 1100 m, 17.V.2010 (gen. praep. MICROP 2, M. Pinzari); M. Pinzari leg.

2. *Micropterix vulturensis* Heath, 1981

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 17.V.2010 (gen. praep. MICROP 3, M. Pinzari), 1 ♀, idem, 23.V.2010 (gen. praep. MICROP 4, M. Pinzari); M. Pinzari leg.

HEPIALOIDEA

HEPIALIDAE

3. *Triodia sylvina* (Linnaeus, 1761)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 16.VIII.1970, 1 ♀, idem, 20.VIII.1987, 3 ♂♂, idem, 29.VIII.1987, 2 ♂♂, 1 ♀, idem, 18.VIII.1988, 1 ♂, idem, 19.VIII.1988, 1 ♀, idem, 28.VIII.1988, 1 ♀, idem, 28.VIII.1989, 1 ♀, idem, 24.VIII.1994, 1 ♀, idem, 24.VIII.1999; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 4-6.9.1996, A. Zilli leg.

4. *Pharmacis lupulina* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Petruccio**, 1000 m, 20.V.2007, A. Zilli leg. 1 ♂, **Costa della Chiusa**, 1093 m, 28.V.1989, 1 ♂, idem, 29.V.1999; M. Pinzari leg.

5. *Pharmacis aemilianus* (Costantini, 1911)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 15.VIII.1983, 1 ♂, idem, 16.VIII.1988, 1 ♀, idem, 31.VII.1990, 1 ♂, idem, 1.VIII.1990, 2 ♂♂, idem, 2.VIII.1990, 1 ♂, idem, 3.VIII.1990, 1 ♀, idem, 8.VIII.1990, 1 ♂, 1 ♀, idem, 5.VIII.1991, 1 ♂, idem, VIII.1994, 1 ♀, idem, 6.VIII.1994, 1 ♀, idem, 15.VIII.1994, 1 ♀, idem, 7.VIII.1996, 1 ♂, idem, 5.VIII.1997, 1 ♀, idem, 3.VIII.1998, 1 ♀, idem, 5.VIII.1999, 1 ♂, idem, 3.VIII.2001, 1 ♀, idem, 12.VIII.2002, 1 ♀, idem, 27.VII.2006, 1 ♀, idem, 28.VII.2006, 1 ♀, idem 22.VIII.2007; M. Pinzari leg. 2 ♂♂, **Colle Petruccio**, 1000 m, 30-31.VII.2001, 1 ♂, idem, 5.VIII.2003, 1 ♀, idem, 6.VIII.2003, 3 ♂♂, idem, 7.VIII.2003, 2 ♂♂, idem, 9.VIII.2003, 1 ♂, idem, 12.VIII.2003, 2 ♂♂, idem, 12.VIII.2004, 3 ♂♂, idem, 14.VIII.2004; A. Zilli leg. 1 ♀, **Prata di Laculo**, 1088 m, 9.VIII.2003; M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 15.VII.2002, 5-15.VIII.2003; fide A. Zilli.

NEPTICULOIDEA

OPOSTEGIDAE

6. *Opostega salaciella* (Treitschke, 1833)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 27.VI.2009, M. Pinzari leg.

INCURVARIOIDEA

ADELIDAE

ADELINAE

7. *Nemophora degeerella* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 10.VII.1993; 1 ♂, **Prata di Laculo**, 1088 m, 28.VI.1998 (gen. praep. ADE 1, M. Pinzari); M. Pinzari leg.

8. *Nemophora raddaella* (Hübner, 1793)

RECORDS. 1 ♂, **Fonte de lu Cupu**, 980 m, 28.VI.1998, 3 ♂♂ (gen. praep. ADE 3, M. Pinzari), 2 ♀♀, idem, 29.VI.1998; 1 ♀, **Prata di Laculo**, 1088 m, 2.VII.1988; M. Pinzari leg.

SIGHTINGS. **Fonte de lu Cupu**, 980 m, 5.VII.2008, fide A. Zilli.

9. *Nemophora metallica* (Poda, 1761)

RECORDS. 3 ♂♂ (gen. praep. ADE 7, M. Pinzari), 1 ♀, **La Pineta**, 1000 m, 1.VII.1989, 1 ♂, 1 ♀, idem, 23.VI.1990; 1 ♀, **Prata di Laculo**, 1088 m, 2.VII.1988, 1 ♀, idem, 27.VI.1988, 5 ♂♂ (gen. praep. ADE 8, M. Pinzari), 2 ♀♀, idem, 27.VI.1990, 4 ♂♂, 10 ♀♀, idem, 29.VI.1990; M. Pinzari leg.

10. *Adela violella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Costa della Chiusa**, 1093 m, 27.VI.1999 (gen. praep. ADE 6, M. Pinzari), M. Pinzari leg.

11. *Adela mazzolella* (Hübner, 1801)

RECORDS. 1 ♂, **Fonte de lu Cupu**, 980 m, 28.VI.1997 (gen. praep. ADE 5, M. Pinzari), 1 ♀, idem, 11.VII.1998; 1 ♂, **La Crociata**, 1200 m, 9.VII.1995; 2 ♂♂, **Pineta (Pozzo)**, 900 m, 28.VI.1998; M. Pinzari leg.

12. *Adela reaumurella* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 16.V.1992, 1 ♀, idem, 15.V.1994; 1 ♂, **Costa della Chiusa**, 1093 m, 26.V.1991 (gen. praep. ADE 4, M. Pinzari), 1 ♂, idem, 8.V.1999; 1 ♂, 1 ♀, **Fonte de lu Cupu**, 980 m, 9.V.1999; 1 ♀, **Le Pratelle**, 1400 m, 14.VI.1992; 1 ♀, **Prata di Liculo**, 1088 m, 7.VI.1998; 1 ♂, **Valle Orticara**, 1300 m, 27.V.1990; M. Pinzari leg.
SIGHTINGS. **Colle Petruccio**, 1000 m, 20.V.2007; fide A. Zilli.

13. *Cauchas albi antennella* (Burmman, 1943) (Fig. 88)*

RECORDS. 1 ♂, **Costa della Chiusa**, 1093 m, 30.V.1999 (gen. praep. ADE 10, M. Pinzari); 1 ♂, **Fonte de lu Cupu**, 980 m, 8.V.1994; 1 ♀, **La Pineta**, 1000 m, 4.VI.1988, 1 ♀, idem, 22.V.1994; 2 ♀♀, **Pineta (Pozzo)**, 900 m, 31.V.1998; M. Pinzari leg.

NEMATOPOGONINAE

14. *Nematopogon adansoniella* (Villers, 1789)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 26.V.2008, 1 ♀, idem, 27.V.2008; 1 ♀, **Fonte de lu Cupu**, 980 m, 16.V.1998 (gen. praep. ADE 9, M. Pinzari); M. Pinzari leg.

15. *Nematopogon swammerdamella* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 28.V.1989, 1 ♀, idem, 20.V.1995, 1 ♀, idem, 18.V.1996, 1 ♀, idem, 27.V.2008; 1 ♀, **Costa della Chiusa**, 1093 m, 8.V.1999 (gen. praep. ADE 2, M. Pinzari); M. Pinzari leg.

INCURVARIIDAE

16. *Incurvaria masculella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 7.IV.1990, 1 ♂, idem, 15.IV.1990 (gen. praep. INCU 3, M. Pinzari), 1 ♀, idem, 14.V.1994, 1 ♀, idem, 29.V.2004; 1 ♂, **Costa della Chiusa**, 1093, 1.V.1998 (gen. praep. INCU 8, M. Pinzari); M. Pinzari leg.

17. *Incurvaria koernerella* (Zeller, 1839) (Figs 11, 89)*

RECORDS. 1 ♀, **Colle Marcone**, 1121, 14.V.1994 (gen. praep. INCU 2, M. Pinzari); 1 ♂, **Costa della Chiusa**, 8.V.1999 (gen. praep. INCU 1, M. Pinzari); M. Pinzari leg. 3 ♂♂, **Pian Zaidenti**, 1300 m, 11.V.2008 (gen. praep. INCU 4, M. Pinzari); Manuela Pinzari leg.

TISCHERIOIDEA

TISCHERIIDAE

18. *Coptotriche marginea* (Haworth, 1828)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 13.VIII.2007 (gen. praep. TISC 1, M. Pinzari), M. Pinzari leg.

19. *Coptotriche angusticolella* (Duponchel, 1843)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 24.VII.2007 (gen. praep. TISC 2, M. Pinzari), M. Pinzari leg.

TINEOIDEA

TINEIDAE

MYRMECOZELINAE

20. *Ateliotum petrinella* (Herrich-Schäffer, 1854)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 27.VII.2006 (gen. praep. TINEI 14, M. Pinzari), 1 ♂, idem, 29.VI.2007 (gen. praep. TINEI 30, M. Pinzari); M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 3.VIII.2004, A. Zilli leg.

21. *Cephimallota crassiflavella* Bruand, 1851

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 14.VII.2007 (gen. praep. TINEI 28, M. Pinzari), 1 ♂, idem, 20.VII.2007 (gen. praep. TINEI 20, M. Pinzari); M. Pinzari leg.

22. *Cephimallota angusticostella* (Zeller, 1839)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 2.VIII.1990 (gen. praep. TINEI 7, M. Pinzari), 1 ♂, idem, 30.VII.2005 (gen. praep. TINEI 15, M. Pinzari), 1 ♂, idem, 18.VI.2007 (gen. praep. TINEI 27, M. Pinzari), 1 ♂, idem, 19.VI.2007 (gen. praep. TINEI 25, M. Pinzari), 1 ♂, idem, 26.VII.2007 (gen. praep. TINEI 17, M. Pinzari); M. Pinzari leg.

MEESIINAE

23. *Infurcitinea albicomella* (Stainton, 1851)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 14.VII.2007, 1 ♂, idem, 24.VII.2007, 2 ♀♀, idem, 2.VIII.2007 (gen. praep. TINEI 44, M. Pinzari), 1 ♂, idem, 6.VIII.2007, 1 ♂, 1 ♀, idem,

13.VIII.2007, 1 ♀, idem, 14.VIII.2007 (gen. praep. TINEI 45, M. Pinzari), 1 ♂, idem, 15.VIII.2007, 1 ♂, idem, 17.VIII.2007 (gen. praep. TINEI 40, M. Pinzari), 1 ♂, 1 ♀ (gen. praep. TINEI 43, M. Pinzari), idem, 21.VIII.2007, 1 ♀, idem 14.VII.2009 (gen. praep. TINEI 114, M. Pinzari), 1 ♂, idem 21.VII.2009 (gen. praep. TINEI 71, M. Pinzari), 1 ♂, idem, 22.VII.2009 (gen. praep. TINEI 110, M. Pinzari), 2 ♂♂, idem 1.VIII.2009, 1 ♂, idem 3.VIII.2009 (gen. praep. TINEI 62, M. Pinzari), 1 ♂, idem, 29.VII.2010 (gen. praep. TINEI 103, M. Pinzari), 1 ♂, idem, 31.VII.2010 (gen. praep. TINEI 105, M. Pinzari), 1 ♂, 1 ♀ (gen. praep. TINEI 87, M. Pinzari), idem, 3.VIII.2010, 3 ♂♂♂, idem, 8.VIII.2010 (gen. praep. TINEI 79, M. Pinzari); M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 20.VIII.2002; A. Zilli leg.

24. *Infurcitinea finalis* Gozmány, 1959

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 20.VII.2007 (gen. praep. TINEI 42, M. Pinzari), 1 ♂, idem, 2.VII.2008 (gen. praep. TINEI 108, M. Pinzari), 1 ♀, idem, 5.VII.2008 (gen. praep. TINEI 113, M. Pinzari), 1 ♂, idem, 20.VII.2008 (gen. praep. TINEI 51, M. Pinzari); M. Pinzari leg.

SCARDIINAE

25. *Morophaga choragella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 10.VIII.1987 (gen. praep. TINEI 9, M. Pinzari), 1 ♀, idem, 22.VIII.1989, 1 ♀, idem, 24.VII.1993, 1 ♀, idem, 2.VIII.1993, 1 ♀, idem, 2.VIII.1997, 1 ♂, idem, 5.VIII.1999, 1 ♀, 14.VIII.2007, 1 ♂, idem, 20.VIII.2009, 1 ♀, idem, 3.VIII.2010; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 24.VIII.2002, 1 ♀, idem, 4.VIII.2004; A. Zilli leg.

NEMAPOGONINAE

26. *Triaxomera parasitella* (Hübner, 1796)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.V.1993 (gen. praep. TINEI 1, M. Pinzari), 1 ♀, idem, 19.VI.2004, 1 ♀, idem, 16.VI.2006, 1 ♀, idem, 13.VI.2009, 1 ♀, idem, 12.VI.2010, 1 ♀, idem, 3.VII.2010; M. Pinzari leg.

27. *Nemapogon granella* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 4.VI.2008 (gen. praep. TINEI 50, M. Pinzari), 1 ♂, idem, 13.VI.2009 (gen. praep. TINEI 53, M. Pinzari); M. Pinzari leg.

28. *Nemapogon inconditella* (D. Lucas, 1956)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 5.VII.2008, 1 ♀, idem, 9.VII.2008 (gen. praep. TINEI 83, M. Pinzari), 2 ♂♂, 1 ♀, idem, 20.VII.2008 (gen. praep. TINEI 48, M. Pinzari), 1 ♀, idem, 20.VIII.2008 (gen. praep. TINEI 96, M. Pinzari), 1 ♀ (gen. praep. TINEI 104, M. Pinzari), idem, 3.VIII.2009, 1 ♀, idem, 25.VIII.2010 (gen. praep. TINEI 84, M. Pinzari); M. Pinzari leg.

29. *Nemapogon ruricolella* (Stainton, 1849)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 27.VI.2009 (gen. praep. TINEI 64, M. Pinzari), 1 ♂, idem, 26.VI.2010 (gen. praep. TINEI 80, M. Pinzari), 1 ♂, idem, 3.VII.2010 (gen. praep. TINEI 95, M. Pinzari), 1 ♀, idem, 23.VII.2010 (gen. praep. TINEI 82, M. Pinzari); M. Pinzari leg.

30. *Nemapogon variatella* (Clemens, 1859)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 19.VIII.2006 (gen. praep. TINEI 13, M. Pinzari), 1 ♂, idem, 2.IX.2006 (gen. praep. TINEI 12, M. Pinzari), 1 ♂, idem, 24.VII.2007 (gen. praep. TINEI 35, M. Pinzari); M. Pinzari leg.

31. *Nemapogon gravosaellus* G. Petersen, 1957

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 31.VII.2010 (gen. praep. TINEI 97, M. Pinzari), 1 ♀, idem, 24.VIII.2010 (gen. praep. TINEI 93, M. Pinzari); M. Pinzari leg.

32. *Nemapogon hungaricus* Gozmány, 1960

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 24.VII.2007 (gen. praep. TINEI 34, M. Pinzari), 1 ♂, idem, 9.VII.2008 (gen. praep. TINEI 100, M. Pinzari), 1 ♂, idem, 19.VIII.2008 (gen. praep. TINEI 49, M. Pinzari), 1 ♂, idem, 19.VII.2009, 1 ♂, idem, 20.VII.2009 (gen. praep. TINEI 106, M. Pinzari), 1 ♀, idem, 22.VII.2009, 1 ♂, idem, 2.VIII.2009 (gen. praep. TINEI 56, M. Pinzari), 2 ♂♂, idem, 3.VIII.2009, 1 ♀, idem, 10.VIII.2009, 2 ♂♂, idem, 12.VIII.2009 (gen. praep. TINEI 64, M. Pinzari), 2 ♂♂, idem, 1.VIII.2010, 1 ♂, idem, 2.VIII.2010, 1 ♂, idem, 3.VIII.2010, 1 ♀, idem, 4.VIII.2010 (gen. praep. TINEI 91, M. Pinzari), 1 ♂, idem, 5.VIII.2010 (gen. praep. TINEI 77, M. Pinzari), 1 ♀, idem, 7.VIII.2010 (gen. praep. TINEI 85, M. Pinzari), 2 ♂♂, idem, 10.VIII.2010 (gen. praep. TINEI 94, TINEI 101, M. Pinzari); M. Pinzari leg.

33. *Nemapogon agenjoi* G. Petersen, 1959

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 23.VIII.2005 (gen. praep. TINEI 46, M. Pinzari), 1 ♂, idem, 24.VII.2007 (gen. praep. TINEI 36, M. Pinzari), 1 ♂, idem, 26.VII.2007 (gen. praep. TINEI 37, M. Pinzari), 2 ♂♂, idem, 1.VIII.2007 (gen. praep. TINEI 32, TINEI 33, M. Pinzari), 1 ♂, idem, 12.VII.2008 (gen. praep. TINEI 115, M. Pinzari), 1 ♂, idem, 28.VIII.2008 (gen. praep. TINEI 98, M. Pinzari), 1 ♂, idem, 22.VII.2009 (gen. praep. TINEI 59, M. Pinzari), 1 ♂, idem, 8.VIII.2009 (gen. praep. TINEI 66, M. Pinzari), 1 ♂, idem, 12.VIII.2009 (gen. praep. TINEI 67, M. Pinzari), 2 ♂♂, idem, 13.VIII.2009 (gen. praep. TINEI 55, TINEI 63, M. Pinzari), 1 ♂, idem, 15.VIII.2009 (gen. praep. TINEI 58, M. Pinzari), 1 ♂, idem, 1.VIII.2010 (gen. praep. TINEI 81, M. Pinzari), 1 ♂, idem, 16.VIII.2010 (gen. praep. TINEI 99, M. Pinzari); M. Pinzari leg.

34. *Nemapogon clematella* (Fabricius, 1781)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 11.VIII.2009 (gen. praep. TINEI 61, M. Pinzari); 1 ♂, surr. **La Mozza**, 1544 m, 29.VII.2009 (gen. praep. TINEI 70, M. Pinzari); M. Pinzari leg.

35. **Nemapogon picarella** (Clerck, 1759) (Figs 12, 90)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.VIII.2005 (gen. praep. TINEI 10, M. Pinzari), M. Pinzari leg.

36. **Neurothaumasia ankerella** (Mann, 1867) (Fig. 91)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 9.VIII.2009 (gen. praep. TINEI 54, M. Pinzari), M. Pinzari leg.

TINEINAE

37. **Tinea pellionella** Linnaeus, 1758

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 13.VII.2007 (gen. praep. TINEI 41, M. Pinzari), 1 ♂, idem, 22.VII.2010 (gen. praep. TINEI 76, M. Pinzari); M. Pinzari leg.

38. **Tinea murariella** Staudinger, 1859 (Fig. 92)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 1.VIII.2007 (gen. praep. TINEI 16, M. Pinzari), M. Pinzari leg.

39. **Tinea trinotella** Thunberg, 1794

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 7.VIII.1989 (gen. praep. TINEI 4, M. Pinzari), 1 ♀, idem, 30.VII.1993 (gen. praep. TINEI 3, M. Pinzari), 1 ♀, idem, 19.VIII.2001, 1 ♀, idem, 8.VIII.2003, 1 ♂, idem, 24.VII.2007 (gen. praep. TINEI 26, M. Pinzari), 1 ♂, idem, 27.V.2008, 1 ♂, idem, 20.VI.2008 (gen. praep. TINEI 68, M. Pinzari), 1 ♀, idem, 20.VIII.2008, 1 ♀, idem, 23.V.2009, 2 ♀♀, idem, 22.VII.2009, 1 ♂, idem, 27.VII.2009 (gen. praep. 72, M. Pinzari), 1 ♂, idem, 2.VIII.2008, 1 ♂, idem, 28.VII.2009, 1 ♂, idem, 30.VII.2009, 1 ♀, idem, 10.VIII.2009, 1 ♂, idem, 15.VIII.2009, 1 ♂, idem, 5.VI.2010, 1 ♀, idem, 22.VIII.2010; M. Pinzari leg.

40. **Niditinea fuscella** (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 13.VII.2009 (gen. praep. TINEI 116, M. Pinzari), 2 ♂♂, idem, 7.VIII.2009 (gen. praep. TINEI 69, TINEI 109, M. Pinzari); M. Pinzari leg.

41. **Niditinea truncicolella** (Tengström, 1848)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 27.VII.2007 (gen. praep. TINEI 031, M. Pinzari), 1 ♀, idem, 26.VIII.2007 (gen. praep. TINEI 24, M. Pinzari); M. Pinzari leg.

42. **Monopis laevigella** (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 28.VIII.2008 (gen. praep. TINEI 73, M. Pinzari), M. Pinzari leg.

43. *Monopis obviella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 20.VIII.1989, 1 ♂, idem, 22.VIII.1989 (gen. praep. TINEI 6, M. Pinzari), 1 ♀, idem, 4.VIII.1990 (gen. praep. TINEI 5, M. Pinzari), 2 ♂♂, idem, 19.VI.2008, 2 ♂♂, idem, 13.VI.2009, 1 ♂, idem, 27.VI.2009, 1 ♀, idem, 17.VII.2009, 1 ♂, idem, 25.VIII.2009, 1 ♂, idem, 13.VI.2010, 1 ♂, idem, 26.VIII.2010; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 30.VI.2007; A. Zilli leg.

44. *Monopis imella* (Hübner, 1813)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.VI.2007 (gen. praep. TINEI 21, M. Pinzari), 1 ♂, idem, 21.VII.2007 (gen. praep. TINEI 22, M. Pinzari), 1 ♂, idem, 16.VIII.2007 (gen. praep. TINEI 19, M. Pinzari), 1 ♂, idem, 22.VIII.2007 (gen. praep. TINEI 23, M. Pinzari), 1 ♂, idem, 5.IX.2008 (gen. praep. TINEI 75, M. Pinzari), 1 ♂, idem, 10.VIII.2010 (gen. praep. TINEI 107, M. Pinzari); M. Pinzari leg.

PSYCHIDAE

TALEPORIINAE

45. *Taleporia defoliella* (Constant, 1895)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 3.IX.2006; 3 ♂♂, **Pineta (Pozzo)**, 1000 m, 30.IX.2009; M. Pinzari leg., E. Bertaccini det.

TYPHONIINAE

46. *Tiphonia beatricis* Hättenschwiler, 2000

RECORDS. 2 ♀♀, **Pineta (Pozzo)**, 900 m, 12.VIII.2000; 1 ♀, **Pozzo dei Corvi**, 1050 m, 9.VII.2000, 1 ♀, idem, 7.VIII.2001; M. Pinzari leg.

EPICHOPTERYGINAE

47. *Epichnopteryx plumella* (Denis & Schiffermüller, 1775) (Fig. 93)*

RECORDS. 3 ♂♂, **Colle Marcone**, 1121 m, 19.II.1989, 5 ♂♂, idem, 26.III.1989, 1 ♂, idem, 27.III.1989, 1 ♂, idem, 5.V.1990, 3 ♂♂, idem, 20.IV.1992, 1 ♂, idem, 14.IV.1994, 1 ♂, idem, 8.V.1994, 1 ♂, idem, 2.V.1998, 1 ♂, idem, 23.IV.2000, 1 ♂, idem, 24.IV.2006, 1 ♂, idem, 11.V.2010; 1 ♂, **Costa della Chiusa**, 1093 m, 8.V.1999, 3 ♂♂, idem, 9.V.1999, 3 ♂♂, idem, 25.IV.2006; 1 ♂, **Fonte de lu Cupu**, 980 m, 23.IV.2006; 1 ♂, **Monte Cagno**, 1383 m, 25.IV.1989; 4 ♂♂, **Pineta (Pozzo)**, 900 m, 5.IV.1999; M. Pinzari leg.

OIKETICINAE

48. *Oiketicoides lutea* (Staudinger, 1870)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 8.VIII.1986, 1 ♂, idem, 31.VII.1991; M. Pinzari leg.
1 ♂, **Colle Petruccio**, 1000 m, 29.VII.2001, A. Zilli leg.

49. *Canephora hirsuta* (Poda, 1761)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 27.VI.2008; 1 ♂, **Le Cannaine**, 1040 m, 26.VI.1995; M. Pinzari leg.

50. *Ptilocephala wockei* (Standfuss, 1882)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 24.III.1990, 1 ♂, idem, 23.V.1994; 1 ♂, **Pineta (Pozzo)**, 900 m, 31.V.1998; M. Pinzari leg.

51. *Ptilocephala plumifera* (Ochsenheimer, 1810)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 21.IV.1987, 6 ♂♂, idem, 26.III.1989, 3 ♂♂, idem, 27.III.1989, 1 ♂, idem, 30.III.1994; 1 ♂, **Costa della Chiusa**, 1093 m, 24.IV.2006; 1 ♂, **La Crociata**, 1200 m, 17.III.1991; M. Pinzari leg.

52. *Phalacropterix apiformis* (Rossi, 1790)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 5.V.1990, 1 ♂, idem, 10.V.1992, 3 ♂♂, idem, 9.VI.1995, 1 ♂, idem, 11.V.2008; M. Pinzari leg.

53. *Apterona crenulella* (Bruand, 1853) (Fig. 94)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 18.VI.1993, 1 ♂, idem, 26.VI.1999; M. Pinzari leg.
SIGHTINGS. Several larval/pupal cases, **Colle Petruccio**, 1000 m, winters 1999-2004, fide A. Zilli.

GRACILLARIOIDEA

GRACILLARIIDAE

GRACILLARIINAE

54. *Caloptilia alchimiella* (Scopoli, 1763)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 5.VIII.1989, 1 ♂, idem, 7.VIII.1989 (gen. praep. GRAC 1, M. Pinzari), 1 ♂, idem, 18.VIII.2007, 1 ♂, idem, 5.VIII.2008, 1 ♂, idem, 19.VIII.2008, 1 ♂, idem, 19.VII.2009, 1 ♂, idem, 10.VIII.2009, 1 ♀, idem, 15.VIII.2009, 1 ♂, idem, 17.VIII.2009; M. Pinzari leg.

55. *Aspilapteryx tringipennella* (Zeller, 1839)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 11.VIII.2010, M. Pinzari leg.

56. *Parornix anglicella* (Stainton, 1850)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 2.V.2009 (gen. praep. GRAC 4, M. Pinzari), M. Pinzari leg.

57. *Parornix torquillella* (Zeller, 1850)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 27.VI.2009 (gen. praep. GRAC 3, M. Pinzari), 1 ♂, idem, 22.VIII.2009 (gen. praep. GRAC 2, M. Pinzari); M. Pinzari leg.

LITHOCOLLETINAE

58. *Phyllonorycter messaniella* (Zeller, 1846)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 23.V.2009, M. Pinzari leg.

59. *Phyllonorycter trifasciella* (Haworth, 1828)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 2.IX.2006, M. Pinzari leg.

YPONOMEUTOIDEA

YPONOMEUTIDAE

SCYTHROPIINAE

60. *Scythropia crataegella* (Linnaeus, 1767)

RECORDS. 2 ♂♂, **Colle Marcone**, 1121 m, 26.VIII.1993, 2 ♂♂, idem, 28.VI.1998 (gen. praep. YPO 3, M. Pinzari), 1 ♂, idem, 2.VII.2008, 1 ♂, 1 ♀, idem, 19.VIII.2008, 1 ♂, idem, 25.VIII.2009; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 28.VIII.1989, M. Pinzari leg.; 1 ♂, idem, 1000 m, 3.VIII.1983, 1 ♂, idem, 4.VIII.1983; A. Zilli leg.

YPONOMEUTINAE

61. *Yponomeuta padella* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 12.VIII.1989 (gen. praep. YPO 1, M. Pinzari), 1 ♂, idem, 20.VII.2009 (gen. praep. YPO 39, M. Pinzari); M. Pinzari leg.

62. *Yponomeuta malinellus* Zeller, 1838

RECORDS. 1 ♀, **Colle Marccone**, 1121 m, 22.VII.1988 (gen. praep. YPO 46, M. Pinzari), 1 ♂, idem, 22.VII.1989 (gen. praep. YPO 43, M. Pinzari), 1 ♀, idem, 7.VII.2007 (gen. praep. YPO 41, M. Pinzari), 1 ♂, idem, 17.VII.2009 (gen. praep. YPO 47, M. Pinzari), 1 ♂, idem, 19.VII.2009 (gen. praep. YPO 37, M. Pinzari), 1 ♂, idem, 19.VII.2009 (gen. praep. YPO 49, M. Pinzari), 2 ♂♂ (gen. praep. YPO 38, YPO 44, YPO 45, M. Pinzari), 1 ♀ (gen. praep. YPO 33, M. Pinzari), idem, 20.VII.2009, 1 ♀, idem, 30.VII.2009 (gen. praep. YPO 35, M. Pinzari), 1 ♂, idem, 12.VIII.2009 (gen. praep. YPO 34, M. Pinzari); M. Pinzari leg.

63. *Yponomeuta cagnagella* (Hübner, 1813)

RECORDS. 1 ♀, **Colle Marccone**, 1121 m, 10.VIII.1985, 1 ♂, idem, 7.VIII.1987 (gen. praep. YPO 19, M. Pinzari), 1 ♀, idem, 17.VIII.1989, 1 ♂, idem, 7.VIII.2003 (gen. praep. YPO 29, M. Pinzari), 1 ♂, idem, 30.VII.2005 (gen. praep. YPO 21, M. Pinzari), 1 ♀, idem, 10.VIII.2005, 2 ♂♂, idem, 12.VIII.2005 (gen. praep. YPO 24, YPO 25, M. Pinzari), 1 ♂, idem, 13.VIII.2005 (gen. praep. YPO 30, M. Pinzari), 1 ♂, idem, 15.VIII.2005 (gen. praep. YPO 26, M. Pinzari), 1 ♀, idem, 18.VIII.2005, 1 ♂, idem, 28.VIII.2005 (gen. praep. YPO 27, M. Pinzari), 1 ♀, idem, 29.VIII.2005 (gen. praep. YPO 28, M. Pinzari), 1 ♀, idem, 21.VII.2006, 1 ♀, idem, 16.VIII.2006, 2 ♀♀, idem, 18.VIII.2006 (gen. praep. YPO 32, M. Pinzari), 1 ♀, idem, 23.VIII.2006 (gen. praep. YPO 20, M. Pinzari), 1 ♀, idem, 7.VIII.2007, 1 ♀, idem, 20.VII.2009, 1 ♀, idem, 10.VIII.2010 (gen. praep. YPO 31, M. Pinzari); M. Pinzari leg.

64. *Yponomeuta irrorella* (Hübner, 1796)

RECORDS. 1 ♂, **Colle Marccone**, 1121 m, 25.VIII.2001 (gen. praep. YPO 22, M. Pinzari), M. Pinzari leg.

65. *Yponomeuta plumbella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marccone**, 1121 m, 4.VIII.1990, 1 ♂, idem, 23.VII.2006, 1 ♂, idem, 27.VII.2006, 1 ♂, idem, 17.VIII.2009, 1 ♂, idem, 22.VIII.2010; M. Pinzari leg.

66. *Yponomeuta sedella* Treitschke, 1833

RECORDS. 1 ♂, **Colle Marccone**, 112 m, 3.VIII.2001, 1 ♂, idem, 2.VIII.2003, 1 ♂, idem, 9.VIII.2005; M. Pinzari leg.

67. *Pseudoswammerdamia combinella* (Hübner, 1786)

RECORDS. 1 ♀, **Colle Marccone**, 1121 m, 27.V.2008; M. Pinzari leg. 1 ♀, **Pozzo dei Corvi**, 1050 m, 26.V.2001, 1 ♂, idem, 13.V.2001; A. Zilli leg.

68. *Swammerdamia caesiella* (Hübner, 1796)

RECORDS. 1 ♀, **Colle Marccone**, 1121 m, 19.VIII.2006 (gen. praep. YPO 5, M. Pinzari), 1 ♀, idem, 20.VII.2007 (gen. praep. YPO 10, M. Pinzari), 1 ♀, idem, 14.VIII.2007 (gen. praep. YPO 11, M. Pinzari), 1 ♂, idem, 19.VIII.2007 (gen. praep. YPO 9, M. Pinzari), 1 ♀, idem, 2.VII.2008

(gen. praep. YPO 15, M. Pinzari), 1 ♀, idem, 9.VIII.2008 (gen. praep. YPO 12, M. Pinzari), 1 ♂, idem, 28.VIII.2008, 1 ♂, idem, 13.VI.2009, 1 ♂, idem, 27.VI.2009, 1 ♂, idem, 14.VII.2009 (gen. praep. YPO 17, M. Pinzari), 1 ♂, idem, 27.VII.2009, 1 ♂, idem, 13.VIII.2009, 1 ♀, idem, 15.VIII.2009, 1 ♂, 1 ♀, idem, 21.VIII.2009, 1 ♀, idem, 1.VIII.2010, 1 ♀, idem, 11.VIII.2010, 1 ♂, idem, 26.VIII.2010; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 7.VIII.2003, A. Zilli leg.

69. *Swammerdamia pyrella* (Villers, 1789)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 7.VIII.2010, 1 ♀, idem, 10.VIII.2010 (gen. praep. YPO 16, M. Pinzari); M. Pinzari leg.

70. *Cedestis subfasciella* (Stephens, 1834) (Figs 13, 95)*

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 7.VIII.2006 (gen. praep. YPO 4, M. Pinzari), 1 ♀, idem, 6.VIII.2007 (gen. praep. YPO 14, M. Pinzari), 1 ♂, idem, 13.VIII.2007, 1 ♀, idem, 23.V.2009 (gen. praep. YPO 13, M. Pinzari), 1 ♂, idem, 13.VI.2009, 1 ♀, idem, 28.VIII.2009, 1 ♂, idem, 12.VIII.2010; M. Pinzari leg.

71. *Niphonympha dealbatella* (Zeller, 1847)

RECORDS. 1 ♂, **Colle Marcone** 28.VI.1998 (gen. praep. YPO 8, M. Pinzari), 1 ♀, idem, 13.VII.2001 (gen. praep. YPO 7, M. Pinzari), 1 ♂, idem, 19.VI.2007 (gen. praep. YPO 6, M. Pinzari); M. Pinzari leg.

PRAYDINAE

72. *Prays fraxinella* (Bjerkander, 1784) (Fig. 96)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 5.IX.2006, M. Pinzari leg.

ARGYRESTHIINAE

73. *Argyresthia bonnetella* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 10.VIII.1989 (gen. praep. ARGY 1, M. Pinzari), 1 ♂ (gen. praep. ARGY 2, M. Pinzari), 1 ♀, idem, 1.VIII.2005, 1 ♂, idem, 11.VIII.2005, 1 ♂, idem, 24.VII.2007, 1 ♂, 1 ♀, idem, 1.VIII.2007, 1 ♂, idem, 2.VIII.2007, 1 ♀, idem, 15.VIII.2007 (gen. praep. ARGY 5, M. Pinzari), 1 ♀, idem, 17.VIII.2007, 1 ♀, idem, 18.VIII.2007, 2 ♀♀, idem, 26.VI.2008 (gen. praep. ARGY 10, M. Pinzari), 1 ♀, idem, 16.VIII.2008, 1 ♀, idem, 18.VIII.2008, 1 ♂, idem, 20.VIII.2008, 1 ♂, idem, 27.VII.2009, 1 ♂, idem, 30.VII.2009, 1 ♀, idem, 9.VIII.2009, 1 ♂, idem, 10.VIII.2009 (gen. praep. ARGY 4, M. Pinzari), 3 ♀♀, idem, 25.VIII.2009, 2 ♀♀, idem, 2.VIII.2010 (gen. praep. ARGY 7, M. Pinzari), 2 ♀♀, idem, 3.VIII.2010 (gen. praep. ARGY 9, M. Pinzari), 1 ♂, idem, 4.VIII.2010, 1 ♂, 1 ♀, idem, 6.VIII.2010, 1 ♂, 2 ♀♀, idem, 7.VIII.2010, 1 ♂, idem, 8.VIII.2010, 3 ♀♀, idem, 12.VIII.2010, 1 ♂, idem, 16.VIII.2010, 4 ♀♀, idem, 19.VIII.2010 (gen. praep. ARGY 8, M. Pinzari), 1 ♀, idem,

20.VIII.2010, 1 ♂, 1 ♀, idem, 22.VIII.2010, 3 ♂♂, 1 ♀, idem, 25.VIII.2010, 6 ♂♂, 1 ♀, idem, 26.VIII.2010, 1 ♂, idem, 31.VIII.2010; M. Pinzari leg.

74. *Argyresthia albistria* (Haworth, 1828)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 5.VIII.2001, 1 ♀, idem, 4.IX.2006 (gen. praep. ARGY 3, M. Pinzari), 1 ♂, 1 ♀, idem, 3.VIII.2010; M. Pinzari leg.

YPSOLOPHIDAE

YPSOLOPHINAE

75. *Ypsolopha nemorella* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 30.VII.2005 (gen. praep. YPSO 9, M. Pinzari), 1 ♀, idem, 27.VII.2009; M. Pinzari leg.

76. *Ypsolopha scabrella* (Linnaeus, 1761)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 21.VIII.2006, M. Pinzari leg.

77. *Ypsolopha lucella* (Fabricius, 1775) (Fig. 97)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 19.VIII.1993 (gen. praep. YPSO 7, M. Pinzari), 1 ♂, idem, 12.VIII.2005, (gen. praep. YPSO 12, M. Pinzari), 1 ♂, idem, 2.VIII.2007, 1 ♂, idem, 7.VIII.2007, 1 ♂, idem, 22.VIII.2007; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 3.VIII.2003, A. Zilli leg.

78. *Ypsolopha alpella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 7.VIII.1989, (gen. praep. YPSO 2, M. Pinzari), 1 ♂, idem, 15.VIII.1989, (gen. praep. YPSO 6, M. Pinzari), 1 ♀, idem, 18.VII.1998, (gen. praep. YPSO 3, M. Pinzari), 1 ♂, idem, 1.IX.2003 (gen. praep. YPSO 12, M. Pinzari), 1 ♂, idem, 1.VIII.2005 (gen. praep. YPSO 10, M. Pinzari), 1 ♂, idem, 16.VIII.2006, 1 ♀, idem, 28.VIII.2008, 1 ♂, idem, 28.VIII.2009; M. Pinzari leg.

79. *Ypsolopha sylvella* (Linnaeus, 1767) (Fig. 98)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 23.VIII.1998 (gen. praep. YPSO 5, M. Pinzari), M. Pinzari leg.

80. *Ypsolopha parenthesella* (Linnaeus, 1761)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 21.VIII.1989 (gen. praep. YPSO 4, M. Pinzari), 2 ♂♂, 1 ♀, idem, 26.IX.2009, 1 ♀, idem, 27.IX.2009; M. Pinzari leg.

81. *Ypsolopha ustella* (Clerck, 1759) (Fig. 99)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 24.XII.1988 (gen. praep. YPSO 8, M. Pinzari), 1 ♂, idem, 4.VIII.1989, 1 ♀, idem, 3.VII.1993, 1 ♀, idem, 12.VII.2003, 1 ♂, idem, 2.VIII.2005 (gen. praep. YPSO 11, M. Pinzari), 1 ♀, idem, 16.IV.2006, 1 ♀, idem, 21.VII.2006, 1 ♂, idem, 7.VII.2007, 1 ♀, idem, 20.VII.2007, 1 ♂, idem, 22.VIII.2007, 1 ♀, idem, 8.XII.2007 (gen. praep. YPSO 17, M. Pinzari), 1 ♂, idem, 7.XII.2008 (gen. praep. YPSO 19, M. Pinzari), 1 ♂, idem, 6. XII.2009, 1 ♂, idem, 29.X.2010; M. Pinzari leg.

82. *Ypsolopha sequella* (Clerck, 1759)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 19.VIII.1988, 1 ♀, idem, 5.VIII.1989, 1 ♀, idem, 6.IX.1989, 1 ♂, idem, 17.VII.1993 (gen. praep. YPSO 1, M. Pinzari), 1 ♀, idem, 7.VII.1994, 1 ♀, idem, 21.VIII.1999, 1 ♀, idem, 26.VIII.2005, 1 ♀, idem, 1.IX.2006, 1 ♀, idem, 3.VII.2008, 1 ♂, idem, 5.VII.2008, 1 ♀, idem, 13.VIII.2009, 1 ♀, idem, 1.IX.2009, 1 ♂, idem, 24.IX.2010; M. Pinzari leg.

83. *Ypsolopha vittella* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 30.VII.2005 (gen. praep. YPSO 15, M. Pinzari), 1 ♂, idem, 2.VIII.2007 (gen. praep. YPSO 14, M. Pinzari), 1 ♀, idem, 29.VIII.2007 (gen. praep. YPSO 16, M. Pinzari), 1 ♂, idem, 5.VII.2008 (gen. praep. YPSO 18, M. Pinzari), 1 ♀, idem, 6.IX.2008; M. Pinzari leg.

OCHSENHEIMERIINAE

84. *Ochsenheimeria taurella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♀, **Colle Petruccio**, 1000 m, 8.X.2005, A. Zilli leg.

PLUTELLIDAE

85. *Plutella xylostella* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 2.VIII.2003, 1 ♀, idem, 20.VIII.2005, 1 ♀, idem, 23.IV.2006 (gen. praep. PLUT 1, M. Pinzari), 1 ♂, 1 ♀, idem, 21.VII.2006, 1 ♀, idem, 15.VIII.2006, 1 ♂, idem, 7.IX.2006, 1 ♂, idem, 7.VIII.2007 (gen. praep. PLUT 3, M. Pinzari), 1 ♀, idem, 20.IV.2008, 1 ♀, idem, 21.IV.2008, 1 ♂, idem, 9.VI.2008, 1 ♀, idem, 22.V.2009, 1 ♀, idem, 23.V.2009, 1 ♂, idem, 30.V.2009, 1 ♂, 2 ♀♀, idem, 1.VI.2009, 1 ♂, 2 ♀♀, idem, 1.VIII.2009, 1 ♀, idem, 4.VIII.2009, 1 ♂, idem, 7.VIII.2009, 1 ♀, idem, 10.VIII.2009, 1 ♂, idem, 12.VIII.2009, 1 ♀, idem, 13.VIII.2009, 2 ♂♂, 1 ♀, idem, 25.VIII.2009; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 8.VIII.2003 (gen. praep. PLUT 2, M. Pinzari), A. Zilli leg.

LYONETIIDAE

86. *Lyonetia clerkella* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 22.V.2009, 1 ♂, idem, 26.VIII.2009; M. Pinzari leg.

GELECHIOIDEA

ETHMIIDAE

87. *Ethmia terminella* T. Fletcher, 1938

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.VI.1989, 1 ♂, idem, 8.VII.1989 (gen. praep. ETHM 1, M. Pinzari), 1 ♂, idem, 20.VI.2007 (gen. praep. ETHM 2, M. Pinzari), 1 ♀, idem, 12.VII.2008, 2 ♂♂, idem, 26.VI.2010, 1 ♂, idem, 10.VII.2010; M. Pinzari leg.

88. *Ethmia aurifluella* (Hübner, 1810)

RECORDS. 1 ♀, **Costa della Chiusa**, 1093 m, 9.VI.1996, 1 ♂, idem, 29.V.1999; 1 ♂, **La Palombara**, 1094 m, 30.V.1993; 1 ♂, **Prata di Laculo**, 1088 m, 17.V.1992, 1 ♂, idem, 23.V.1994; 1 ♀, **Vallemare**, 1021 m, 28.V.1989; M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 20.V.2007, fide A. Zilli.

89. *Ethmia bipunctella* (Fabricius, 1775)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 10.VIII.1986, 1 ♂, idem, 24.V.1987, 1 ♀, idem, 8.VIII.1989, 1 ♀, idem, 21.VIII.1989, 1 ♀, idem, 16.VI.1990, 1 ♂, 1 ♀, idem, 28.VII.1990, 1 ♂, idem, 16.VIII.1990, 1 ♀, idem, 23.VIII.1998, 1 ♀, idem, 29.VIII.2005, 1 ♂, idem, 2.IX.2006, 1 ♀, idem, 28.V.2008, 1 ♂, idem, 2.VIII.2008, 1 ♂, idem, 10.VIII.2009, 1 ♂, idem, 24.VIII.2009; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 5-9.VIII.2001, 1 ♂, idem, 8.VIII.2003; A. Zilli leg.

DEPRESSARIIDAE

90. *Luquetia lobella* (Denis & Schiffermüller, 1775)*

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 26.VI.2008 (gen. praep. OEC 47, M. Pinzari), M. Pinzari leg.

91. *Agonopterix thapsiella* (Zeller, 1847) (Fig. 100)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.VI.2007 (gen. praep. DEPRE 120, M. Pinzari); 1 ♂, dint. **La Mozza**, 1544 m, 29.VII.2009 (gen. praep. DEPRE 111, M. Pinzari); M. Pinzari leg.

92. *Agonopterix nanatella* (Stainton, 1849)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 1.VIII.2005 (gen. praep. DEPRE 59, M. Pinzari), M. Pinzari leg.

93. *Agonopterix atomella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 5.VII.2003 (gen. praep. DEPRE 23, M. Pinzari), M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 11.VIII.2004 (gen. praep. DEPRE 79, M. Pinzari), A. Zilli leg.

94. *Agonopterix scopariella* (Heinemann, 1870) (Figs 14, 101)*

Pinzari leg. 3 ♂♂, **Pozzo dei Corvi**, 1050 m, 26.V.2001, A. Zilli leg. 4 ♂♂, **Valle del Tratturo**, 1394 m, 6.VI.2010, 1 ♂, idem, 8.VI.2010, 2 ♂♂, 1 ♀, idem, 19.VI.2010; M. Pinzari leg.

150. *Pleurota aristella* (Linnaeus, 1767)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 8.VIII.2001 (gen. praep. OEC 7, M. Pinzari), 1 ♂, idem, 1.VII.2006, 1 ♂, idem, 19.VII.2009; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 10-14. VIII.2001, 1 ♂, idem, 4.VIII.2004, 2 ♂♂, idem, 20.V.2007, 2 ♂♂, idem, 30.VI.2007; A. Zilli leg. 1 ♀, **Pineta (Pozzo)**, 900 m, 11.VII.1998 (gen. praep. OEC 028, M. Pinzari), 3 ♂♂, idem, 11.VII.2009 (gen. praep. OEC 027, M. Pinzari); M. Pinzari leg.

151. *Pleurota punctella* (O. Costa, 1836)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 30.VI.2006 (gen. praep. OEC 16, M. Pinzari), 2

♂♂, idem 26.VI.2008 (gen. praep. OEC 23, M. Pinzari), 1 ♂, idem, 2.VII.2008, 1 ♂, idem, 26.VI.2009, 1 ♂, idem, 26.VI.2010, 1 ♂, idem, 9.VII.2010; M. Pinzari leg.

LECITHOCERIDAE

152. *Homaloxestis briantiella* (Turati, 1879)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 21.VIII.1989, 1 ♂, idem, 16.VIII.2001, 1 ♀, idem, 16.VIII.2003, 1 ♂, idem, 21.VIII.2005 (gen. praep. LEC 1, M. Pinzari), 1 ♂, idem, 23.VIII.2006, 1 ♀, idem, 25.VIII.2010; M. Pinzari leg.

153. *Lecithocera nigrana* (Duponchel, 1836)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 22.VII.1989 (gen. praep. LEC 2, M. Pinzari), 1 ♂, idem, 3.VIII.2008, 1 ♂, idem, 5.VIII.2008 (gen. praep. LEC 3, M. Pinzari), 1 ♂, idem, 3.VII.2010; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 10-14.VIII.2001 (gen. praep. LEC 4, M. Pinzari), A. Zilli leg.

COLEOPHORIDAE

154. *Coleophora albella* (Thunberg, 1788)

RECORDS. 1 ♂, 1 ♀, **Colle Marcone**, 1121 m, 27.V.2008, 1 ♀, idem, 4.VI.2008 (gen. praep. COLE 10, M. Pinzari), 1 ♂, idem, 11.VI.2010; M. Pinzari leg.

155. *Coleophora flavipennella* (Duponchel, 1843)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 13.VIII.2009 (gen. praep. COLE 11, M. Pinzari), M. Pinzari leg.

156. *Coleophora trifolii* (Curtis, 1832)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 4.VIII.1990 (gen. praep. COLE 14, M. Pinzari) (Baldizzone det), 1 ♀, idem, 3.VIII.2010 (gen. praep. COLE 16, M. Pinzari); M. Pinzari leg.

157. *Coleophora hemerobiella* (Scopoli, 1763)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 1.VIII.2009; 1 ♀, idem, 8.VIII.2009; 1 ♀, idem, 10.VIII.2009; 1 ♀, idem, 11.VIII.2009; M. Pinzari leg.

158. *Coleophora medelichensis* Krone, 1908

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 12.VIII.2007 (Bldz PG N° 14744, G. Baldizzone), M. Pinzari leg.

159. Coleophora colutella (Fabricius, 1794)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 19.VII.2009, 1 ♂, idem, 26.VI.2010; M. Pinzari leg.

160. Coleophora trifariella Zeller, 1849 (Fig. 132)*

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 25.VIII.2006 (gen. praep. COLE 8, M. Pinzari), 1 ♀, idem, 8.VIII.2009 (Bldz PG N° 14743, G. Baldizzone); M. Pinzari leg.

161. Coleophora bilineatella Zeller, 1849

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 27.VII.2009, M. Pinzari leg.

162. Coleophora fringillella Zeller, 1839

RECORDS. 1 ex, **Colle Petruccio**, 1000 m, 29.IV.2001 (coll. G. Baldizzone), A. Zilli leg.

163. Coleophora rectilineella Fischer v. Röslerstamm, 1843 (Fig. 133)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 21.V.2010 (gen. praep. COLE 23, M. Pinzari), M. Pinzari leg.

164. Coleophora hieronella Zeller, 1849

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 19.VI.2008 (gen. praep. COLE 9, M. Pinzari), 1 ♂, idem, 13.VI.2009 (gen. praep. COLE 13, M. Pinzari), 1 ♂, idem, 10.VII.2010; M. Pinzari leg.

165. Coleophora zelleriella Heinemann, 1854

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 27.VII.2009 (Bldz PG N° 14733, G. Baldizzone), 1 ♂, idem, 3.VII.2010, 1 ♂, idem, 23.VII.2010 (gen. praep. COLE 18, M. Pinzari), 1 ♂, idem, 2.VIII.2010, 1 ♂, idem, 8.VIII.2010; M. Pinzari leg.

166. Coleophora serpylletorum E. Hering, 1889 (Fig. 134)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 23.VII.2006, 1 ♂, idem, 27.VII.2007, 1 ♀, idem, 7.VIII.2007 (Bldz PG N° 14730, G. Baldizzone), 1 ♂, idem, 12.VII.2008, 1 ♂, idem, 20.VII.2008, 1 ♂, idem, 1.VIII.2009, 1 ♂, idem, 31.VII.2009, 1.VIII.2010 (gen. praep. COLE 21, M. Pinzari); M. Pinzari leg.

167. Coleophora dignella Toll, 1961 (Fig. 135)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 24.VI.1989 (gen. praep. COLE 2, M. Pinzari, G. Baldizzone det.), 1 ♂, 1 ♀ (coll. G. Baldizzone); **Pineta (Pozzo)**, 900 m, 7.VI.1998; M. Pinzari leg.

168. *Coleophora flaviella* Mann, 1857*

RECORDS. 1 ♂, **Colle Marccone**, 1121 m, 29.VI.2007, M. Pinzari leg.

169. *Coleophora ochrea* (Haworth, 1828)

RECORDS. 1 ♂, **Colle Marccone**, 1121 m, 1 ♂, idem, 16.VIII.1988 (gen. praep. COLE 1, M. Pinzari, G. Baldizzone det.), 1 ♀, idem, 26.VIII.1998, 1 ex, idem, 23.VIII.1989 (in Col. Baldizzone), 1 ♂, idem, 7.VIII.1999, 1 ♂, idem, 10.VIII.2005, 1 ♂, idem, 11.VIII.2003, 1 ♂, idem, 17.VIII.2005, 1 ♀, idem, 18.VIII.2005, 1 ♂, idem, 19.VIII.2005, 2 ♂♂, idem, 27.VIII.2005, 1 ♂, idem, 29.VIII.2005, 2 ♂♂, idem, 17.VIII.2006, 1 ♂, idem, 19.VIII.2006, 1 ♂, idem, 22.VIII.2006, 1 ♂, idem, 2.IX.2006, 1 ♀, idem, 14.VIII.2007, 1 ♂, idem, 15.VIII.2007, 1 ♂, idem, 16.VIII.2007, 1 ♂, idem, 17.VIII.2007, 1 ♀, idem, 26.VIII.2007, 1 ♀, idem, 2.VIII.2008, 2 ♀♀, idem, 14.VIII.2008, 1 ♀, idem, 16.VIII.2008, 1 ♂, idem, 9.VIII.2009, 1 ♀, idem, 19.VIII.2009, 1 ♀, idem, 24.VIII.2009, 1 ♂, idem, 27.VIII.2009, 1 ♂, idem, 15.VIII.2010, 1 ♂, idem, 18.VIII.2010, 2 ♂♂, idem, 20.VIII.2010, 1 ♂, idem, 24.VIII.2010; M. Pinzari leg.

170. *Coleophora kautzi* Rebel, 1933

RECORDS. 1 ♀, **Colle Marccone**, 1121 m, 13.VIII.1989 (gen. praep. COLE 3, M. Pinzari, G. Baldizzone det.), 1 ♂, idem, 10.VIII.2005, 1 ♀, idem, 2.VIII.2007 (coll. G. Baldizzone), 1 ♂, 1 ♀, idem, 2.VIII.2008, 1 ♂, idem, 5.VIII.2010 (gen. praep. COLE 17, M. Pinzari); M. Pinzari leg.

171. *Coleophora bilineella* Herrich-Schäffer, 1855 (Fig. 136)*

RECORDS. 1 ♂, **Colle Marccone**, 1121 m, 21.VIII.2010, M. Pinzari leg.

172. *Coleophora lixella* Zeller, 1849

RECORDS. 1 ♀, **Colle Marccone**, 1121 m, 1.VII.2006; 1 ♂, idem, 20.VI.2008, 1 ♂, idem, 21.VI.2008, 1 ♂, idem, 27.VI.2009, 1 ♂, idem, 26.VI.2010, 1 ♀, idem, 3.VII.2010; M. Pinzari leg.

173. *Coleophora ornatipennella* (Hübner, 1796)

RECORDS. 1 ♀, **Colle Marccone**, 1121 m, 22.VII.1989, (gen. praep. COLE 5, M. Pinzari, G. Baldizzone det.), M. Pinzari leg.

174. *Coleophora oriolella* Zeller, 1849

RECORDS. 1 ♀, **Colle Marccone**, 1121 m, 10.VII.2010 (gen. praep. COLE 26, M. Pinzari), M. Pinzari leg.

175. *Coleophora vulnerariae* Zeller, 1839

RECORDS. 1 ♀, **Colle Marccone**, 1121 m, 28.V.2008, 3 ♀♀ (1 ♀ coll. G. Baldizzone), idem, 22.V.2009; 1 ♀, idem, 23.V.2009; M. Pinzari leg.

176. *Coleophora pennella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 1.VII.1989, 1 ♂, idem, 8.VII.1989 (gen. praep. COLE 4, M. Pinzari, G. Baldizzone det.), 1 ♀, idem, 18.VI.2007 (Bldz PG N° 14736, G. Baldizzone), 1 ♀, idem, 19.VI.2007, 1 ♂, idem, 20.VI.2008, 1 ♂, idem, 2.VII.2008, 1 ♀, idem, 5.VII.2008, 1 ♀, idem, 13.VII.2008, 1 ♀, idem, 13.VI.2009, 1 ♀, idem, 3.VII.2010; M. Pinzari leg.

177. *Coleophora therinella* Tengström, 1848

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 31.VII.2009, 1 ♀, idem, 12.VI.2010, 1 ♀, idem, 13.VI.2010 (gen. praep. COLE 20, M. Pinzari), 1 ♂, idem, 20.VIII.2010; M. Pinzari leg.

178. *Coleophora saxicolella* (Duponchel, 1843)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 1.VIII.2005, 1 ♀, idem, 26.VIII.2007, 1 ♀, idem, 14.VIII.2008 (gen. praep. COLE 27, M. Pinzari), 1 ♀, idem, 21.VIII.2009, 1 ♀, idem, 25.VIII.2009 (coll. G. Baldizzone), 1 ♀, idem, 26.VIII.2009 (Bldz PG N° 14734, G. Baldizzone), 1 ♂, idem 31.VIII.2009 (gen. praep. COLE 12, M. Pinzari), 1 ♂, idem 19.VIII.2010 (gen. praep. COLE 19, M. Pinzari), 1 ♂, idem 25.VIII.2010 (gen. praep. COLE 22, M. Pinzari); M. Pinzari leg.

179. *Coleophora versurella* Zeller, 1849

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 3.VIII.2010 (gen. praep. COLE 24, M. Pinzari), M. Pinzari leg.

180. *Coleophora vestianella* (Linnaeus, 1758) (Fig. 137)*

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 18.VIII.2008 (gen. praep. COLE 28, M. Pinzari), 1 ♀, idem, 2.VIII.2009 (Bldz PG N° 14732, G. Baldizzone); M. Pinzari leg.

181. *Coleophora adelogrammella* Zeller, 1849

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 17.IX.2005 (gen. praep. COLE 7, M. Pinzari, G. Baldizzone det.), Manuela Pinzari leg.; 1 ♂, idem, 30.VIII.2008 (Bldz PG N° 14740, G. Baldizzone), M. Pinzari leg.

182. *Coleophora galbulipennella* Zeller, 1838

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 17.VII.2005, 1 ♀, idem, 17.VIII.2006, 1 ♂, idem, 19.VIII.2006, 1 ♂, idem, 30.VIII.2006 (Bldz PG N° 14723, G. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 10-14.VIII.2001, 1 ♂, idem, 5.VII.2003, 1 ♂, idem, 8.VIII.2004, 1 ♂, idem, 30.VI.2007; A. Zilli leg.

191. *Symmoca italica* Gozmány, 1962 (Fig. 141)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 7.VIII.1988 (gen. praep. SYMMO 11, M. Pinzari), 2 ♂♂, idem, 22.VII.1989, 1 ♂, idem, 8.VII.1989 (gen. praep. SYMMO 2, M. Pinzari), 1 ♀, idem, 4.VIII.1989, 1 ♂, idem, 26.VII.2008, 1 ♀, idem, 14.VII.2009, 1 ♀, idem, 14.VII.2010; M. Pinzari leg.

HOLCOPOGONINAE

192. *Holcopogon bubulcellus* (Staudinger, 1859)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 8.VIII.1989 (gen. praep. HOLCO 1, M. Pinzari), 1 ♂, idem, 16.VIII.2001, 1 ♂, idem, 30.VII.2005, 1 ♂, idem, 1.VIII.2005, 1 ♂, idem, 28.VII.2006, 1 ♂, idem, 2.VIII.2007, 1 ♂, idem, 7.VIII.2007, 1 ♂, idem, 31.VIII.2007, 1 ♂, idem, 5.VIII.2008, 3 ♂♂, idem, 14.VIII.2008, 1 ♂, idem, 19.VIII.2008, 1 ♂, idem, 20.VIII.2008, 1 ♂, idem, 22.VIII.2008, 1 ♂, idem, 31.VII.2009, 2 ♂♂, idem, 2.VIII.2009, 1 ♂, idem, 3.VIII.2009, 1 ♀, idem, 9.VIII.2009, 1 ♂, idem, 19.VIII.2009, 1 ♂, idem, 2.VIII.2010; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 3-5.VIII.2001, 1 ♂, idem, 5-9.VIII.2001, 1 ♂, idem, 10-14.VIII.2001, 1 ♂, idem, 12-13.VIII.2001, 1 ♂, idem, 7.VIII.2004; A. Zilli leg.

AMPHISBATIDAE

193. *Pseudatemelia latipennella* (Jäckh, 1959) (Figs 38, 142)*

RECORDS. 1 ♂, **Prata di Laculo**, 1088 m, 30.V.1998 (gen. praep. OEC 14, M. Pinzari); 1 ♂, **Valle Orticara**, 1300 m, 17.VI.2006 (gen. praep. OEC 14, M. Pinzari); M. Pinzari leg.

194. *Pseudatemelia josephinae* (Toll, 1956) (Fig. 143)*

RECORDS. 3 ♂♂ (gen. praep. OEC 30, M. Pinzari), 3 ♀♀, surr. **La Mozza**, 1544 m, 29.VII.2009, M. Di Rao, Manuela Pinzari & M. Pinzari leg.

195. *Pseudatemelia flavifrontella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 13.VI.2009 (gen. praep. OEC 32, M. Pinzari), M. Pinzari leg.

196. *Hypercallia citrinalis* (Scopoli, 1763)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 12.VII.1987, 1 ♂, idem, 29.VI.1990, 1 ♂, idem, 18.VI.1993, 1 ♂, idem, 2.VII.2005, 1 ♂, idem, 26.VI.2010; M. Pinzari leg.

COSMopterigidae

ANTEQUERINAE

197. *Pancalia nodosella* (Bruand, 1851)

RECORDS. 1 ♂, **Monte Pizzaro**, 1476 m, 24.VI.1990 (gen. praep. COSMOP 3, M. Pinzari), M. Pinzari leg.

COSMopteriginae

198. *Eteobalea intermediella* (Riedl, 1966)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 4.VIII.1989 (gen. praep. COSMOP 16, M. Pinzari), 1 ♀, idem, 5.VIII.1991 (gen. praep. COSMOP 13, M. Pinzari), 1 ♀, idem, 6.VIII.2005 (gen. praep. COSMOP 18, M. Pinzari), 1 ♀, idem, 22.VII.2006 (gen. praep. COSMOP 17, M. Pinzari), 1 ♂, idem, 20.VIII.2006 (gen. praep. COSMOP 9, M. Pinzari), 1 ♂, idem, 26.VII.2007 (gen. praep. COSMOP 10, M. Pinzari), 1 ♀, idem, 21.VIII.2007 (gen. praep. COSMOP 14, M. Pinzari), 1 ♂, idem, 29.VIII.2007 (gen. praep. COSMOP 15, M. Pinzari), 1 ♂, idem, 15.VIII.2009 (gen. praep. COSMOP 12, M. Pinzari); M. Pinzari leg.

199. *Eteobalea albiapicella* (Duponchel, 1843) (Fig. 144)*

RECORDS. 1 ♂, 1 ♀ (gen. praep. COSMOP 19, M. Pinzari), **Colle Marcone**, 1121 m,

26.V.2008, 1 ♀, idem, 28.V.2008, 1 ♂, idem, 14.VI.2010 (gen. praep. COSMOP 20, M. Pinzari); M. Pinzari leg.

200. *Pyroderces argyrogrammos* (Zeller, 1847)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 28.VIII.2005 (gen. praep. COSMO 4, M. Pinzari), 1 ♂, idem, 2.VIII.2007, 1 ♂, idem, 7.VIII.2007 (gen. praep. COSMO 6, M. Pinzari), 1 ♀, idem, 22.VIII.2009, 1 ♂, idem, 26.VIII.2009, 1 ♂, 1 ♀, idem, 28.VIII.2009, 1 ♀, idem, 10.VII.2010, 1 ♀, idem, 26.VIII.2009; M. Pinzari leg.

GELECHIIDAE

GELECHIINAE

201. *Aristotelia decurtella* (Hübner, 1813)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 16.VIII.1988 (gen. praep. GELE 28, M. Pinzari), 1 ♂, idem, 4.VIII.1993 (gen. praep. GELE 29, M. Pinzari), 1 ♀, idem, 9.VIII.2005, 1 ♂, idem, 9.VIII.2007, 1 ♂, idem, 12.VIII.2007; M. Pinzari leg.

202. *Aristotelia decoratella* (Staudinger, 1879)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 16.VIII.1988), 1 ♀, idem, 5.VIII.1997, 1 ♂, idem, 2.IX.2006 (gen. praep. GELE 91, M. Pinzari), 1 ♂, idem, 22.VIII.2007, 1 ♀, idem, 30.VIII.2007 (gen. praep. GELE 248, M. Pinzari), 1 ♀, idem, 19.VIII.2008, 1 ♂, idem, 30.VIII.2008 (gen. praep. GELE 358, M. Pinzari), 1 ♀, idem, 30.VII.2009, 1 ♂, idem, 10.VIII.2009, 1 ♀, idem, 13.VIII.2009, 1 ♀, idem, 15.VIII.2009, 1 ♂, idem, 16.VIII.2009 (gen. praep. GELE 396, M. Pinzari), 1 ♂, idem, 21.VIII.2009 (gen. praep. GELE 428, M. Pinzari), 1 ♀, idem, 24.VIII.2009, 1 ♀, idem, 28.VIII.2009, 1 ♂, 1 ♀, idem, 1.VIII.2010, 1 ♀, idem, 5.VIII.2010, 1 ♀, idem, 8.VIII.2010, 1 ♀, idem, 16.VIII.2010, 1 ♀, idem, 18.VIII.2010, 1 ♂, idem, 26.VIII.2010; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 6.VIII.2004, 1 ♂, idem, 11.VIII.2004, 2 ♀♀, idem, 13.VIII.2004; A. Zilli leg.

203. *Isophrictis anthemidella* (Wocke, 1871)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.VI.1989 (gen. praep. GELE 10, M. Pinzari), 1 ♂, idem, 5.VIII.1989 (gen. praep. GELE 108, M. Pinzari), 1 ♂, idem, 20.VI.2007 (gen. praep. GELE 332, M. Pinzari), 1 ♂, idem, 29.VI.2007 (gen. praep. GELE 320, M. Pinzari), 1 ♂, idem, 19.VI.2008, 1 ♂, idem, 20.VI.2008, 1 ♂, idem, 27.VI.2008, 1 ♂, idem, 2.VII.2008, 1 ♂, idem, 7.VII.2009, 1 ♂, idem, 17.VII.2009, 1 ♂, idem, 22.VII.2009, 1 ♂, idem, 27.VII.2009 (BLDZ det. 2009), 1 ♂, idem, 11.VIII.2009, 1 ♂, idem, 26.VI.2010, 1 ♂, idem, 10.VII.2010; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 30.VI.2007, A. Zilli leg.

204. *Metzneria neuropterella* (Zeller, 1839) (Figs 39, 145)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 30.VII.2009 (gen. praep. GELE 467, M. Pinzari), 1 ♀, idem, 22.VIII.2010, 1 ♂, idem, 13.VIII.2010; M. Pinzari leg.

205. *Metzneria lappella* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 5.VIII.1989 (gen. praep. GELE 470, M. Pinzari), 1 ♂, idem, 21.VI.2008, 1 ♀, idem, 26.VI.2008, 1 ♂, idem, 20.VIII.2008 (gen. praep. GELE 338, M. Pinzari); M. Pinzari leg.

206. *Metzneria artificella* (Herrich-Schäffer, 1861) (Fig. 146)*

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 20.VI.2007, 1 ♀, idem, 14.VII.2007 (gen. praep. GELE 306, M. Pinzari), 1 ♀, idem, 25.VII.2007, 1 ♀, idem, 14.VIII.2007 (gen. praep. GELE 469, M. Pinzari), 1 ♀, idem, 20.VI.2008 (gen. praep. GELE 471, M. Pinzari), 2 ♀♀, idem, 26.VI.2008, 1 ♀, idem, 20.VII.2008, 1 ♀, idem, 2.VIII.2008, 1 ♀, idem, 14.VIII.2008 (gen. praep. GELE 357, M. Pinzari), 1 ♂, idem, 14.VI.2010, 1 ♂, idem, 2.VIII.2010, 1 ♀, idem, 25.VIII.2010; M. Pinzari leg.

207. *Metzneria santolinella* (Amsel, 1936) (Figs 40, 147)*

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 2.VII.2008, 4 ♂♂, idem, 13.VI.2009 (gen. praep. GELE 466, GELE 467, M. Pinzari), 1 ♂, idem, 23.V.2010, 1 ♂, idem, 11.VI.2010 (gen. praep. GELE 524, M. Pinzari), 1 ♂, idem, 18.VI.2010, 1 ♂, idem, 26.VI.2010; M. Pinzari leg.

208. *Apodia bifractella* (Duponchel, 1843)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 21.VIII.1989 (gen. praep. GELE 30, M. Pinzari), 1 ♂, idem, 16.VIII.2007, 1 ♂, idem, 25.VIII.2007 (gen. praep. GELE 41, M. Pinzari), 1 ♀, idem, 7.VIII.2010, 1 ♀, idem, 14.VIII.2010; M. Pinzari leg.

209. *Eulamprotes wilkella* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 26.VIII.2005 (gen. praep. GELE 105, M. Pinzari), 1 ♂, idem, 20.VII.2008, 1 ♂, idem, 28.VII.2009 (gen. praep. GELE 530, M. Pinzari), 1 ♂, idem, 10.VIII.2009, 1 ♀, idem, 12.VIII.2009, 1 ♂, 1 ♀, idem, 13.VIII.2009, 1 ♂, idem, 28.VIII.2009, 1 ♂, idem, 29.VIII.2009 (gen. praep. GELE 454, M. Pinzari); M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 20.VIII.2002; A. Zilli leg. 1 ♂, **La Mozza**, 1544 m, 29.VII.2009, 1 ♂, idem, 26.VI.2010, 1 ♂, idem, 9.VII.2010, 1 ♂, idem, 6.VIII.2010, 1 ♂, idem, 10.VIII.2010, 1 ♂, idem, 13.VIII.2010, 2 ♂♂, idem, 16.VIII.2010, 1 ♂, idem, 31.VIII.2010; M. Pinzari leg.

210. *Eulamprotes unicolorella* (Duponchel, 1843)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 7.VIII.2006 (gen. praep. GELE 363, M. Pinzari), 1 ♂, idem, 13.VIII.2007 (gen. praep. GELE 361, M. Pinzari); M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 3.VIII.2003 (gen. praep. GELE 362, M. Pinzari), A. Zilli leg.

211. *Eulamprotes atrella* (Denis & Schiffermüller, 1775) (Fig. 148)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 7.VIII.2006 (gen. praep. GELE 101, M. Pinzari), 1 ♂, idem, 29.VIII.2009 (gen. praep. GELE 496, M. Pinzari); M. Pinzari leg.

212. *Bryotropha terrella* (Denis & Schiffermüller, 1775)

RECORDS. 2 ♂♂, **Colle Marcone**, 1121 m, 1.VIII.2003 (gen. praep. GELE 41, M. Pinzari), 1 ♀, idem, 11.VIII.2003 (gen. praep. GELE 73, M. Pinzari), 1 ♂, idem, 23.VII.2005, 1 ♀, idem, 1.VIII.2005, 1 ♀, idem, 6.VIII.2005, 1 ♂, 1 ♀, idem, 10.VIII.2005, 1 ♂, idem, 7.VIII.2006, 1 ♂, idem 22.VIII.2006 (gen. praep. GELE 89, M. Pinzari), 1 ♀, idem, 25.VII.2007 (gen. praep. GELE 279, M. Pinzari), 1 ♂, idem, 1.VIII.2007, 1 ♂, idem, 2.VIII.2007 (gen. praep. GELE 261, M. Pinzari), 1 ♀, idem, 9.VIII.2007 (gen. praep. 515. *Alucita huebneri* Wallengren, 1859

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 13.IX.1987 (gen. praep. ALU 1, M. Pinzari), 1 ♂, idem, 26.XII.1988 (gen. praep. ALU 5, M. Pinzari), 1 ♂, idem 13.VIII.1993 (gen. praep. ALU 4, M. Pinzari), 1 ♀, idem 2.VIII.1998, 1 ♀, idem, 17.VIII.2006, 1 ♀, idem, 27.VII.2007 (gen. praep. ALU 11, M. Pinzari), 1 ♂, idem, 3.VIII.2007 (gen. praep. ALU 9, M. Pinzari); M. Pinzari leg.; 1 ♀, idem, 28.VII.2005 (gen. praep. ALU 10, M. Pinzari), Manuela Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 6.V.2001, 1 ♀, idem, 7.VIII.2003 (gen. praep. ALU 8, M. Pinzari); A. Zilli leg.

516. *Alucita palodactyla* Zeller, 1847

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 31.VIII.1988 (gen. praep. ALU 3, M. Pinzari), M. Pinzari leg.

PTEROPHOROIDEA

PTEROPHORIDAE

AGDISTINAE

517. *Agdistis heydeni* (Zeller, 1852)

RECORDS. 1 ♂ (gen. praep. PTER 11, M. Pinzari), 2 ♀♀ (gen. praep. PTER 10, M. Pinzari), **Colle Marcone**, 1121 m, 4.VIII.1989, 1 ♂, idem, 22.VII.1989, 1 ♀, idem, 4.VIII.1989, 1

♂, idem, 6.VIII.1991 (gen. praep. PTER 12, M. Pinzari), 1 ♂, idem, 16.VIII.2008, 1 ♂, idem, 22.VII.2009; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 30.VI.2007, A. Zilli leg.

PTEROPHORINAE

518. *Stenoptilia stigmatodactylus* (Zeller, 1852)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 30.VI.2006 (gen. praep. PTER 29, M. Pinzari), 1 ♂, idem, 6.IX.1997 (gen. praep. PTER 5, M. Pinzari), 1 ♂, idem, 16.VIII.2008 (gen. praep. PTER 38, M. Pinzari); M. Pinzari leg.

519. *Stenoptilia aridus* (Zeller, 1847)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 14.VI.1992 (gen. praep. PTER 18, M. Pinzari), 1 ♀, idem, 3.VIII.1993 (gen. praep. PTER 19, M. Pinzari), 1 ♂, idem, 30.VII.2009, 1 ♂, idem, 1.VIII.2009; M. Pinzari leg.

520. *Stenoptilia pelidnodactyla* (Stein, 1837)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 19.VI.2008, 1 ♂, idem, 5.VII.2008, 1 ♂, idem, 11.VI.2010; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 6.VIII.2003 (gen. praep. PTER 31, M. Pinzari), A. Zilli leg. 4 ♂♂, **La Palombara**, 1094 m, 30.V.1993 (gen. praep. PTER 8, M. Pinzari), 25 ♂♂ (gen. praep. PTER 2, PTER 5, M. Pinzari), 17 ♀♀, idem, 5.VI.1993, 1 ♂, idem, 6.VI.1993 (gen. praep. PTER 1, M. Pinzari), 2 ♀♀, idem, 19.VI.1993, 1 ♂, idem, 30.V.2009 (gen. praep. PTER 35, M. Pinzari); M. Pinzari leg.

521. *Stenoptilia coprodactylus* (Stainton, 1851)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 26.VIII.2007 (gen. praep. PTER 24, M. Pinzari), 1 ♀, idem, 29.VIII.2007 (gen. praep. PTER 28, M. Pinzari); M. Pinzari leg.

522. *Cnaemidophorus rhododactyla* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 25.VII.1987, 1 ♂, idem, 29.VII.1987, 1 ♂, idem, 21.VII.1989, 1 ♂, idem, 30.VI.1990, 1 ♀, idem, 30.VII.1991, 1 ♂, idem, 4.VIII.1991, 1 ♂, idem, 3.VII.1993, 1 ♂, idem, 9.VII.1993, 1 ♂, idem, 10.VII.1993, 1 ♀, idem, 1.VII.2006, 1 ♀, idem, 2.VII.2008; M. Pinzari leg. ; 2 ♂♂, idem, 15.VII.2009, M. Di Rao leg.

523. *Oxyptilus parvidactyla* (Haworth, 1811)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.VI.1990, 1 ♂, idem, 30.VI.1990 (gen. praep. PTER 13, M. Pinzari), 1 ♂, idem, 19.VI.1993, 1 ♂, idem, 26.VI.1993, 1 ♂, idem, 2.IX.1994 (gen. praep. PTER 14, M. Pinzari), 1 ♂, idem, 30.V.2009, 1 ♂, idem, 27.VI.2009, 1 ♂, idem, 11.VI.2010, 1 ♂, idem, 13.VI.2010; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 11.VIII.2003, A. Zilli leg.

524. *Crombrugghia distans* (Zeller, 1847)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 4.VIII.1989, 1 ♂, idem, 11.VIII.1989, 1 ♂, idem, 31.VIII.1990, 1 ♂, idem, 2.VIII.1991 (gen. praep. PTER 20, M. Pinzari), 1 ♂, idem, 12.VIII.2009 (gen. praep. PTER 40, M. Pinzari), 1 ♂, idem, 13.VIII.2009, 1 ♂, idem, 20.VIII.2010, 1 ♂, idem, 22.VIII.2010; M. Pinzari leg.

525. *Pterophorus pentadactyla* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 16.VI.1989, 1 ♂, idem, 8.VII.1989, 1 ♂, idem, 29.VII.1990, 1 ♂, idem, 3.VII.1993, 1 ♂, idem, 10.VII.1993; M. Pinzari leg.
SIGHTINGS. **Colle Petruccio**, 1000 m, 14.VII.2007, 12.VII.2008; fide A. Zilli.

526. *Merrifieldia leucodactyla* (Denis & Schiffermüller, 1775)

RECORDS. 2 ♂♂, **Colle Marcone**, 1121 m, 8.VII.1989; 1 ♂, **La Crociata**, 1200 m, 5.VI.1993 (gen. praep. PTER 33, M. Pinzari), 2 ♂♂, 1 ♀, idem, 19.VI.1993; M. Pinzari leg.

527. *Merrifieldia malacodactylus* (Zeller, 1847)

RECORDS. 1 ♂, **Colle Petruccio**, 1000 m, 12.VIII.2003 (gen. praep. PTER 32, M. Pinzari), A. Zilli leg.

528. *Gypsochaeres baptodactylus* (Zeller, 1850)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 24.VI.1989, 1 ♀, idem, 25.VIII.1990, 1 ♀, idem, 29.VIII.1990 (gen. praep. PTER 9, M. Pinzari), 31.VIII.2007, 1 ♂, idem, 1.IX.2007 (gen. praep. PTER 25, M. Pinzari), 1 ♂, idem, 5.IX.2008 (gen. praep. PTER 36, M. Pinzari); M. Pinzari leg.

529. *Oidaematophorus lithodactyla* (Treitschke, 1833)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 18.VIII.2007 (gen. praep. PTER 21, M. Pinzari), M. Pinzari leg.

530. *Emmelina monodactyla* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 14.VIII.1989, 1 ♀, idem, 21.VIII.1989, 1 ♀, idem, 16.X.1989, 1 ♀, idem, 24.III.1990, 1 ♀, idem, 2.XI.1991, 1 ♀, idem, 22.VIII.1993, 1 ♀, idem, 20.XII.2002, 1 ♂, idem, 15.X.2005 (gen. praep. PTER 22, M. Pinzari), 1 ♂, idem, 5.XI.2005 (gen. praep. PTER 30, M. Pinzari), 1 ♂, idem, 20.VI.2008, 1 ♂, idem, 1.X.2008, 1 ♂, idem, 16.XI.2008 (gen. praep. PTER 37, M. Pinzari), 1 ♂, idem, 2.VIII.2009, 1 ♂, idem, 7.VIII.2009, 1 ♂, idem, 31.VIII.2009, 1 ♂, idem, 24.IX.2010 (gen. praep. PTER 39, M. Pinzari); M. Pinzari leg.

THYRIDOIDEA

THYRIDIDAE

531. *Thyris fenestrella* (Scopoli, 1763)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 10.XI.1988; 1 ♂, **Costa della Chiusa**, 1093 m, 11.VI.1999; 1 ♀, **Fonte dei Vitelli**, 849 m, 4.VI.1988; 1 ♂, 4 ♀♀, **La Pineta**, 1000 m, 29.VI.1996, 1 ♂, 6 ♀♀, idem, 30.VI.1996; 1 ♂, **Pian Mattano**, 1000 m, 8.VIII.1995; M. Pinzari leg. 2 ♂♂, 1 ♀, **Vallemare**, 800-1100 m, 15.VI.2000, P. Provera leg.

PYRALOIDEA

PYRALIDAE

GALLERIINAE

532. *Aphomia sociella* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 22.III.1985, 1 ♀, idem, 30.VI.1989, 2 ♂♂, idem, 17.VI.1990, 1 ♀, idem, 16.VII.1994, 1 ♂, idem, 13.VIII.2002, 1 ♂, idem, 2.VIII.2003, 1 ♂, idem, 31.VII.2004, 1 ♂, idem, 4.IX.2004, 1 ♂, idem, 27.VI.2008, 1 ♂, idem, 21.VII.2009; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 15.VIII.2003, 1 ♀, idem, 11.VIII.2004, 1 ♀, idem, 5.VII.2008; A. Zilli leg.

533. *Aphomia zelleri* Joannis, 1932 (Fig. 74)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 11.VIII.2003 (gen. praep. PIRA 64, M. Pinzari), 1 ♂, idem, 25.VIII.2005, 1 ♀, idem, 14.VIII.2007; M. Pinzari leg.

534. *Lamoria anella* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 28.VII.1995, 1 ♀, idem, 8.VIII.2003, 1 ♀, idem, 10.VIII.2003, 1 ♀, idem, 10.VII.2010; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 30.VI.2001, A. Zilli leg.

535. *Achroia grisella* (Fabricius, 1794)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 15.VII.1994, 1 ♀, idem, 9.IX.1994, 1 ♀, idem, 8.VIII.1997, 1 ♀, idem, 14.VIII.2008 (gen. praep. PIRA 141, M. Pinzari), 1 ♀, idem, 10.VIII.2010; M. Pinzari leg.

536. *Galleria mellonella* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 2.VIII.1989, 1 ♀, idem, 2.VIII.1998, 1 ♀, idem,

28.VIII.2009, 1 ♀, idem, 31.VIII.2009; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 11. VIII. 2004, A. Zilli leg.

PYRALINAE

537. *Synaphe punctalis* (Fabricius, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 22.VII.1989, 1 ♂, idem, 8.VIII.1989, 1 ♂, idem, 10.VIII.1989, 1 ♀, idem, 2.VIII.2005, 14 ♂♂, 2 ♀♀, idem, 14.VII.2007, 1 ♂, idem, 3.VIII.2009, 1 ♂, idem, 6.VIII.2009; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 7.VIII.2003, 1 ♂, idem, 9.VIII.2003, 1 ♀, idem, 14.VII.2007; A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 21.VII.2007, fide A. Zilli.

538. *Pyralis regalis* Denis & Schiffermüller, 1775

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 18.VIII.1989, 1 ♂, idem, 25.VIII.1989, 1 ♂, idem, 22.VIII.1991, 1 ♂, idem, 27.VII.1994, 1 ♂, idem, 26.VII.2008, 1 ♀, idem, 2.VIII.2008, 1 ♂, idem, 6.VIII.2008, 1 ♂, idem, 28.VII.2009, 1 ♂, idem, 30.VII.2009, 1 ♂, idem, 31.VII.2009, 1 ♂, idem, 2.VIII.2009, 1 ♂, idem, 6.VIII.2009, 1 ♂, idem, 13.VIII.2009, 1 ♂, idem, 26.VIII.2009, 2 ♀♀, idem, 3.VIII.2010, 1 ♀, idem, 7.VIII.2010, 1 ♀, idem, 19.VIII.2010, 1 ♀, idem, 20.VIII.2010, 1 ♂, idem, 25.VIII.2010; M. Pinzari leg.

539. *Pyralis farinalis* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 5.VIII.1989, 1 ♂, idem, 17.VII.2009, 1 ♀, idem, 22. VII.2010; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 11.VIII.2004, A. Zilli leg.

540. *Aglossa caprealis* (Hübner, 1809)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 19.VII.1993, 1 ♂, idem, 10.VII.2004, 1 ♂, idem, 17.VII.2009, 1 ♂, idem, 19.VII.2009, 1 ♂, idem, 12.VIII.2009, 1 ♂, idem, 31.VII.2010; M. Pinzari leg.

541. *Stemmatophora brunnealis* (Treitschke, 1829)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 11.VIII.1985, 1 ♀, idem, 12.VIII.1985, 1 ♂, idem, 24.VIII.1985, 1 ♂, idem, 8.VIII.1986, 1 ♂, idem, 7.VIII.1988; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 10.VIII.2004, A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 25.VIII.2007, 12.VII.2008; fide A. Zilli.

542. *Hypsopygia costalis* (Fabricius, 1775)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 13.VIII.1989, 1 ♀, idem, 9.VIII.1992, 1 ♀, idem, 25.VIII.1997, 1 ♀, idem, 17.VII.2005, 1 ♀, idem, 22.VII.2010, 1 ♂, 1 ♀, idem, 2.VIII.2010, 1 ♂, idem, 3.VIII.2010, 1 ♂, idem, 20.VIII.2010; M. Pinzari leg.; 1 ♀, idem, 25.VII.2005, 1 ♀, idem, 29.VIII.2009; Manuela Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 30.VI.2007; fide A. Zilli.

543. Hypsopygia incarnatalis (Zeller, 1847)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 11.VIII.2003, M. Pinzari leg.

544. Hypsopygia glaucinalis (Linnaeus, 1758)

RECORDS. 2 ♀♀, **Colle Marcone**, 1121 m, 19.VIII.1989, 1 ♂, idem, 5.VIII.1991, 1 ♀, idem, 12.VIII.1992, 1 ♂, idem, 19.VIII.1999, 1 ♀, idem, 20.VI.2007, 1 ♀, idem, 31.VII.2009; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 8.VIII.2004, 1 ♀, idem, 12.VIII.2004; A. Zilli leg.

545. Endotricha flammealis (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 8.VIII.1987, 1 ♀, idem, 22.VII.1989, 2 ♀♀, idem, 7.VIII.1989, 1 ♀, idem, 14.VIII.1989, 1 ♂, idem, 14.VII.2007, 1 ♂, idem, 30.VIII.2007, 1 ♂, idem, 3.VIII.2008, 1 ♂, idem, 4.VIII.2010; M. Pinzari leg. 2 ♀♀, **Colle Petruccio**, 1000 m, 11.VIII.2004, 1 ♂, idem, 14.VII.2007; A. Zilli leg.

PHYCITINAE

546. Trachonitis cristella (Denis & Schiffermüller, 1775) (Fig. 186)*

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 23.VIII.1997, M. Pinzari leg.

547. Elegia fallax (Staudinger, 1881) (Fig. 187)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 25.VII.1994, 1 ♀, idem, 2.VIII.2007 (gen. praep. PIRA 83, M. Pinzari), 1 ♂, idem, 20.VII.2009, 1 ♀, idem, 2.VIII.2009; M. Pinzari leg.

548. Pempeliella ornatella (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 16.VI.1989, 1 ♂, 1 ♀, idem, 18.VI.2007, 1 ♂, idem, 27.VI.2008, 1 ♂, 1 ♀, idem, 13.VI.2009, 1 ♂, idem, 26.VI.2009, 1 ♀, idem, 22.VII.2009, 1 ♂, idem, 18.VI.2010, 1 ♀, idem, 10.VII.2010; M. RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 12.VII.1987, 1 ♀, idem, 24.VI.1989, 1 ♂, idem, 29.VI.2006, 1 ♂, idem, 30.VI.2007, 2 ♂♂, idem, 24.VII.2007, 1 ♂, idem, 23.VIII.2007; M. Pinzari leg.; 1 ♀, idem, 17.VI.2006, P. Provera leg. 1 ♂, **Colle Petruccio**, 1000 m, 13.VI.1998, 1 ♂, idem, 19-20.VI.1998, 1 ♀, idem, 1.VIII.2002, 1 ♀, idem, 16.VIII.2002, 1 ♂, idem, 6.VIII.2003; A. Zilli leg. 2 ♂♂, surr. **La Mozza**, 1544 m, 2.VII.1988, M. Pinzari & A. Zilli leg.

1093. *Furcula bifida* (Brahm, 1787)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 7.VI.1987, 1 ♀, idem, 8.VIII.1991; M. Pinzari leg.

1094. *Dicranura ulmi* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 2.V.1987, 1 ♀, idem, 7.V.1988, 1 ♂, idem, 20.V.1995, 1 ♀, idem, 8.V.1999, 1 ♂, idem, 21.IV.2008; M. Pinzari leg.

1095. *Notodonta tritophus* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 5.V.1990, 1 ♂, 28.VII.1990, 1 ♀, 13.V.1994, 1 ♂, 23.VIII.1998, 1 ♂, 22.VII.2006, 1 ♂, idem, 26.V.2008; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 2.V.1997, 1 ♂, idem, 24-25.IV.1998; A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 23.VI.2006, 2.VI.2007; fide A. Zilli.

1096. *Notodonta ziczac* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 13.IX.1987, M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 20.VII.1996, 1 ♂, idem, 18.V.2001; A. Zilli leg. 1 ♀, **La Crociata**, 1200 m, 30.VI.1990, M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 2.VI.2007, fide A. Zilli.

1097. *Drymonia dodonaea* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 7.VI.1987; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 22.VI.2002, A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 29.VI.2002; fide A. Zilli.

1098. *Drymonia ruficornis* (Hufnagel, 1766)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 2.V.1987, 2 ♂♂, idem, 24.V.1987, 1 ♀, idem, 1.V.1992, 1 ♀, idem, 16.V.1992, 1 ♀, idem, 22.V.1993, 1 ♂, idem, 20.V.1995; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 26.IV.1997, A. Zilli leg.

1099. *Drymonia querna* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 26.VIII.1985, 1 ♀, idem, 30.VII.1991, 1 ♀, idem, 8.VII.1994, 2 ♂♂, idem, 24.VII.2007, 1 ♂, idem, 8.VIII.2008; M. Pinzari leg.; 1 ♂, idem, 15.VII.2009, M. Di Rao leg. 1 ♀, **Colle Petruccio**, 1000 m, 13.VII.1996, 1 ♂, idem, 10.VIII.1996, 1 ♂, idem, 12-13.VIII.2001; A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 29.VII.2002, 2.VIII.2002, 23.VI.2006, 5.VII.2008, 12.VII.2008; fide A. Zilli.

1100. *Drymonia velitaris* (Hufnagel, 1766)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 5.VIII.1986, 1 ♂, idem, 7.VI.1987, 1 ♂, idem, 12.VII.1987, 1 ♂, idem, 6.VIII.1987, 1 ♂, idem, 25.VIII.1987, 1 ♂, idem, 26.VI.1988, 1 ♂, idem, 22.VII.1988, 1 ♂, idem, 21.VI.1991, 1 ♂, idem, 15.VII.1992, 1 ♂, idem, 7.VII.1993, 1 ♂, idem, 9.VII.1993, 1 ♂, idem, 15.VII.1995, 1 ♂, idem, 29.V.1999, 1 ♂, 1 ♀, idem, 3.VI.2000, 1 ♂, idem, 29.VI.2006, 1 ♂, idem, 2.VII.2008, 1 ♂, idem, 22.V.2009; 1 ♂, idem, 23.V.2009; M. Pinzari leg.

1101. *Pheosia tremula* (Clerck, 1759)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 24.VIII.1987, 1 ♀, idem, 8.VIII.1988, 1 ♀, idem, 11.VIII.1988, 1 ♂, idem, 8.VIII.1989, 1 ♂, idem, 20.VIII.1989, 1 ♀, idem, 27.V.1990, 1 ♀, idem, 22.VIII.1990, 1 ♂, idem, 8.VI.1991, 1 ♂, idem, 8.VIII.1991, 1 ♀, idem, 26.VIII.1997; M. Pinzari leg. 1 ♀, idem, 1.V.2006, Manuela Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 23.VIII.2002, 24.VIII.2002; fide A. Zilli.

1102. *Pterostoma palpina* (Clerck, 1759)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 7.VI.1987, 1 ♂, idem, 16.V.1992; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 20.VII.1996, A. Zilli leg.

1103. *Ptilophora plumigera* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 1.I.1987, 1 ♂, idem, 2.I.1987, 4 ♂♂, idem, 30.XII.2003, 1 ♂, idem, 5.XII.2009, 2 ♀♀, idem, 6.XII.2009; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 9.XII.1996, 1 ♂, idem, 1.I.1999; A. Zilli leg.

1104. *Ptilodon capucina* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 9.V.1992, 1 ♂, idem, 9.VIII.1992, 1 ♂, idem, 15.VII.1993; 3 ♂♂, surr. **La Mozza**, 1544 m, 2.VII.1988; M. Pinzari leg. 1 ♂, 1 ♀, idem, 2.VII.1988, M. Pinzari & A. Zilli leg.

1105. *Ptilodon cucullina* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 3.VIII.1986, 1 ♂, idem, 12.VII.1987, 1 ♂, idem, 16.VII.1992, 1 ♀, idem, 11.VIII.2009; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 12.VII.1996, 1 ♂, idem, 10.VIII.1996; A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 29.VII.2002, 23.VI.2006, 12.VII.2008; fide A. Zilli.

PHALERINAE

1106. *Phalera bucephala* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 20.III.1987, 1 ♀, idem, 22.VII.1988, 2 ♀♀, idem, 23.VI.1990; M. Pinzari leg. 2 ♂♂, **Colle Petruccio**, 1000 m, 1 .IX.1997, 1 ♀, idem, 17-18.VII.1998; A. Zilli leg. 1 ♀, **Valle Orticara**, 1300 m, 17.VI.2006, P. Provera leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 19.V.2007, 15.VII.2007 (larvae), 5.VII.2008 (larvae); fide A. Zilli.

1107. *Peridea anceps* (Goeze, 1781)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 2.V.1987, 1 ♀, idem, 2.VI.1992; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 28.III.1997, 1 ♂, idem, 25.IV.1997; A. Zilli leg. 1 ♀, **Valle Orticara**, 1300 m, 17.VI.2006, P. Provera leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 19.V.2007, 2.VI.2007; fide A. Zilli.

HETEROCAMPINAE

1108. *Stauropus fagi* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 30.VIII.1986, 1 ♂, idem, 7.VI.1987, 1 ♀, idem, 5.VIII.1993; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 21.VII.1996, 1 ♂, idem, 26.IV.1997, 1 ♀, idem, 30.VII.2002; A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 24.VI.2002, 29.VII.2002, 23.VI.2006, 2.VI.2007, 14.VII.2007; fide A. Zilli.

1109. *Harpyia milhauseri* (Fabricius, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 16.VI.1990, 1 ♀, idem, 4.VII.1992; M. Pinzari leg. 1 ♀, **Colle Petruccio**, 1000 m, 6-7.VI.1996, 1 ♂, 1 ♀, idem, 13.VI.1998, 1 ♂, idem, 23.IV.1997; A. Zilli leg. 1 ♂, **Valle Orticara**, 1300 m, 17.VI.2006, P. Provera leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 29.VI.2002, 30.VII.2002, 2.VIII.2002, 15.VIII.2002, 16.VIII.2002, 19.V.2007, 5.VII.2008; fide A. Zilli.

1110. *Spatalia argentina* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.VI.1987, 1 ♂, idem, 11.VI.1988, 1 ♂, idem,

23.VII.1993, 1 ♀, idem, 30.VII.1994, 1 ♂, idem, 1.VII.1995, 2 ♂♂, idem, 5.VIII.1997, 1 ♀, idem, 4.VIII.1999, 1 ♀, idem, 15.VIII.2002, 1 ♀, idem, 2.VIII.2008; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 12.VIII.2004, A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 28.VII.2002, fide A. Zilli.

NOCTUIDAE

ACRONICTINAE

1111. *Acronicta psi* (Linnaeus, 1758)*

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.VI.1987 (gen. praep. NOCT 17, M. Pinzari), 2 ♂♂, idem, 11.VI.1988 (gen. praep. NOCT 18, M. Pinzari), 1 ♀, idem, 6.VIII.1988, 1 ♂, idem, 9.VIII.1988 (gen. praep. NOCT 35, M. Pinzari), 1 ♂, idem, 31.VIII.1988 (gen. praep. NOCT 15, M. Pinzari), 1 ♂, idem, 3.IX.1988 (gen. praep. NOCT 16, M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 21.VII.1996, 1 ♂, idem, 5.VIII.2004; A. Zilli leg. 3 ♂♂, **Monte Gianò**, 1820 m, 23.VIII.2009; 1 ♂, 1 ♀, **Monte Pizzaro**, 1476 m, 13.VIII.1989; 1 ♂, **Valle Orticara**, 1300 m, 16.VI.1990; M. Pinzari leg.

1480. *Setina roscida* (Denis & Schiffermüller, 1775)*

RECORDS. 9 ♂♂, **Colle Lungo**, 1450 m, 27.V.2006; 1 ♂, **Colle Marcone**, 1121 m, 5.VI.1988; 16 ♂♂, 1 ♀, **Colle Orticara**, 1357 m, 9.VII.1989, 43 ♂♂, idem, 16.VII.1989, 13 ♂♂, idem, 16.VI.1990, 1 ♂, idem, 14.VI.1992, 1 ♂, idem, 6.VI.2010; M. Pinzari leg.; 5 ♂♂, idem, 12.VI.1999, A. Zilli leg. 1 ♂, **La Crociata**, 1200 m, 7.VI.1993, M. Pinzari leg. 2 ♂♂, **Li Merchi**, 1543 m, 6.VI.2010, Manuela Pinzari leg. 2 ♂♂, **Monte Pizzaro**, 1476 m, 24.VI.1990; 1 ♂, **Valle Tratturo**, 1455 m, 14.VI.1992; M. Pinzari leg.

SYNTOMINAE

1481. *Amata phegea* (Linnaeus, 1758)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, 30.VI.1988, 1 ♂, idem, 1121 m, 1.VII.1995; 1 ♂, **Costa della Chiusa**, 1093 m, 30.VI.1991; 1 ♂, **Fonte de lu Cupu**, 980 m, 1.VII.1988; 1 ♂, **La Pineta**, 1000 m, 6.VII.1985, 1 ♂, idem, 11.VI.1988, 1 ♀, idem, 23.VI.1990; 1 ♂, **Prata di Cagno**, 1383 m, 16.VIII.1984; 1 ♂, **Prata di Laculo**, 1088 m, 11.VI.1990, 1 ♂, idem, 26.VI.1992; M. Pinzari leg.

SIGHTINGS. **Colle Marcone**, 1121 m, 4.VI.2006; **Li Merchi**, 1540 m, 16.VI.2006; **Tornante Mattano-Malepasso**, 1170 m, 10.VI.2006, 16.VI.2006; fide M. Pinzari. **Colle Petruccio**, 1000 m, 29.VI.2007, 30.VI.2007, 5.VII.2008, 12.VII.2008; fide A. Zilli.

1482. *Amata kruegeri* (Ragusa, 1904)

RECORDS. 1 ♀, **Pozzo dei Corvi**, 1050 m, 17.VI.2001, 1 ♂, idem, 1.VI.2003; 3 ♂♂, 1 ♀, **Prata di Laculo**, 1088 m, 27.VI.1988, 6 ♂♂, 2 ♀♀, idem, 24.VI.1989, 2 ♂♂, idem, 25.VI.1989, 3 ♂♂, idem, 29.VI.1989, 1 ♂, idem, 16.VI.1990, 1 ♂, idem, 17.VI.1990, 4 ♂♂, 3 ♀♀, idem, 24.VI.1990, 7 ♂♂, idem, 29.VI.1991; M. Pinzari leg.; 1 ♀, idem, 17.VII.1998, A. Zilli leg.

1483. *Dysauxes ancilla* (Linnaeus, 1767)

RECORDS. 1 ♀, **Colle Marcone**, 1121 m, idem, 4.VIII.1986, 1 ♂, idem, 2.VIII.1987, 3 ♂♂, 6.VIII.1987, 1 ♂, idem, 7.VIII.1987, 1 ♂, idem, 10.VIII.1987, 1 ♂, idem, 22.VII.1989, 1 ♂, idem, 30.VII.1991, 1 ♂, idem, 9.VII.1993, 1 ♂, idem, 6.VII.1994, 1 ♂, idem 1.VII.2006; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 5.VII.2003, 1 ♂, idem, 10.VIII.2004; A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 15.VIII.2002, 17.VIII.2002, 26.VII.2008; fide A. Zilli.

1484. *Dysauxes famula* (Freyer, 1836)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, VIII.1982, 1 ♂, idem, 6.VIII.1985, 1 ♂, idem, 10.VIII.1985, 1 ♂, idem, 4.VIII.1986, 2 ♂♂, idem, 6.VIII.1987, 2 ♂♂, idem, 8.VIII.1987, 1 ♂, idem, 9.VIII.1987, 5 ♂♂, 1 ♀, idem, 10.VIII.1987, 2 ♀♀, idem, 2.VIII.1988, 1 ♂, idem, 15.VIII.1989, 1 ♂, idem, 28.VII.1990, 2 ♂♂, idem, 31.VII.1990, 1 ♂, idem, 1.VIII.1990, 1 ♂, idem, 2.VIII.1990, 1 ♂, idem, 3.VIII.1990, 1 ♂, idem, 14.VIII.1990, 1 ♂, idem, 9.VIII.1991, 1 ♂, idem, 24.VII.1994, 6 ♂♂, 1 ♀, idem, 3.VIII.1994, 1 ♂, idem, 24.VIII.1996, 1 ♀, idem, 7.VIII.2008, 2 ♀♀, idem, 14.VIII.2008, 2 ♀♀, idem, 20.VIII.2008; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 30.VII.1998, 1 ♂, 1 ♀, idem, 7.VIII.1999, 1 ♂, idem, 9.VIII.1999, 1 ♀, idem, 29.VII.2002, 1 ♂, idem, 27.VIII.2002, 1 ♂, idem, 3.VIII.2004, 1 ♂, idem, 8.VIII.2004, 1 ♀, idem, 10.VIII.2004, 1 ♀, idem, 14.VIII.2004; A. Zilli leg. 1 ♀, **Pozzo dei Corvi**, 1050 m, 3.VIII.2000, M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 2.VIII.2002, 15.VIII.2002, 17.VIII.2002, 23.VIII.2002; fide A. Zilli.

1485. *Dysauxes punctata* (Fabricius, 1781)

RECORDS. 1 ex, **Colle Marcone**, 1121 m, 15.VIII.1994; 5 ♂♂, 1 ♀, **Monte Pizzaro**, 1476 m, 13.VIII.1989, 27 ♂♂, 1 ♀, idem, 18.VIII.1989, 17 ♂♂, 3 ♀♀, idem, 20.VIII.1989; 1 ex, **Pineta (Pozzo)**, 900 m, 13.VIII.1999; M. Pinzari leg.

ARCTIINAE

1486. *Coscinia striata* (Linnaeus, 1758)

RECORDS. 2 ♂♂, **Colle Marcone**, 1121 m, 14.VII.1989, 1 ♀, idem, 24.VI.1990; 1 ♂, idem, 29.VI.1990; 1 ♂, **Costa della Chiusa**, 1093 m, 25.VI.1989; 1 ♂, **Curva Via della Fonte**, 1047, 27.VI.1988; 2 ♂♂, **La Crociata**, 1200 m, 19.VI.1993; 2 ♂♂, **La Pineta**, 1000 m, 1.VII.1989, 1 ♀, idem, 17.VIII.2004; 2 ♂♂, **Pian Mattano**, 1100 m, 4.VII.1993; 1 ♂, **Pozzo dei Corvi**, 1050 m, 27.VI.1999; 1 ♂, **Prata di Laculo**, 1088 m, 10.VII.1988, 1 ♂, idem, 29.VI.1990; M. Pinzari leg. 1 ♂, **Vallemare**, 1100 m, 10.VI.2000; P. Provera leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 5.VII.2008, 12.VII.2008, 6.IX.2008; fide A. Zilli.

1487. *Coscinia cribraria* (Linnaeus, 1758)

RECORDS. 1 ♂, 1 ♀, **Colle Marcone**, 1121 m, 16.VIII.1985, 1 ♂, idem, 29.VI.1987, 2 ♂♂, idem, 8.VIII.1987, 1 ♂, idem, 16.VII.1988, 1 ♀, idem, 27.VIII.1988, 1 ♂, idem, 25.VIII.1989; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 20.VII.1996, 1 ♂, idem, 5.VIII.2004; A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 24.VI.2002, fide A. Zilli.

1488. *Chelis maculosa* (Gerning, 1780)

RECORDS. 2 ♂♂, **Colle Marcone**, 1121 m, 29.VI.1987, 7 ♂♂, idem, 12.VII.1987, 1 ♂, idem, 27.VI.1988; M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 4.VII.2005, fide A. Zilli.

1489. *Watsonarctia deserta* (Bartel, 1902)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 1.VII.1973, 1 ♂, idem, 2.VI.1982, 1 ♂, idem, 13.V.1987, 1 ♂, idem, 3.VI.1988, 1 ♂, idem, 28.V.1989, 1 ♂, idem, 15.VI.1989, 1 ♂, idem, 24.VI.1989, 1 ♂, idem, 29.VI.1989, 1 ♂, idem, 30.VI.1989, 1 ♂, idem, 27.V.1990, 1 ♂, idem, 10.VI.1990, 1 ♂, idem, 21.VI.1991; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 6-7.VI.1996, 1 ♂, idem, 2.V.1997, 1 ♂, idem, 18.V.2001; A. Zilli leg. 1 ♂, **Prata di Laculo**, 1088 m, 23.VI.1990, M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 12.V.2007, 19.V.2007, 2.VI.2007; fide A. Zilli.

1490. *Phragmatobia fuliginosa* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 4.VIII.1985, 1 ♂, idem, 16.VIII.1985, 1 ♂, idem, 13.V.1987, 1 ♂, idem, 18.VII.1987, 1 ♂, idem, 15.VIII.1987, 1 ♂, idem, 17.VIII.1987, 1 ♂, idem, 21.VIII.1987, 1 ♂, idem, 1.IX.1989, 1 ♂, idem, 12.VIII.1990, 1 ♂, idem, 28.VIII.1990, 1 ♂, idem, 30.VII.1994; 1 ♀, **Fonte de lu Cupu**, 980 m, 28.VII.1996; M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 29.VI.2002, 29.VII.2002, 31.VII.2002, 22.VIII.2002, 23.VIII.2002, 5.VII.2008; fide A. Zilli.

1491. *Phragmatobia luctifera* (Denis & Schiffermüller, 1775)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 16.V.1982, 1 ♂, idem, 29.V.1982, 1 ♂, idem, 7.VI.1987, 1 ♂, idem, 3.V.1988, 1 ♂, idem, 6.V.1988, 1 ♂, idem, 13.V.1988, 2 ♂♂, idem, 14.V.1989, 1 ♂, idem, 1.V.1992, 1 ♂, idem, 22.V.1993, 1 ♂, idem, 28.V.1993, 2 ♂♂, idem, 22.V.1994, 1 ♂, idem, 18.V.1996, 1 ♂, idem, 16.V.1998, 1 ♂, idem, 29.V.1999, 1 ♂, idem, 22.V.2009, 2 ♂♂, idem, 23.V.2009; M. Pinzari leg. 2 ♂♂, **Colle Petruccio**, 1000 m, 18.V.2001, A. Zilli leg. 1 ♂, **La Pineta**, 1000 m, 16.V.1992; 1 ♀, **Valle Tratturo**, 1455 m, 24.V.2010; M. Pinzari leg.

1492. *Cymbalophora rivularis* (Ménétriés, 1832)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 22.III.1985, 1 ♂, idem, 7.IX.1986, 1 ♂, idem, 19.VIII.1987, 1 ♂, idem, 22.VIII.1987, 9 ♂♂, idem, 29.VIII.1987, 10 ♂♂, idem, 5.IX.1987, 1 ♂, idem, 8.IX.1993, 1 ♂, idem, 16.VIII.2007; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 4-6.IX.1996, 1 ♂, idem, 9.IX.1996; A. Zilli leg.

1493. *Cymbalophora pudica* (Esper, 1785)

RECORDS. 1 ♂, **Colle Petruccio**, 1000 m, 9.IX.1996, A. Zilli leg.

1494. *Parasemia plantaginis* (Linnaeus, 1758)

RECORDS. 1 ♂, **Vallemare**, 1021 m, 30.VI.1968, M. Pinzari leg.

1495. *Spilosoma lutea* (Hufnagel, 1766)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.VI.1987, 1 ♂, idem, 6.VI.1992, 1 ♂, idem, 28.VI.1992; M. Pinzari leg.

1496. *Diaphora mendica* (Clerck, 1759)

RECORDS. 1 ♂, 1 ♀, **Colle Marcone**, 1121 m, 18.V.1985, 1 ♂, idem, 24.VI.1987, 1 ♂, idem, 25.VI.1988, 1 ♂, idem, 27.VI.1988, 1 ♂, idem, 27.V.1990, 1 ♂, idem, 6.VI.1995, 1 ♂, idem, 14.VI.2008, 1 ♂, idem, 30.V.2009; 2 ♂♂, 1 ♀, **La Pineta**, 1000 m, 16.V.1992; M. Pinzari leg.

1497. *Rhyparia purpurata* (Linnaeus, 1758)

RECORDS. 1 ♂, 1 ♀, **Colle Marcone**, 1121 m, 25.VI.1982, 1 ♂, idem, 6.VI.1986, 1 ♂, idem, 6.VII.1986, 1 ♂, idem, 29.VI.1987, 3 ♂♂, 1 ♀, idem, 12.VII.1987, 1 ♀, idem, 25.VII.1987, 1 ♂, idem, 25.VI.1988, 1 ♂, idem, 10.VII.1988, 1 ♂, idem, 16.VII.1988, 1 ♂, idem, 7.VII.1992, 1 ♀, idem, 28.VI.1999, 1 ♀, idem, 29.VI.2006; M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 4.VII.2005, 23.VI.2006, 12.VII.2008; fide A. Zilli.

1498. *Diacrisia sannio* (Linnaeus, 1758)

RECORDS. 1 ♀, **Casale Manocchio**, 1059 m, 16.VIII.1976; 2 ♂♂, **Colle Marcone**, 1121 m, 20.VI.1987, 1 ♂, idem, 29.VI.1987, 1 ♂, idem, 29.VIII.1987, 1 ♀, idem, 16.VIII.1988, 1 ♂, idem, 22.VIII.1990, 1 ♀, idem, 20.VI.1993, 1 ♀, idem, 28.VIII.2009; M. Pinzari leg.; 1 ♂, **Colle Petruccio**, 1000 m, 19-20.VI.1998, 1 ♀, idem, 9.VI.2001, 1 ♂, idem, 12.VIII.2003, 2 ♂♂, idem, 10.VI.2006; A. Zilli leg. 1 ♂, **La Pineta**, 1000 m, 22.VI.1986; 1 ♀, **Pineta (Pozzo)**, 900 m, 20.VI.2008; M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 25.VIII.2007, fide A. Zilli.

1499. *Hyphoraia testudinaria* (Geoffroy in Fourcroy, 1785)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 29.VI.1987, 1 ♂, idem, 10.VI.1988, 1 ♂, idem, 26.VI.1988, 1 ♂, idem, 6.VI.1992, 1 ♂, idem, 26.VI.1992, 1 ♂, 2 ♀♀, idem, 28.VI.1992, 1 ♂, idem, 14.VI.2008; 1 ♀, **La Pineta**, 1000 m, 22.VI.1986; 1 ♀, **Prata di Laculo**, 1088 m, 29.VI.1990; 1 ♂, **Costa della Chiusa**, 1093 m, 19.VI.2004; M. Pinzari leg.

1500. *Arctia caja* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 2.VIII.1987, 1 ♂, idem, 3.VIII.1987, 1 ♂, idem, 16.VII.1988, 2 ♂♂, idem, 23.VII.1988, 1 ♂, idem, 31.VII.1988, 1 ♂, idem, 9.VIII.1988, 1 ♂, idem, 13.VIII.1988, 1 ♀, idem, 10.VIII.1989, 1 ♀, idem, 8.VIII.1996, 1 ♂, idem, 11.VIII.2007; 1 ♀, **Colle Prato**, 1463 m, 29.VII.2009; M. Pinzari leg.

1501. *Arctia villica* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 12.VI.1982, 1 ♂, idem, 20.VI.1987, 3 ♂♂, idem, 29.VI.1987, 1 ♂, idem, 3.VI.1988, 2 ♂♂, idem, 25.VI.1988, 1 ♂, idem, 24.VI.1989, 1 ♀, idem, 14.VII.1992, 1 ♂, idem, 26.VI.1999; M. Pinzari leg. 1 ♂, **Colle Petruccio**, 1000 m, 24.IV.1997, 1 ♂, idem, 25.IV.1997, 4 ♂♂, idem, 2.V.1997, 1 ♂, idem, 9.V.1998, 1 ♂, idem 19.V.2001; A. Zilli leg. 1 ♀, **Prata di Laculo**, 1088 m, 26.VI.1999, M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 24.VI.2002, 29.VI.2002, 4.VII.2005, 23.VI.2006, 12.V.2007; fide A. Zilli.

1502. *Arctia festiva* (Hufnagel, 1766)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 2.V.1987, 1 ♂, idem, 29.V.1987, 3 ♂♂, idem, 6.V.1988, 3 ♂♂, idem, 7.V.1988, 2 ♂♂, idem, 13.V.1988, 1 ♂, idem, 16.V.1988, 1 ♂, idem, 8.IV.1989, 1 ♂, idem, 7.IV.1990, 1 ♂, idem, 13.IV.1990, 1 ♂, idem, 14.IV.1990, 1 ♂, idem, 30.IV.1990, 1 ♂, idem, 5.V.1990, 1 ♂, idem, 9.V.1992, 1 ♂, idem, 21.V.1993, 2 ♂♂, idem, 4.IV.1994, 1 ♂, idem, 20.V.1995, 1 ♂, idem, 26.V.1995, 3 ♂♂, idem, 18.V.1996, 1 ♂, idem, 30.IV.2008, 1 ♂, idem, 1.V.2008; M. Pinzari leg. 7 ♂♂, **Colle Petruccio**, 1000 m, 27.III.1997, 1 ♂, idem, 28.III.1997, 4 ♂♂, idem, 24.IV.1997, 1 ♂, idem, 25.IV.1997, 1 ♂, idem, 2.V.1997; A. Zilli leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, VI.1997 (larvae), VI.1998 (larvae); fide A. Zilli.

1503. *Callimorpha dominula* (Linnaeus, 1758)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 2.VII.1987, 1 ♂, idem, 22.VII.1988, 1 ♂, idem, 23.VII.1988, 1 ♂, idem, 22.VII.1989, 1 ♂, idem, 10.VIII.1989, 1 ♂, idem, 31.VII.1990, 1 ♂, idem, 10.VIII.1996, 1 ♂, idem, 5.VII.1997, 1 ♂, idem, 11.VIII.1999, 1 ♂, 1 ♀, idem, 19.VII.2009, 1 ♀, idem, 10.VII.2010, 2 ♂♂, idem, 23.VII.2010; M. Pinzari leg.; 1 ♂, idem, 15.VII.2009, M. Di Rao leg. 1 ♀, **Colle Prato**, 1463 m, 29.VII.2009; 1 ♂, **Pian Mattano**, 1100 m, 20.VII.2008; 3 ♂♂, 5 ♀♀, **Valle del Tratturo**, 1394 m, 1.VIII.1984; 1 ♂, **Vallemare**, 1021 m, 13.VII.1968; M. Pinzari leg.

1504. *Euplagia quadripunctaria* (Poda, 1761)

RECORDS. 1 ♂, **Colle Marcone**, 1121 m, 9.VIII.1986, 1 ♀, idem, 6.VIII.1987, 1 ♂, idem, 31.VII.1988, 2 ♂♂, 1 ♀, idem, 2.VIII.1988, 1 ♂, idem, 8.VIII.1988, 1 ♂, idem, 31.VIII.1990, 1 ♀, idem, 22.VIII.1999, 1 ♀, idem, 24.VIII.2002, 1 ♀, idem, 3.VIII.2008, 1 ♀, idem, 4.VIII.2008; 1 ♀, **Vallemare**, 1021 m, 8.VIII.1968; M. Pinzari leg.

SIGHTINGS. **Colle Petruccio**, 1000 m, 15.VIII.2002, 23.VIII.2002; **Valle Entamella**, 1150 m, 13.VIII.2003; fide A. Zilli.

NOTES

In the following section field notes and remarks to most noteworthy species are given. Commenting highlights taxonomical aspects, peculiarities in wing pattern or morphological features, presence or absence of sibling species, unusual ecological or ethological traits, and faunistic and biogeographical updates. As a matter of fact, during the course of the survey in the study area, several species which are new to Central and Peninsular Italy, and some to Italy as a whole, were recorded. With respect to this, information about presence of taxa in various districts of Italy is drawn from the "Checklist delle specie della Fauna Italiana" (Minelli et al., 1995), except when otherwise stated, with the usual categorisations of North, Peninsular Italy, Sicily, and Sardinia, supplemented in case by more recent literature.

13. **Cauchas albiantennella** (Burmman, 1943)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

17. **Incurvaria koernerella** (Zeller, 1839)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

35. **Nemapogon picarella** (Clerck, 1759)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

36. **Neurothaumasia ankerella** (Mann, 1867)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

38. **Tinea murariella** Staudinger, 1859

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

47. **Epichnopteryx plumella** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

53. **Apterona crenulella** (Bruand, 1853)

Apterona crenulella (Bruand, 1853) and *A. helicoidella* (Vallot, 1827) are names representing the bisexual and parthenogenetic forms of the same “morphospecies”, respectively. Actually, names in the old literature were often freely used for the one or the other, and the parthenogenetic form often recorded as *A. crenulella* inasmuch as its f. *helix* (Siebold, 1850) was deemed to represent this, as in fact it is. Accordingly, in the faunistic literature it is hardly feasible to assess what forms were recorded without clear reference to sexes of the specimens. So for Latium, where Dannehl (1927) simply mentioned *A. crenulella* without any further indications. Carlo Prola’s and our extensive surveys in Latium along transects from the Tyrrhenian coast to the Apennine foothills led only to the finding of the parthenogenetic form, namely *helicoidella*, so the discovery in the study area of male specimens is of particular interest as it demonstrates the presence of the bisexual form in the Central Apennines. This situation suggests an interesting ecological evolutionary scenario with possible contact zones in Central Italy to be thoroughly worked out.

70. **Cedestis subfasciella** (Stephens, 1834)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

72. **Prays fraxinella** (Bjerkander, 1784)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

77. **Ypsolopha lucella** (Fabricius, 1775)

So far recorded in Italy from the North and dubiously from Sicily, the species is new to Central and Peninsular Italy.

79. **Ypsolopha sylvella** (Linnaeus, 1767)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

81. **Ypsolopha ustella** (Clerck, 1759)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

90. **Luquetia lobella** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

91. **Agonopterix thapsiella** (Zeller, 1847)

So far recorded in Italy from the North, Sicily and Sardinia, the species is new to Central and Peninsular Italy.

94. **Agonopterix scopariella** (Heinemann, 1870)

So far recorded in Italy from the North, Sicily and Sardinia, the species is new to Central and Peninsular Italy.

95. **Agonopterix arenella** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

96. **Agonopterix propinquella** (Treitschke, 1835)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

97. **Agonopteryx silerella** (Stainton, 1865)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

98. **Agonopterix alstromeriana** (Clerck, 1759)

So far recorded in Italy from the North, Sicily and Sardinia, the species is new to Central and Peninsular Italy.

100. **Agonopterix conterminella** (Zeller, 1839)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

101. **Agonopterix heracliana** (Linnaeus, 1758)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

103. **Agonopterix cnicella** (Treitschke, 1832)

So far recorded in Italy from the North, Sicily and Sardinia, the species is new to Central and Peninsular Italy.

104. **Agonopterix selini** (Heinemann, 1870)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

107. **Agonopterix liturosa** (Haworth, 1811)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

109. **Agonopterix daronicella** (Wocke, 1849)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

110. **Depressaria absynthiella** Herrich-Schäffer, 1865

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

112. **Depressaria chaerophylli** Zeller, 1839

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

114. **Depressaria libanotidella** Schläger, 1849

So far recorded in Italy from the North, Sicily and Sardinia, the species is new to Central and Peninsular Italy.

115. **Depressaria zelleri** Staudinger, 1879

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

118. **Depressaria pulcherrimella** Stainton, 1849

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

120. **Depressaria albipunctella** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

121. **Depressaria ululana** Rössler, 1866

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

122. **Depressaria discipunctella** Herrich-Schäffer, 1854

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

123. **Stephensia abbreviatella** (Stainton, 1851)

New to Italy, this species was so far recorded from Austria, Poland, Czech Republic, Slovakia, Romania, former Yugoslavia and Turkey (Nielsen & Traugott-Olsen, 1978; Traugott-Olsen, 1995; Karsholt & Razowski, 2010).

128. **Blastodacna atra** (Haworth, 1828)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

129. **Spuleria flavicaput** (Haworth, 1828)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

130. **Haplochrois albanica** (Rebel & Zerny, 1932)

New to Italy, it was previously known from Austria, Slovakia, Hungary, Albania (Karsholt & Razowski, 1996), and recently generically recorded as from Central Europe also (Koster & Sinev, 2003).

136. **Diurnea lipsiella** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

137. **Schiffermuelleria schaefferella** (Linnaeus, 1758)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

139. **Hofmannophila pseudospretella** (Stainton, 1849)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

140. **Borkhausenia fuscescens** (Haworth, 1828)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

141. **Herrichia excelsella** Staudinger, 1871

So far recorded in Italy from Sicily, the species is new to the Italian mainland.

142. **Kasyniana diminutella** (Rebel, 1931)

Recently recorded from Italy and Sicily by Tokar et al. (2005).

143. **Crassa tinctella** (Hübner, 1796)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

144. **Crassa unitella** (Hübner, 1796)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

147. **Harpella forficella** (Scopoli, 1763)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

149. **Pleurota pungitiella** Herrich-Schäffer, 1852

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

160. **Coleophora trifariella** Zeller, 1849

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

163. **Coleophora rectilineella** Fischer v. Röslerstamm, 1843

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

166. **Coleophora serpylletorum** E. Hering, 1889

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

167. **Coleophora dignella** Toll, 1961

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

168. **Coleophora flaviella** Mann, 1857

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

171. **Coleophora bilineella** Herrich-Schäffer, 1855

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

180. **Coleophora vestianella** (Linnaeus, 1758)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

183. **Coleophora thymi** M. Hering, 1942

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

184. **Coleophora trochilella** (Duponchel, 1843)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

185. ***Coleophora adpersella*** Benander, 1939

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

193. ***Pseudatemelia latipennella*** (Jäckh, 1959)

So far recorded in Italy from Piedmont (Bassi, 1998), the species is new to Central and Peninsular Italy.

194. ***Pseudatemelia josephinae*** (Toll, 1956)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

199. ***Eteobalea albiapicella*** (Duponchel, 1843)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

204. ***Metzneria neuropterella*** (Zeller, 1839)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

206. ***Metzneria artificella*** (Herrich-Schäffer, 1861)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

207. ***Metzneria santolinella*** (Amsel, 1936)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

211. ***Eulamprotes atrella*** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

213. ***Bryotropha desertella*** (Douglas, 1850)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

226. **Teleiodes italica** Huemer, 1992

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

229. **Carpatolechia fugacella** (Zeller, 1839)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

230. **Carpatolechia fugitivella** (Zeller, 1839)

So far recorded in Italy from the North and dubiously from Sardinia, the species is new to Central and Peninsular Italy.

233. **Altenia scriptella** (Hübner, 1796)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

235. **Gelechia sestertiella** Herrich-Schäffer, 1854

The species is not mentioned for the Italian fauna by all major lists dealing with the family Gelechiidae, including Huemer & Karsholt (1999), but it has recently been included as from the Italian mainland in “Fauna Europaea” (Karsholt & Nieuwerkerken, 2010).

236. **Gelechia mediterranea** Huemer, 1991

So far recorded in Italy from Sardinia, the species is new to Central and Peninsular Italy.

237. **Psoricoptera gibbosella** (Zeller, 1839)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

238. **Mirificarma maculatella** (Hübner, 1796)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

240. **Mirificarma cytisella** (Treitschke, 1833)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

243. **Filatima spurcella** (Duponchel, 1843)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

244. **Neofriseria peliella** (Treitschke, 1835)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

245. **Neofriseria singula** (Staudinger, 1876)

So far recorded in Italy from Sicily and Sardinia, the species is new to the Italian mainland.

248. **Scrobipalpa amseli** Povolny, 1966

New to Italy, this species was so far known only from the French Alps (Povolny, 2002).

251. **Klimeschiopsis kiningerella** (Duponchel, 1843)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

252. **Caryocolum tischeriella** (Zeller, 1839)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

253. **Caryocolum alsinella** (Zeller, 1868)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

257. **Caryocolum cauligenella** (Schmid, 1863)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

259. **Caryocolum leucothoracellum** (Klimesch, 1953)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

260. **Caryocolum schleichi** (Christoph, 1872)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

261. **Caryocolum marmorea** (Haworth, 1828)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

265. **Caryocolum tricolorella** (Haworth, 1812)

Widespread in Europe but firstly recorded here from Italy.

267. **Caryocolum moehringiae** (Klimesch, 1954)

Recently generically recorded from Italy by Elsner et al. (1999).

268. **Caryocolum kroesmanniella** (Herrich-Schäffer, 1854)

New to Italy, this species was so far known from Great Britain across France, Central Europe and Austria to the European Russia (Huemer, 1988).

269. **Pogochaetia solitaria** Staudinger, 1879

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

285. **Nothris lemniscella** (Zeller, 1839)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

SESIIDAE

Most news on the Sesiidae from the study area were already given in a previous article (Pinzari & Prola, 2003).

TORTRICIDAE

Most news on the Tortricidae from the study area were already given in a previous article (Pinzari et al., 2006).

340. **Phtheochroa sodaliana** (Haworth, 1811)

So far recorded in Italy only from Trentino-Alto Adige (Trematerra, 2003), the species is new to Central and Peninsular Italy.

342. **Cochylimorpha meridiana** (Staudinger, 1859)

So far recorded in Italy from Trentino-Alto Adige (Trematerra, 2003), the species is new to Central and Peninsular Italy.

343. **Cochylimorpha perfusana** (Guenée, 1845)

Recorded in Italy from most regions of the alpine arch (Trematerra, 2003), the species is new to Central and Peninsular Italy.

345. **Gynnidomorpha luridana** (Gregson, 1870)

So far recorded in Italy from Veneto (Huemer & Morandini, 2008), the species is new to Central and Peninsular Italy.

381. **Archicnephasia hartigi** Razowski, 1983

Endemic to Italy, from where it was only known to occur in the South, actually Molise, Basilicata and Calabria (Trematerra, 2003), this species is firstly recorded here from Central Italy.

437. **Epinotia pusillana** (Peyerimhoff, 1863)

So far recorded in Italy from Piedmont (Trematerra, 2004), the species is new to Central and Peninsular Italy.

445. **Eucosma cumulana** (Guenée, 1845)

Widespread from Spain across Southern and South-Central Europe to the Danube area and the Balkan Peninsula, this species was so far unrecorded from Italy; also known from Turkmenia (Razowski, 2003). It is worth noting that the outline of valva in specimens from the study area more closely matches that given by Chambon (1999) than that by Razowski (2003).

447. **Eucosma albuneana** (Zeller, 1847)

So far recorded in Italy from Emilia Romagna, Sicily and Sardinia (Trematerra, 2003), the species is new to Central and Peninsular Italy.

449. **Eucosma flavispecula** Kuznetsov, 1964

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

465. **Corticivora piniana** (Herrich-Schäffer, 1851)

So far recorded in Italy from Trentino-Alto Adige (Trematerra, 2003), the species is new to Central and Peninsular Italy.

487. **Cydia pyrivora** (Danilevsky, 1947)

So far recorded in Italy from Trentino-Alto Adige, Sicily and Sardinia (Trematerra, 2003), the species is new to Central and Peninsular Italy.

490. **Cydia amplana** (Hübner, 1799)

Karisch & Pinzari (2010) showed that two species were intermingled under the name of *C. amplana* and resurrected the name *C. molybdana* (Constant, 1884) for the second, long overlooked taxon. The two species can be easily recognised by features of the genitalia and show a substantially parapatric distribution, with *C. amplana* essentially distributed in Continental Europe and mountain areas of Southern Europe and Asia Minor, and *C. molybdana* mostly occurring in lowland and coastal areas of the Central and Eastern Mediterranean. In the Italian Peninsula both species are present, with *C. molybdana* occurring in the mediterranean belt and *C. amplana* in inner mountain zones.

495. **Pammene herrichiana** (Heinemann, 1854)

New to Italy, this species, so far known from England, Denmark, Germany, Czech Republic and Ukraine, was recently recognised as distinct from *P. fasciana* (Linnaeus, 1761) (cf. Bidzilya & Budashkin, 2009).

499. **Pammene regiana** (Zeller, 1849)

So far recorded in Italy from the North and South (Trematerra, 2003), the species is new to Central Italy.

500. **Pammene aurita** Razowski, 1991

So far recorded in Italy from Piedmont, Lombardia and Trentino-Alto Adige in the North, and Campania and Basilicata in the South (Trematerra, 2003), the species is new to Central Italy.

511. **Epermenia ochreomaculellus** (Millière, 1854)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

533. **Aphomia zelleri** Joannis, 1932

So far recorded in Italy from the North, this widely distributed Palaearctic species, limitedly occurring also in the Oriental Tropics (Ceylon) (Slamka, 2006), is new to Central and Peninsular Italy. Of this species we do also have records from other localities in Central Italy, namely Latium: Focene (RM), Anticoli Corrado (RM) and Cittaducale (RI). The lack of records from the Italian Peninsula is probably ascribable to confusion with *Lamoria anella* (Denis & Schiffermüller, 1775), from which *A. zelleri* may be easily distinguished by the absence of vein M_2 in the hindwing.

546. **Trachonitis cristella** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North, this species, of which we do also have records from Umbria: Narni (TR); Latium: Praton del Vivaro (RM) and Cittaducale (RI), is new to Central and Peninsular Italy.

547. **Elegia fallax** (Staudinger, 1881)

So far recorded in Italy from the North and Sicily, this species, of which we do also have records from Umbria: San Faustino (TR), Narni (TR) and Latium: Castelporziano (RM), is new to Central and Peninsular Italy.

549. **Delplanqueia dilutella** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North, Sicily and Sardinia, this is a very common species in Central Italy albeit unrecorded from the Italian Peninsula yet. We do also have records from Umbria: San Faustino (TR), Narni (TR) and Latium: Cittaducale (RI).

551. **Sciota imperialella** (Ragonot, 1887)

New to Italy. The occurrence of this species in Central Italy is of great bi-

ogeographical relevance, as it represents a xeromontane element with eastern mediterranean distribution. Originally described from the Caucasus (Ragonot, 1887), the species has so far been recorded only from Greece and Macedonia (Karsholt & Nieukerken, 2010).

553. **Selagia spadicella** (Hübner, 1796)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

565. **Acrobasis repandana** (Fabricius, 1798)

So far recorded in Italy from the North, South (Mt Pollino; Parenti, 2000) and Sardinia, the species is new to Central Italy.

566. **Acrobasis advenella** (Zincken, 1818)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

568. **Acrobasis legatea** (Haworth, 1811)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

573. **Acrobasis obtusella** (Hübner, 1796)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

578. **Megasis rippertella** (Zeller, 1839)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy. It is a montane species known by us in Central Italy also for the localities of Abruzzi: Mt Sirente (AQ), Gioia Vecchio (AQ), Gran Sasso (AQ), Fonte Vetica (AQ), Piano delle Cinquemiglia (AQ), Rivisondoli (AQ), Palena (CH), Stazione di Palena (CH) and Latium: Corvaro (RI). The species is very similar in habitus to *Seeboldia korgosella* Ragonot, 1887, for the distinction from which see under this species here below.

579. **Seeboldia korgosella** Ragonot, 1887

A montane species with apparently disjunct distribution between the

Western and Eastern Mediterranean which is firstly recorded here from Italy. On this respect it is worth mentioning also the finding of another specimen in the Abruzzi (1 ♂, Gran Sasso, San Pietro (AQ), 1200m, 21.III.1992, A. Zilli leg.). Interestingly, specimens from Central Italy are in full agreement with those of the Western Mediterranean ssp. *occidentella* Zerny, 1927, occurring in Central Spain, French Alps and recorded also from Tunisia (Roesler, 1973). The Eastern ssp. *korgosella* Ragonot, 1887, with disjunct distribution between Albania, Southern Urals and Central Asia, is characterised by paler individuals with less contrasted pattern. The moths are on the wings very early in the season, and this fact, coupled with their great superficial resemblance with *Megasis rippertella* (Zeller, 1839), probably explains why this species had long remained unrecorded from Italy. In addition to structural characters of the genitalia, *S. korgosella* may be easily distinguished from *M. rippertella* by the structure of the male antenna, weakly pectinated instead of filiform, and the trend of the postmedial line of forewing, with a small indentation between M₁-M₂.

580. **Asartodes zapateri** (Ragonot, 1882)

New to Italy and previously recorded only from Central Spain, French Alps and, with ssp. *firusella* Amsel, 1961, from Iran. The genitalia of the two specimens recorded by us fully agree with those illustrated for this species by Leraut & Luquet (1991).

581. **Euzopherodes charlottae** (Rebel, 1914)

New to Central Italy, this species had only recently been recorded from Italy in Emilia Romagna (Fiumi & Flamigni, 2002).

585. **Homoeosoma inustella** Ragonot, 1884

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

595. **Scoparia ganevi** Leraut, 1985

Full information on this species, new to Italy, is being given by Zilli & Pavesi (in press).

597. **Scoparia basistrigalis** Knaggs, 1866

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

599. **Eudonia lacustrata** (Panzer, 1804)

So far recorded in Italy from the North, Sicily and Sardinia, the species is new to Central and Peninsular Italy.

600. **Eudonia laetella** (Zeller, 1846)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

601. **Eudonia delunella** (Stainton, 1849)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy.

610. **Agriphila selasella** (Hübner, 1813)

So far recorded in Italy from the North, Sicily and Sardinia, this species, of which we do also have a record from the Abruzzi: Gola di Luppa (AQ), is new to Central and Peninsular Italy. The species is greatly similar to the exceedingly common *A. tristella* (Denis & Schiffermüller, 1775), from which it may be distinguished by the shorter and better marked white streak of forewing, and above all by the rounded frons, which in *tristella* is neatly pointed. *Agriphila deliella* (Hübner, 1813) is another similar species with pointed frons, but it has weakly pectinated antennae in the male sex.

612. **Catoptria permutatellus** (Herrich-Schäffer, 1848)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

627. **Cynaeda dentalis** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North, Sicily and Sardinia, the species is new to Central and Peninsular Italy.

629. **Atralata albofascialis** (Treitschke, 1829)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

630. **Eurrhysis pollinalis** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North and Sicily, the species is new to

Central and Peninsular Italy. Of this species we do also have records from other localities in Central Italy, namely Abruzzi: Castel del Monte (AQ), Gioia Vecchio (AQ) and Latium: Filetino (FR). *Eurrhysis pollinalis* and *E. gutturalis* (Herrich-Schäffer, 1848) are two closely resembling species, none of which were previously recorded from Peninsular Italy. The most evident diagnostic character in habitus between them is represented by a small median yellowish streak crossing the basal field in *pollinalis*.

632. *Evergestis infirmalis* (Staudinger, 1871)

New to Italy and a record of particular biogeographic interest inasmuch as the species was so far known only from Southeastern Europe and Eastern Mediterranean, precisely Greece, European Russia, Turkey and Syria (Goater et al., 2005). Superficially similar to *Evergestis caesialis* (Herrich-Schäffer, 1849), *E. infirmalis* may be distinguished by the narrower forewings, less mottled pale and dark ground colour of forewing, darker discal spot of the forewing and features of the male and female genitalia.

633. *Evergestis umbrosalis* (Fischer v. Röslerstamm, 1842)

Dubiously recorded in Italy from Sardinia (Speidel & Ganev, 1996), this species is new at least to mainland Italy. The discovery of this species in the Italian Peninsula is of great biogeographic relevance, as this circumstance shows its distribution to be more continuous than previously known. In fact, *E. umbrosalis* was so far deemed to show a widely disjunct distribution in the Mediterranean, being recorded from Spain, Greece, Ukraine, European Russia, Turkey and the Caucasian Region (Speidel & Ganev, 1996; Goater et al., 2005).

642. *Udea nebulalis* (Hübner, 1796)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

643. *Udea prunalis* (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

644. *Udea olivalis* (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

645. **Paracorsia repandalis** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North and Sardinia, the species is new to Central and Peninsular Italy. Of this species we do also have records from other localities in Central Italy, namely Umbria: Narni (TR); Latium: Cittaducale (RI), Arcinazzo Romano (RM), Pratica di Mare (RM), Pratoni del Vivaro (RM) and Roma (RM).

646. **Loxostege manualis** (Geyer, 1832)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

647. **Ecpyrrhorhoe rubiginalis** (Hübner, 1796)

So far recorded in Italy from the North, Sicily and Sardinia, this species, of which we do also have records from Umbria: San Faustino (TR); Latium: Cittaducale (RI) and Nemi (RM), is new to Central and Peninsular Italy.

648. **Ecpyrrhorhoe diffusalis** (Guenée, 1854)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

651. **Pyrausta castalis** Treitschke, 1829

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

655. **Pyrausta ostrinalis** (Hübner, 1796)

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy.

658. **Pyrausta coracinalis** Leraut, 1982

So far recorded in Italy from the North, the species is new to Central and Peninsular Italy. Of this species we do also have records from other localities in Peninsular Italy, namely Abruzzi: Rigopiano (PE), Serra Sant'Antonio (AQ); Latium: Colli Albani (RM), Filettino (FR) and Basilicata: Mt Vulture (PZ).

663. **Anania lancealis** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North, this species, of which we do also

have records from Latium: Monteleone Sabino (RI), Manziana (RM), Fregene (RM) and Lago di Caprolace (LT), is new to Central and Peninsular Italy.

664. **Anania crocealis** (Hübner, 1796)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy. Of this species we do also have records from other localities in Peninsular Italy, namely Umbria: San Faustino (TR); Latium: Manziana (RM), Capocotta (RM) and Apulia: San Cataldo (LE).

671. **Mecyna lutealis** (Duponchel, 1833)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

672. **Mecyna trinalis** (Denis & Schiffermüller, 1775)

So far recorded in Italy from the North and Sicily, this species, of which we do also have records from Umbria: Mt Peglia (TR) and Latium: Cittaducale (RI), is new to Central and Peninsular Italy.

678. **Metasia carnealis** (Treitschke, 1829)

So far recorded in Italy from the North and Sicily, the species is new to Central and Peninsular Italy.

681. **Poecilocampa populi** (Linnaeus, 1758) and

682. **Poecilocampa alpina** (Frey & Wulschlegel, 1874)

The systematic boundaries of taxa of the genus *Poecilocampa* Stephens, 1828 have dramatically been changed by Leraut (2006), who raised again *canensis* (Millière, 1875) to species status and downgraded *alpina* to subspecies of *populi*, thus partly reinstating the situation prior to Freina & Witt (1987). This has some rationale, particularly regarding the biogeographic congruence of populations from the South-Western Alps down the Apennine Peninsula and Sicily (*canensis*), but appears to be weak concerning the relationships between *populi* and *alpina*. The issue is worth of deeper investigation with the aid of genetical analyses, also because the populations of “*canensis*” from the Italian Peninsula themselves somewhat undergo differentiation between lowland and montane ones. In the absence of a conclusive clarification, we provisionally refrain from accepting the arrangement proposed by Leraut (2006) and maintain that present in Karsholt & Nieukerken (2010), in which *canensis* is placed as a subspecies of *alpina*.

Poecilocampa alpina canensis occurs in Central Italy in two phenotypically quite differentiated forms, a darker black coloured one with sharply defined white distal field of forewing, prevailing in western lowlands and late flying during the season (mid December-early January), which had been noted as ssp. *romana* Hartig, 1968, and a paler greyer one with somewhat more variegated grey distal field. The latter, better corresponding with nominotypical *canensis*, prevails in montane areas and ought to be earlier on the wing (end October-early December). In the study area specimens of the second form are far the most abundant, but a few transitional ones toward the first were also collected, thus confirming that the status of *romana* as of a distinct subspecies is not justified. Furthermore, the regular surveys all over the season revealed that the montane populations have a longer flight period than suspected, which may extend into early January as well.

689. **Malacosoma franconica** (Denis & Schiffermüller, 1775)

In Central Italy this species was seemingly much commoner and widespread in the past, whereas the study area and that of Monti della Tolfa are the only known areas where it currently appears to regularly occur.

696. **Endromis versicolora** (Linnaeus, 1758)

All evidence indicates that the hostplant of this species in the study area, and likely the whole Central Apennines, is the Hazelnut (*Corylus avellana* L.). As a matter of fact, larvae hatched from a female collected in the wild and presented with a variety of broad-leaved plants occurring in the area and Birch (*Betula pendula* Roth.), the most typical hostplant of *E. versicolora* albeit not native in the study area, clearly refused the latter and only accepted Hazelnut. In all recording sites of *E. versicolora* in Central Italy the Hazelnut is present.

700. **Marumba quercus** (Denis & Schiffermüller, 1775)

Characteristic of thermophilic oakwoods, in the collecting site of Colle Petruccio this species is probably is at its upper altitudinal limit in Central Italy.

706. **Sphinx ligustri** (Linnaeus, 1758)

Interestingly, in Central Italy this is a generally rare species settled in mediterranean-submediterranean forests at low altitude, thus contrasting with its more mesophyllous attitude shown in the Alpine region and Central Europe. The singleton recorded in Colle Marcone is thus quite unusual as regards the altitude of the collecting site in Central Italy, though it equates other montane records in the nearby Monti Sibillini accounted by Teobaldelli (1976).

712. **Hyles vespertilio** (Esper, 1780)

This species has so far not been recorded further south of the massifs of Monti Reatini, M. Cagno and Gran Sasso in Italy, where it is fairly frequent in the proper season.

718. **Carcharodus lavatherae** (Esper, 1783)

Nothing but a few records of this species are known from Central Italy. Despite the intensive surveys in the study area, also here its occurrence is markedly scarce and uneven over the years.

720. **Spialia sertorius** (Hoffmannsegg, 1804)

It was long assumed that *S. sertorius* and *S. orbifer* (Hübner, 1823) are two essentially parapatric species, with the latter occurring east of mainland Italy and in Sicily (De Jong, 1974). The two taxa are said of being distinguishable by the ground colour of the hindwing underside, reddish ochre in *sertorius* and dull greenish brown in *orbifer*, and very subtle features of the male genitalia, namely the outline of the gnathos and the relevant length of the arms of a crest on the inner side of valva. Interestingly, in the study area we surveyed specimens clearly ascribable to both of the colour forms, but in the genitalia no unequivocal attribution to one or the other could be done. As a matter of fact, De Jong (1974) himself pointed out the remarkable variability in the features of the genitalia which were assumed to be diagnostic. This circumstance and the known presence in the study area of several species of transadriatic origin are suggestive of the presence of somewhat intermediate populations of *Spialia* Swinhoe, 1912 and call for further studies on this topic.

728. **Pyrgus bellieri** (Oberthür, 1910)

Populations of *P. bellieri* from the Italian Peninsula are considered to belong to ssp. *picensis* (Verity, 1920), to which Balletto et al. (2006) grant species status.

735. **Zerynthia cassandra** (Geyer, 1828)

Dapporto (2009) thoroughly pointed out that the populations from the Italian Peninsula formerly ascribed to *Zerynthia polyxena* (Denis & Schiffermüller, 1775) have to be distinguished as *Z. cassandra* (Geyer, 1828), standing as a species on its own.

760. **Thecla betulae** (Linnaeus, 1758)

The study area is one of the best sites for this fairly scarce species in Central Italy. An account on its ecoethology in the site has been given by Pinzari (1984).

768. **Cacyreus marshalli** Butler, 1898

Records of this allochthonous species in the study area are obviously due to accidental introduction following import of cultivated *Pelargonium* spp.

777. **Phengaris alcon** (Denis & Schiffermüller, 1775)

Populations from the Italian Peninsula have usually been referred to *Phengaris rebeli* (Hirsche, 1904), but this name is no further considered to represent a valid species, rather it depicts the xerophylous ecotype of *P. alcon* (Denis & Schiffermüller, 1775) (Berezki et al., 2005; Árnayas et al., 2006).

790. **Polyommatus dolus** (Hübner, 1823)

Populations of *P. dolus* from the Italian Peninsula are considered to belong to ssp. *virgilius* (Oberthür, 1910), to which Balletto et al. (2006) grant species status.

800. **Brenthis hecate** (Denis & Schiffermüller, 1775)

Markedly scarce in Central Italy, its presence in the study area was already recorded by Racheli (in Prola et al., 1978) as from “Vallemare”.

810. **Euphydryas aurinia** (Rottemburg, 1775)

Karsholt & Nieukerken (2010) do not grant the taxon *provincialis* (Boisduval, 1828), to which the populations from the Italian Peninsula are ascribable, with species status, contrary to the views of some authors (e.g. Balletto et al., 2006). This decision has bearing on criteria for selection of sites of community importance, as solely *E. aurinia* is mentioned in the “Bern Convention (1979) (Annexe II)” and “Habitat Directive 92/43/CEE (D.P.R. 357/97 (Annexe II and IV)”. The species is everywhere fairly common in the study area.

812. **Melitaea phoebe** (Denis & Schiffermüller, 1775)

No specimens of the closely resembling sibling species *Melitaea telona* Fruhstorfer, 1908, very local in the Central Apennines, could be found.

813. **Melitaea trivia** (Denis & Schiffermüller, 1775)

The territorial behaviour of this species was thoroughly worked out in the study area and already accounted on by Pinzari (2000).

815. **Melitaea diamina** (Lang, 1789)

Only a singleton of this species characteristic of humid meadows, but the record suggests the existence of a small colony somewhere in the vicinity of the study area yet to be discovered.

818. **Limenitis camilla** (Linnaeus, 1764)

Our first record of this species in the study area occurred in 1997, when a sudden positive demographic fluctuation and increase of the sightings of the species developed in Central Italy, including nearby areas such as Valle Scura in the Reatini Mts.

820. **Apatura ilia** (Denis & Schiffermüller, 1775)

We deem worth of mention here the record of this typical inhabitant of riparian woods, by courtesy of M. Lucarelli. The Velino gorges exactly limit the study area to the west. The species, always very localised and scarce in Central Italy, was so far unrecorded from inner Latium.

825. **Coenonympha dorus** (Esper, 1782)

Reputedly known as one of the rarest butterfly species in the Central Apennines, the study area and the massif of Majella (Zahm, 1999) turned out as the two zones with most regular presence of the species. Unfortunately, in the surroundings of Mt Cagno we must notice a decline of the sightings of this species over the years.

836. **Hipparchia fagi** (Scopoli, 1763)

See note below under next species.

837. **Hipparchia hermione** (Linnaeus, 1764) (= *alcyone* nec Denis & Schiffermüller, 1775)

Kudrna & Belicek (2005) clearly and conclusively reinstated the correct name for the species dealt with as *H. hermione* (Linnaeus, 1764).

Populations of *H. hermione* from the Italian Peninsula are considered to belong to ssp. *genava* (Fruhstorfer, 1908), to which Leraut (1990) and Jutzeler & Volpe (2005) grant species status.

From 2005 to 2008 the reproductive behaviour of the sibling species *Hipparchia fagi* and *H. hermione* in sympatry was studied in order to assess the actual species-specific cues and stimuli which are involved in courtship. The comparison revealed similar general patterns of sexual behaviour in the two species and only quantitative differences at one step of the courtship (Pinzari, 2009a).

839. **Hipparchia statilinus** (Hufnagel, 1766)

Over two consecutive years population studies were done on this species in the site of Le Pacinette, and rate of dispersion measured between eight areas. It turned out as a protandrous species undergoing remarkable demographic fluctuations and shifts in sex ratio from year to year. Mobility by the individuals revealed to be low at large scale and high at local one. The former is seemingly related to the ability of some individuals to go across long distances and thus contribute to gene flow, while the latter reflects the particular foraging and reproductive behaviours by the adults, which in turn show differences in habitat use between sexes during the flight season (Pinzari, 2004; Pinzari et al., 2010). Behavioural studies were also performed to test the existence in this species, and in *B. circe* and *C. briseis*, of courtship behaviours similar to that assessed by Tinbergen (1941, 1972) in *H. semele* (Linnaeus, 1758). All species studied revealed complex courtship sequences with relevant ethograms showing both similar and different paths across taxa, the latter either involving the qualitative features of the behaviour or its duration (Pinzari, 2004; Pinzari, 2009b; Pinzari et al., 2010).

840. **Brintesia circe** (Fabricius, 1775)

See note above under preceding species.

841. **Chazara briseis** (Linnaeus, 1764)

See note above under *Hipparchia statilinus*.

847. **Polyploca ridens** (Fabricius, 1787)

Specimens from the study area already appear to be transitional in structural features between northern and southern Italian ones, these often regarded to represent a distinct species (*P. neoridens* Parenzan, 1976) (Laszló et al., 2007).

The morphocline shown by this species in the Italian Peninsula is currently under review by T. Russo, M. Di Rao and A. Zilli.

850. *Cilix glaucata* (Scopoli, 1763)

Despite the co-occurrence of *C. glaucata* and *C. hispanica* Pérez De-Gregorio, Jeremías, Requena, Rondós & Vallhonrat, 2002 in several similar areas of Central Italy, in the study area only the former could be detected so far.

861. *Isturgia arenacearia* (Denis & Schiffermüller, 1775)

That from Colle Petruccio probably represents the highest record in altitude of this thermophilous species in whole Italy.

927. *Pseudoterpna coronillaria* (Hübner, 1817)

As usual, the local populations fully conform in structural characters of the genitalia to ssp. *flamignii* Hausmann, 1997, occurring over the Italian Peninsula.

936. *Hemistola chrysoprasaria* (Esper, 1795)

Hemistola chrysoprasaria is recorded in Italy from the Alps to Tuscany, and Sardinia, while its sister species *H. siciliana* L.B. Prout, 1935 from the Central Apennines to Sicily (Hausmann, 2001). Nevertheless, as already stressed by Zilli et al. (2001), who recorded specimens with the habitus of *H. siciliana* and features of the genitalia of *H. chrysoprasaria* from the coast of Latium, populations from Central Italy are probably transitional between the two. Specimens from the study area fully conform in structural features to *H. chrysoprasaria*, in habitus mostly so, with crosslines possibly just slightly more jagged than in Central European specimens.

961. *Idaea spissilimbaria* (Mabille, 1888)

New to Italy. According to Hausmann (2004) it is an exceedingly rare species of which only nine specimens are known. The presence of this species has so far been assessed for Corsica, Hautes Alpes (France), Romania and Bulgaria. The type locality is from Algeria, but apparently there are uncertainties on the actual place of origin of the holotype (cf. Hausmann, 2004).

987. *Xanthoroe vidanoi* Parenzan & Hausmann, 1994

We tentatively ascribe specimens recorded from the study area to this

Xanthoroe originally described from the Southern Apennines as distinct from its sister northern relative *X. spadicearia* (Denis & Schiffermüller, 1775) (Parenzan & Hausmann, 1994). Nevertheless, despite the presence of a number of “southern” features in both the male and female genitalia of our specimens, we noticed that these appear to be transitional towards the configurations typical for *X. spadicearia*. Therefore, we strongly suspect that also in this case the Southern Italian entity represents nothing but an extreme of a morphocline.

1025. **Triphosa dubitata** (Linnaeus, 1758)

In the Central Apennines two close congeners were found to occur, namely *T. dubitata* and *T. tauteli* Leraut, 2008 (Mosconi, 2008, as *dyriata* Powell, 1941), but only the first was found in the study area so far.

1028. **Euphyia biangulata** (Haworth, 1809)

One of the few records from Central Italy of this species more widespread in Italy along the alpine arch (Sciarretta & Zahm, 2002).

1052. **Eupithecia actaeata** Walderdorff, 1869

The present one is the second known record of this species from the Italian Peninsula, in addition to that of Mironov (2003) from the Abruzzi.

1061. **Eupithecia spadiceata** Zerny, 1933

Those from the study area are the only new records of this SE European-E Mediterranean species from Italy since those for the Abruzzi by Mironov (2003).

1086. **Celonoptera mirificaria** Lederer, 1862

Long considered as markedly scarce in the Italian Peninsula, during the last 20 years there have been mounting observations of *C. mirificaria* in the Central Apennines, particularly in the beechwood belt, where the moths may be freely on the wing also during daytime.

1111. **Acronicta psi** (Linnaeus, 1758)

No specimens of the close ally *Acronicta tridens* (Denis & Schiffermüller, 1775) were found so far.

1120. **Bryophila felina** (Eversmann, 1852)

The old concept of *B. raptricula* (Denis & Schiffermüller, 1775) has re-

cently been split into two, namely *B. felina* and *B. raptricula*. The former was so far known from Sardinia and to the east of mainland Italy (Fibiger et al., 2010) but it can also be confirmed for this area, as dissections of samples from the study area clearly revealed the presence of both species. *B. felina* can easily be distinguished from its close congener by the shorter cucullus in comparison to the saccular process, the broader, more extensively scobinated vesica with smaller cornutus, the longer ductus bursae and the more prominent cervix bursae; a tendentially smaller size, narrower forewing and darker smoky hindwing of *B. felina* may also be noted, but these features are not always reliable.

1121. **Bryophila amoenissima** Turati, 1909

Following the revision of the *Bryophila petricolor* group (Fibiger et al., 2009) it became evident that taxon *amoenissima* represents a valid species endemic to Central Italy.

1133. **Catocala optata** (Godart, 1824)

The finding of this species in Central Italy is of particular biogeographic interest, it being a typically Western Mediterranean element occurring in Italy only in its westernmost districts (Piedmont, Liguria, Western Emilia and Sardinia) (Bertaccini et al., 2008).

1140. **Catocala diversa** (Geyer, 1828)

This is a generally rare species in Italy which is however present albeit scarce in the study area.

1161. **Parascotia fuliginaria** (Linnaeus, 1761)

A generally rare species in Central Italy, the larvae of which develop on fungi of mesophytic closed woods; its presence in the study area is quite regular.

1172. **Autographa bractea** (Denis & Schiffermüller, 1775)

A markedly scarce temperate montane species in the Central Apennines.

1174. **Ctenoplusia accentifera** (Lefèbvre, 1827)

The record from Colle Petruccio of this species as rule linked to the mediterranean vegetation demonstrates the ingression of mediterranean elements at the lower altitudinal limit of the study area.

1191. **Cucullia formosa** Rogenhofer, 1860

A generally rare species in Italy, which has not been observed anymore in the study area since 15 years.

1193. **Cucullia santolinae** Rambur, 1834

A species which has been probably overlooked in Italy to its superficial resemblance with *C. chamomillae* (Denis & Schiffermüller, 1775).

1195. **Cucullia santonici** (Hübner, 1813)

Very few records of this species are known from Central Italy, all from xeromontane habitats.

1196. **Cucullia blattariae** (Esper, 1790)

The issue of the systematic delegation of the Italian populations of the twin species *Shargacucullia caninae* (Rambur, 1833) - *S. blattariae* pair has been partly addressed by Morandini & Zilli (2007). It is well known that a satisfactory identification can be achieved solely through examination of the larval patterns, which in the area fully correspond with that of *S. blattariae*.

1201. **Cucullia prenanthis** (Boisduval, 1840)

A markedly scarce species in the Italian Peninsula essentially occurring in humid meadows and clearings inside temperate forests.

1206. **Omphalophana anatolica** (Lederer, 1857)

Interestingly, that from Colle Marcone represents one of the few records of this species from inside the main bulk of the Central Apennines. In fact, *O. anatolica* is more xerothermophilous of the congener *O. antirrhinii* (Hübner, 1803) and is mostly settled in the lowlands and coastal areas of the western part of Central Italy.

1208. **Teinoptera olivina** (Herrich-Schäffer, 1852)

Another typical inhabitant of xeric grassland in montane areas which in the suitable biotopes may often turn out as fairly abundant.

1209. **Omia cymbalariae** (Hübner, 1809)

Examination of the main diagnostic feature between *Omia cymbalariae*

and “*O. banghaasi* Stauder, 1930”, namely the absence or presence of tiny lateral serration of the male antennae, allowed to assess that the latter is much more widespread in the Italian region from the SW Alps to Calabria, and that both species often coexist in the Apennines (Fibiger et al., 2010; Bertaccini, pers. comm.). The only male so far recorded from the study area could thus be identified as *O. cymbalariae*. Unfortunately, no unequivocal character for separating females of the two species has been identified so far, and the circumstance that the holotype of *O. banghaasi* (in Museum für Naturkunde, Berlin) is a female (furthermore, with the abdomen partly eaten by a museum pest), leaves some doubts about the true identity of the taxon described by Stauder.

1213. **Asteroscopus sphinx** (Hufnagel, 1766)

As with *Poecilocampa alpina canensis*, this is another species occurring in Central Italy in two main forms which show a clear link with definite altitudinal belts. As a matter of fact, in mesophylic woods from the western coast and lowlands a large-sized, late flying (December) clay-coloured form occurs, whereas a smaller-sized, grey-coloured form which is earlier on the wing (October-early November) is present in inner mountain areas. Specimens from the study area fully agree with the latter.

1224. **Haemerosia renalis** (Hübner, 1813)

This is a generally rare species in Central-Southern Italy which turned out unusually common in the study area, where it flies in sites with open xeric vegetation.

1225. **Stilbia faillae** Püngeler, 1918

As for the preceding species, this is also a fairly scarce species associated with open xeric grassland.

1229. **Caradrina suscianja** Mentzer, 1981

The occurrence of this species in Italy, long overlooked with *P. selini* (Boisduval, 1840), was first shown by Beshkov et al. (2004) and Hacker (2004).

1238. **Charanyca apfelbecki** (Rebel, 1901)

A typically amphiadriatic species which has in Central Apennines the northern limit of its distribution in the Italian Peninsula.

1245. **Olivenebula xanthochloris** Boisduval, 1840

The population of Colle Marcone is currently the northernmost so far assessed of this species in Italy.

1286. **Ulochlaena hirta** (Hübner, 1813)

A typically montane mediterranean-asiatic element living in open xeric grassland.

1294. **Xylocampa mustapha** (Oberthür, 1920)

As with *Polyploca ridens* and many other cases, there is evidence that the two “species” *X. mustapha* and *X. areola* (Esper, 1789) intergrade each other, thus making a transition belt in Central Italy. The singleton so far recorded in the study area is still well characteristic of the southern “taxon” in its genitalia features.

Interestingly, species of *Xylocampa* Guenée, 1837 are in Italy lowland, coastal ones characteristic of the mediterranean vegetation belt, where their hostplants occur (above all *Lonicera implexa* Aiton), so the singleton collected at 1000 m in the study area further confirms the ingression of mediterranean elements in the site of Colle Petruccio.

1331. **Mesapamea secalis** (Linnaeus, 1758)

No specimens of the close, often sympatric, ally *M. secalella* Remm, 1983 could be found.

1361. **Hadena luteocincta** (Rambur, 1834)

Hacker (1996) showed that more species are actually intermingled under the same concept of “*H. luteocincta*”. The situation in Italy is currently under review by E. Bertaccini and A. Zilli.

1374. **Mythimna languida** (Walker, 1858)

The singleton recorded in 2002 in the site of Colle Marcone represents a stray of particular ecological interest as it shows the spreading potential after the climatic changes of this thermophilous species of tropical-subtropical origin. As a matter of fact, *M. languida* underwent a remarkable spreading in Italy during the last fifteen years, but apart from strays it could successfully settle only in coastal warm humid areas, where it is nowadays regularly present such as in the surroundings of Rome. Diffusion by the species reached its maximum

in the unusually warm biennium 2002-2003, when in addition to dispersal to higher latitudes, it could also spread inland and thus overpass 1,000 m in altitude in Central Italy, as shown by the specimen found in Colle Marcone. Since then, no other specimens were recorded in the study area.

1396. Ochroleura leucogaster (Freyer, 1831)

With respect to its congener *O. plecta* (Linnaeus, 1761), this species is similarly hygrophylous but more thermophilous, and in Central Italy it better performs in the lowland humid plains close to coasts; nevertheless, it also shows migratory behaviour which accounts for its presence also in montane xeric areas.

1425. Cerastis faceta (Treitschke, 1835)

This is a thermophilous species the larvae of which show a marked feeding preference for the Holm Oak (*Quercus ilex* L.), which thus accounts for its generally strict association with the mediterranean vegetation belt. Nevertheless, a number of records around 1,000-1,100 m in the Central Apennines originated from areas where the Holm Oak is seemingly absent, and are largely dominated by the Turkey Oak (*Quercus cerris* L.), which is also the main oak species occurring in the study area. However, a few sparse bushes of *Q. ilex* are not far from the limits of the study area, precisely at 1,000 m on a warm rocky slope on the opposite site of the river Velino gorges, above the village of Sigillo, so that they could still account for the presence of *C. faceta* in the study area.

1430. Euxoa hastifera (Donzel, 1847)

This is a generally localised species in the Central Apennines occurring at middle elevation in xeric prairies and open, grass-dominated shrubland. It appears to be favoured by continental climate, which would thence explain the features of its general, substantially continental geographic distribution. As a matter of fact, traditionally considered to be a great rarity in the Italian Peninsula, a neat increase of the sightings of this species occurred all over the Central Apennines between the end of the 1980s and early 1990s, when very hot summers alternated to quite rigid winters favoured by a shortage of the snowfall. Broadly speaking, since then the climate turned to a more general warming all the year through and a drop of records of *E. hastifera* all over Central Italy was noted. The time series of records at Colle Marcone fairly well reflects this general trend and suggests that demographic fluctuations associated with climatic shifts may account for different degrees of rarity shown by this species over the years.

1452. **Orgyia corsica** (Boisduval, 1834)

A greatly localised species in the Central Apennines (Bertaccini et al., 1997), of which we unfortunately noted a decrease of observations in the study area during the last years.

1473. **Eilema pseudocomplana** (Daniel, 1939)

Grassi & Zilli (2005) showed this species to be fairly commoner than suspected in Central Italy and possibly confused also with *E. palliatella* (Scopoli, 1763), not just *E. complana* (Linnaeus, 1758).

1477. **Eilema lutarella** (Linnaeus, 1758)

Despite the intensive surveys in the study area, only a single record of this species, always very localised and scarce in the Central Apennines, could be done.

1480. **Setina roscida** (Denis & Schiffermüller, 1775)

Due to its great scarcity in Central Italy (Bertaccini et al., 1994; Parenzan & Scalercio, 2001), worthy of note is the discovery of flourishing populations of this species at the outskirts of Mt Giano.

CONCLUDING REMARKS

Intensive exploration of the study area led to assess the presence of 1504 species of Lepidoptera (Tab. 1), to which some 50 more still deserving ultimate identification may be added. Over 100 species have turned as new to a major geographic district of Italy, a figure which may be increased by several Tortricidae which had already been quoted in a previous paper (Pinzari et al., 2006). Thirteen out of the whole species were firstly recorded from Italy, namely *Stephensia abbreviatella*, *Haplochrois albanica*, *Scrobipalpa amseli*, *Caryocolum tricolorella*, *C. kroesmanniella*, *Eucosma cumulana*, *Pammene herrichiana*, *Sciota imperialella*, *Seeboldia korgosella*, *Scoparia ganevi*, *Asartodes zapateri*, *Evergestis infirmalis* and *Idaea spissilimbaria*, with conclusive confirmation for *Evergestis umbrosalis*, that had been dubiously recorded from Sardinia.

Taking as an approximate reference to the richness of the Italian lepidoptera fauna the figures given in Minelli et al. (1995), approximately 30% of such fauna is represented in the roughly 1,800 hectares (projection onto the plane) of the study area. Rich in species groups which have been surveyed

Tab. 1 – Summary of recorded species for each superfamily.

| Superfamily | Recorded species |
|--------------------|-------------------------|
| Alucitoidea | 4 |
| Bombycoidea | 20 |
| Choreutoidea | 3 |
| Cossoidea | 3 |
| Drepanoidea | 9 |
| Epermenioidea | 2 |
| Gelechioidea | 207 |
| Geometroidea | 236 |
| Hepialoidea | 3 |
| Hesperioidea | 19 |
| Incurvarioidea | 11 |
| Lasiocampoidea | 15 |
| Micropterigoidea | 2 |
| Nepticuloidea | 1 |
| Noctuoidea | 418 |
| Papilionoidea | 107 |
| Pterophoroidea | 14 |
| Pyraloidea | 149 |
| Thyridoidea | 1 |
| Tineoidea | 40 |
| Tischerioidea | 2 |
| Tortricoidea | 169 |
| Yponomeutoidea | 27 |
| Zygaenoidea | 42 |
| Total | 1504 |

with most accuracy such as the Papilionoidea and Noctuoidea range between 43-45% of the Italian fauna. To these values, which may be assumed as a good estimate of the richness of the area, those of other speciose groups such as the Gelechioidea, Tortricoidea, Pyraloidea and Geometroidea can be compared, attaining after the same order 20%, 28%, 29% and 38% of the known species for Italy. These thus still appear as partly undersampled, despite the good sampling effort dedicated to them which turned out in several new records, particularly for the Gelechioidea, Tortricoidea and Pyraloidea. Smaller superfamilies such as the Hesperioidea and Lasiocampoidea may attain up to 55% and 65% of the whole groups, respectively. Conversely, the lowest figures are those of

groups poorly investigated by us (e.g. Nepticuloidea), mostly of leaf-miners or in which we did not reach sufficient taxonomic expertise for proper identifications. In any case, assuming as a prudent estimate of the richness of the area the value of 44% based on the Papilionoidea-Noctuoidea, the presence of still some 750 species of Lepidoptera is to be expected in the study area.

Reasons for these markedly high figures are evidently to be found in the prolonged sampling effort, embracing over 40 years (the first records date back to summer 1967), and intermediate position of the study area with respect to several geographical variables, which thus reflects in both ecological and biogeographical heterogeneity. In fact, the area is roughly in the middle of the Italian Peninsula both after latitudinal and longitudinal perspectives of the land mass, and the altitudes of the collecting sites are as a whole intermediate between lowlands and the highest peaks of the Central Apennines, as exemplified by Corno Grande in the nearby massif of Gran Sasso d'Italia (2,912 m). Accordingly, the area corresponds with the southern limit of the distribution in Italy of some northern taxa (e.g. *Eupithecia actaeata*, *Hyles vespertilio*, *Lygephila pastinum*), with the northern limit of southern ones (e.g. *Olivenebula xanthochloris*), it may host Western Mediterranean elements (e.g. *Catocala optata*), and Eastern Mediterranean ones (e.g. *Sciota imperialella*, *Charanyca apfelbeckii*, *Hadena gueneei*). To these components also a set of endemics further adds, either restricted to Central Italy (e.g. *Bryophila amoenissima*, *Euchalcia italica*) or more widespread in the Italian Peninsula (e.g. *Pharmacis aemilianus*, *Zygaena rubicundus*, *Megalycinia serraria*) or in the Italian region as a whole (e.g. *Lycia florentina*, *Zygaena oxytropis*).

Regarding the altitudinal distribution, we find taxa at their upper limit in Central Italy (e.g. *Isturgia arenacearia*, *Marumba quercus*, *Ctenoplusia accentifera*, *Xylocampa mustapha*) which occur together or in close proximity with purely montane species such as *Metaxmeste phrygialis*, *Conistra torrida* and *Xestia ashworthii*. The mixing of lowland and highland elements is also shown by the coexistence and often similar abundance of pairs of closely allied species which usually substitute altitudinally each other, as with *Operophtera brumata* and *O. fagata*, *Cymbalophora pudica* and *C. rivularis*, and *Noctua tirrenica* and *N. fimbriata*.

In other cases, only the more mesophylous or montane element occurs, so for *Cydia amplana* but not *C. molybdana*, *Watsonalla binaria* but not *W. uncinula*, but we did not record any reverse example. This fact, coupled with the usually low abundance of mediterranean elements (in demographic and ecological sense, respectively), indicates that the fauna is overall of a low montane type, with the ingression of some mediterranean component. This is further corroborated by the presence of only a subset of the high montane species (e.g. *Apamea furva*, *Chersotis oreina*), whereas many taxa occurring in the highest peaks of the surrounding massifs (e.g. Mt Terminillo, Laga Mts,

Gran Sasso) such as *Standfussiana lucernea* (Linnaeus, 1758), *Agrotis simplo-*
nia (Geyer, 1832), *A. proverai* Zilli, Fibiger, Ronkay & Yela, 2010, *Epipsilia*
grisescens (Fabricius, 1794), *Erebia gorge* (Hübner, 1804), *E. pandrose*
(Borkhausen, 1788) or *Zygaena exulans* (Hohenwarth, 1792), were not ob-
served so far. It is worthy of note, however, that for practical reasons no night
collectings could be done in the highest site of the study area, namely the top
of Mt Giano, which may well host more species strictly characteristic of high
altitudes.

A great deal of records of species new to a major geographic district of
Italy, either Central Italy or the whole peninsula, is clearly ascribable to the
intensive sampling of groups which had been little investigated in the past.
Nevertheless, in the case of striking appearance of some species (e.g. *Harpella*
forficella, *Evergestis umbrosalis*, *Catocala optata*) this somewhat indicates
a real rarity by relevant populations, which evidently meet in the study area
all ecological requirements for their sustainance. As a matter of fact, also a
number of reputedly rare species in Central Italy have flourishing populations
in the zone, among the others *Pempelia alpigenella*, *Malacosoma franconica*,
Endromis versicolora, *Haemosia renalis*, *Arctia festiva* and *Setina roscida*, a
circumstance which we deem ascribable to the quality of relevant habitats and
the area as a whole.

The new records obviously enlarge the known range of distribution of rel-
evant species; within these, of particular interest are those which were solely
known from countries to the west and to the east of the Italian peninsula and
were thus showing a major, not real gap in distribution, *Seeboldia korgosella*,
Evergestis umbrosalis and *Idaea spissilimbaria* above all.

Species richness is obviously promoted also by the local set of interlocking
environmental patches making a fairly complex ecological mosaic in the area.
There are species characteristic of different facets of forestal habitats: gener-
ally warm ones (*Sphinx ligustri*, *Marumba quercus*, *Catocala coniuncta*), or
usually more typical of sclerophyll forests (*Campaea honoraria*, *Cerastis face-*
ta), hygrophilic (*Smerinthus ocellatus*, *Ipimorpha retusa*), mixed deciduous
cold temperate ones (*Endromis versicolora*, *Orthosia populeti*, *Catocala lupi-*
na), beechwood (*Operophtera fagata*) and even coniferous forests (*Dioryctria*
abietella, *Corticivora piniana*), likely associated with reafforested pine stands,
though a few indigenous European silver firs (*Abies alba*) are present in the ar-
ea. Well represented are the faunal components associated with shrubland (e.g.
Trichiura crataegi, *Eriogaster* spp.), ruderal habitats (e.g. *Schinia cardui*, *He-*
catera dysodea), rich humid or subhumid meadows (*Melitaea diamina*, *Lemo-*
nia taraxaci, *Lycia florentina*, *Apamea epomidion*), more markedly montane
ones (*Athetis pallustris*, *Cucullia prenanthis*, *Xylena vetusta*, *Leucania com-*
ma), *Artemisia*-steppes (*Cucullia formosa*, *C. santonici*), lichenivorous species
(*Eilema* spp., *Bryophila* spp.), mycetophagous ones (*Parascotia fuliginaria*),

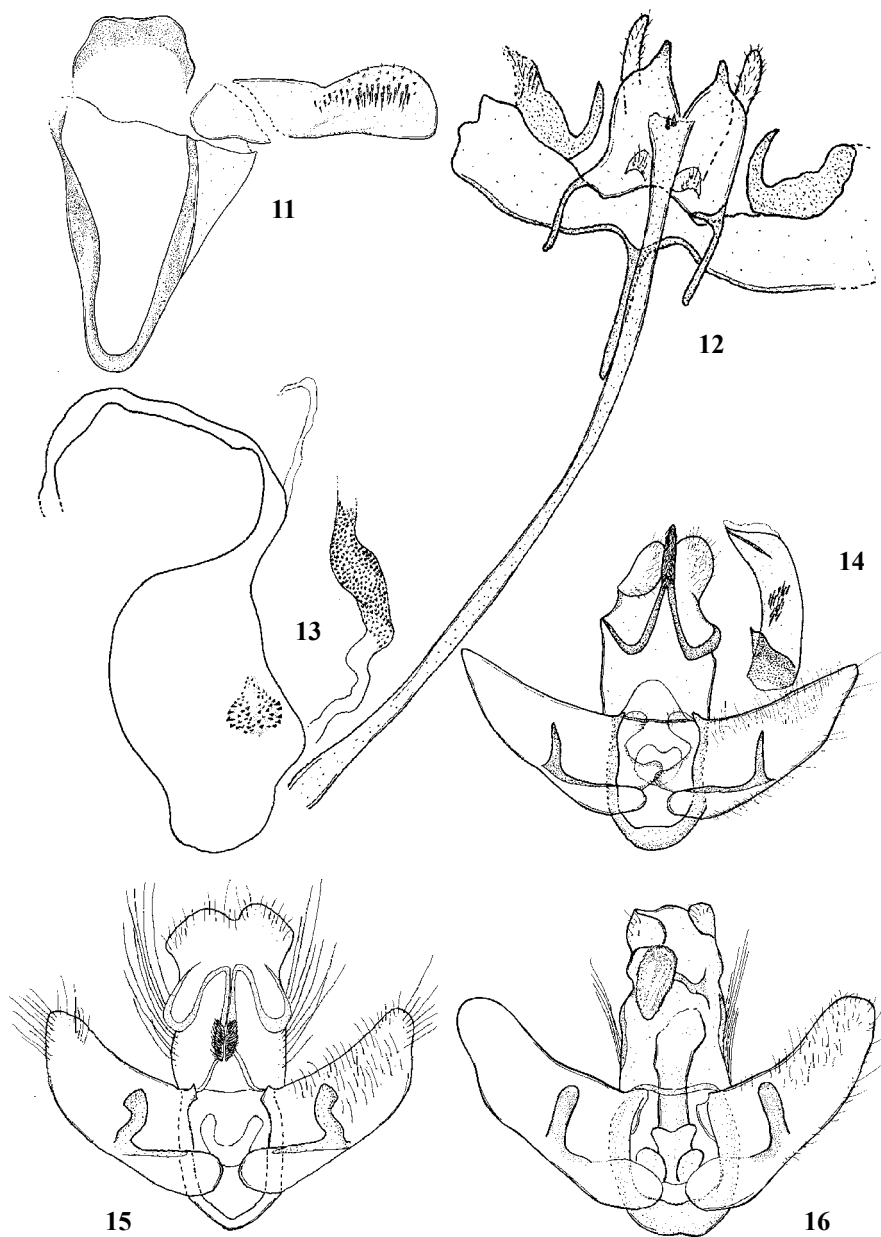

groups with endophytic larvae (Sesiidae, *Amphipoea oculea*), with also a small fraction of marsh elements (*Nonagria typhae*). Far rich is the set of species characteristic of xeric grassland, such as *Dichagyris forcipula*, *Haemerosia renalis*, *Omphalophana antirrhinii*, ranging from those more typical of lowlands (*Cymbalophora pudica*) across middle altitude (*Amata kruegeri*) to montane ones (*Ulochlaena hirta*), and of rocky (*Satyrus ferula*, *Hyponophele* spp., *Hadena luteocincta*) or purely alpine habitats (*Euchalcia italica*, *Euxoa decorata*, *Anarta odontites*). Needless to recall, a number of species are ecologically nearly ubiquitous elements, often migrant such as *Nomophila noctuella*, *Autographa gamma* or *Agrotis ipsilon*. Interestingly, the exposure of the study area to migrations can be seen by vagile species which are usually more typical of lowland, if not coastal habitats such as *Hydriris ornatalis*, *Dolicharthria punctalis*, *Antigastra catalaunalis* and *Ochropleura leucogaster*.

Sometimes, trends in abundance could clearly be seen, including curves of fluctuation possibly associated with climatic cycles as in the case of *Euxoa hastifera* or new arrivals (*Mythimna languida*), decrease in sightings (*Cucullia formosa*, *Coenonympha dorus*, *Orgyia corsica*) or increases (*Celonoptera mirificaria*). The importance of intensive and regular samplings over the years in order to achieve detailed knowledge on the Lepidoptera faunal composition of any area and its ecological dynamics cannot thus be underestimated when undertaking studies on this group of insects.

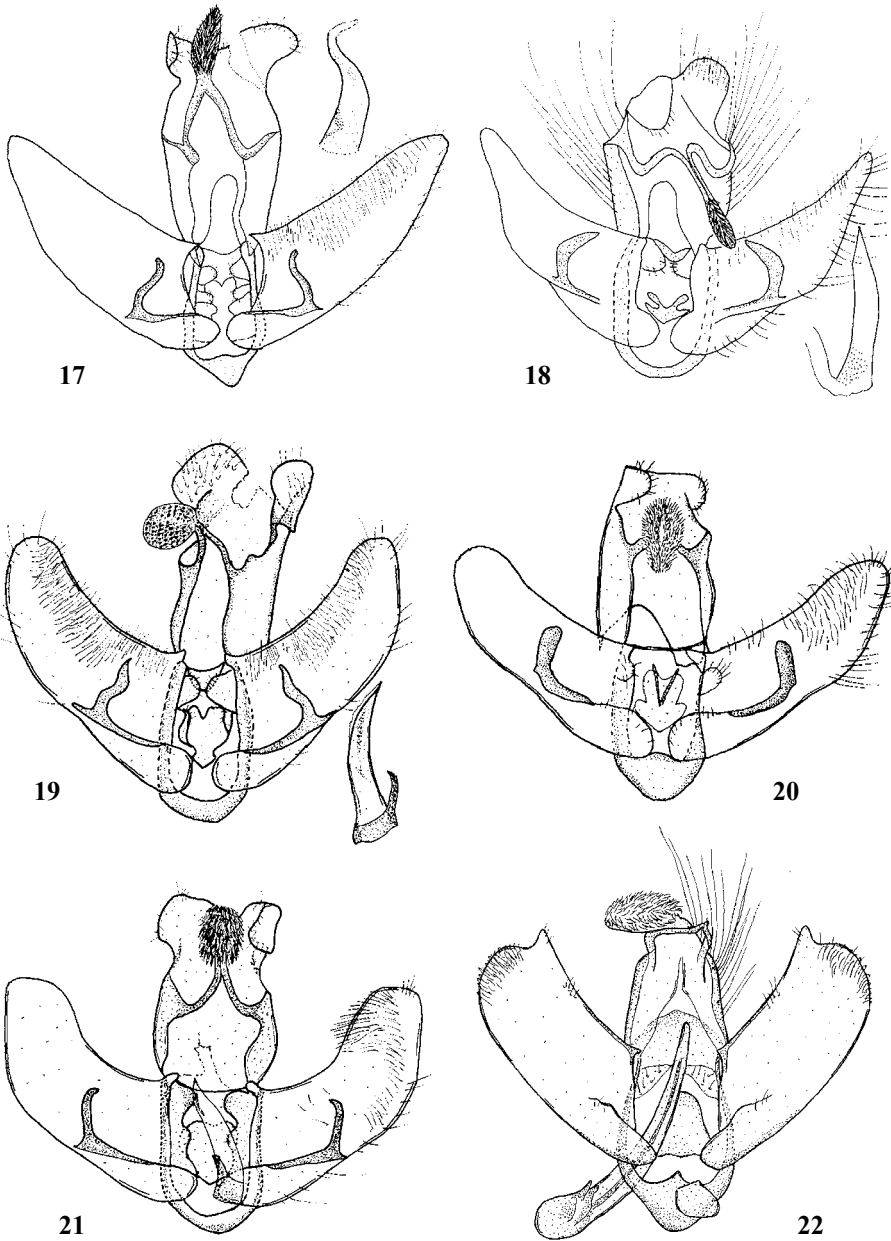

ACKNOWLEDGMENTS. Realisation of this work would not have been possible without the collaboration of our families, to which our deepest gratitude goes, and help by several colleagues, G. Baldizzone, E. Bertaccini, L. Dapporto, M. Di Rao, G. Farina, M. Lucarelli, G. Pinzari, C. Prola (†), P. Provera, T. Racheli, V. Sbordoni, W. Speidel and A. Vigna Taglianti above all.

SUMMARY

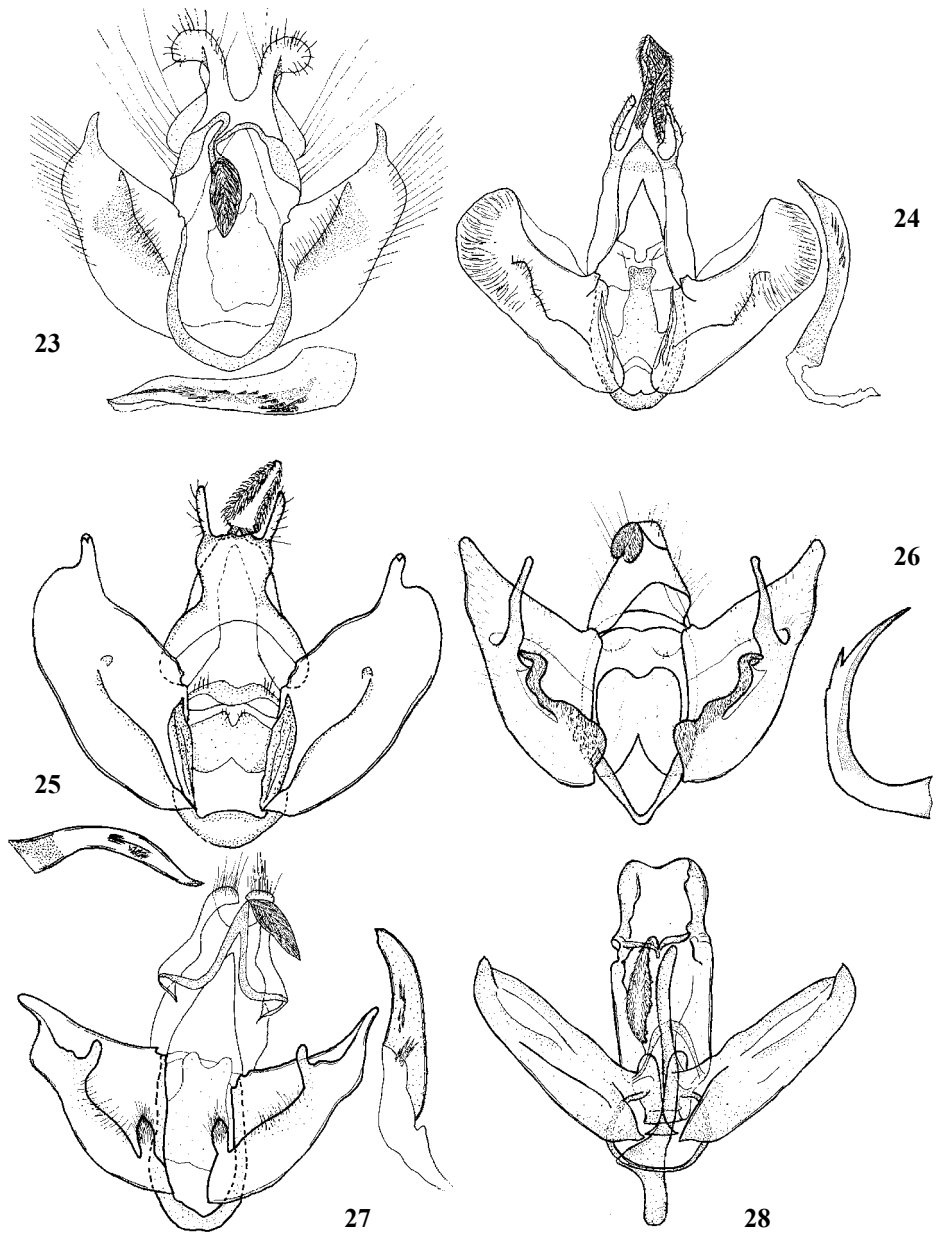

The work deals with the results of over 40 years of lepidopterological survey in a restricted area of the Central Apennines (Italy), namely the surroundings of the Site of Community Importance "Monte Cagno e Colle Pratoguerra" (SIC IT6020028), in Latium (Province of Rieti). 1504 Lepidoptera species were recorded as a whole, well over 100 of which new to Central or Peninsular Italy, and 13 new to Italy as a whole, namely: *Stephensia abbreviatella* (Stainton, 1851), *Haplochrois albanica* (Rebel & Zerny, 1832), *Scrobipalpa amseli* Povolny, 1966, *Caryocolum tricolorella* (Haworth, 1812), *C. kroesmanniella* (Herrich-Schäffer, 1854), *Eucosma cumulana* (Guenée, 1845), *Pammene herrichiana* (Heinemann, 1854), *Sciota imperialella* (Ragonot, 1887) *Seeboldia korgosella* Ragonot, 1887, *Scoparia ganevi* Leraut, 1985, *Asartodes zapateri* (Ragonot, 1882), *Evergestis infirmalis* (Staudinger, 1871) and *Idaea spissilimbaria*, (Mabille, 1888).

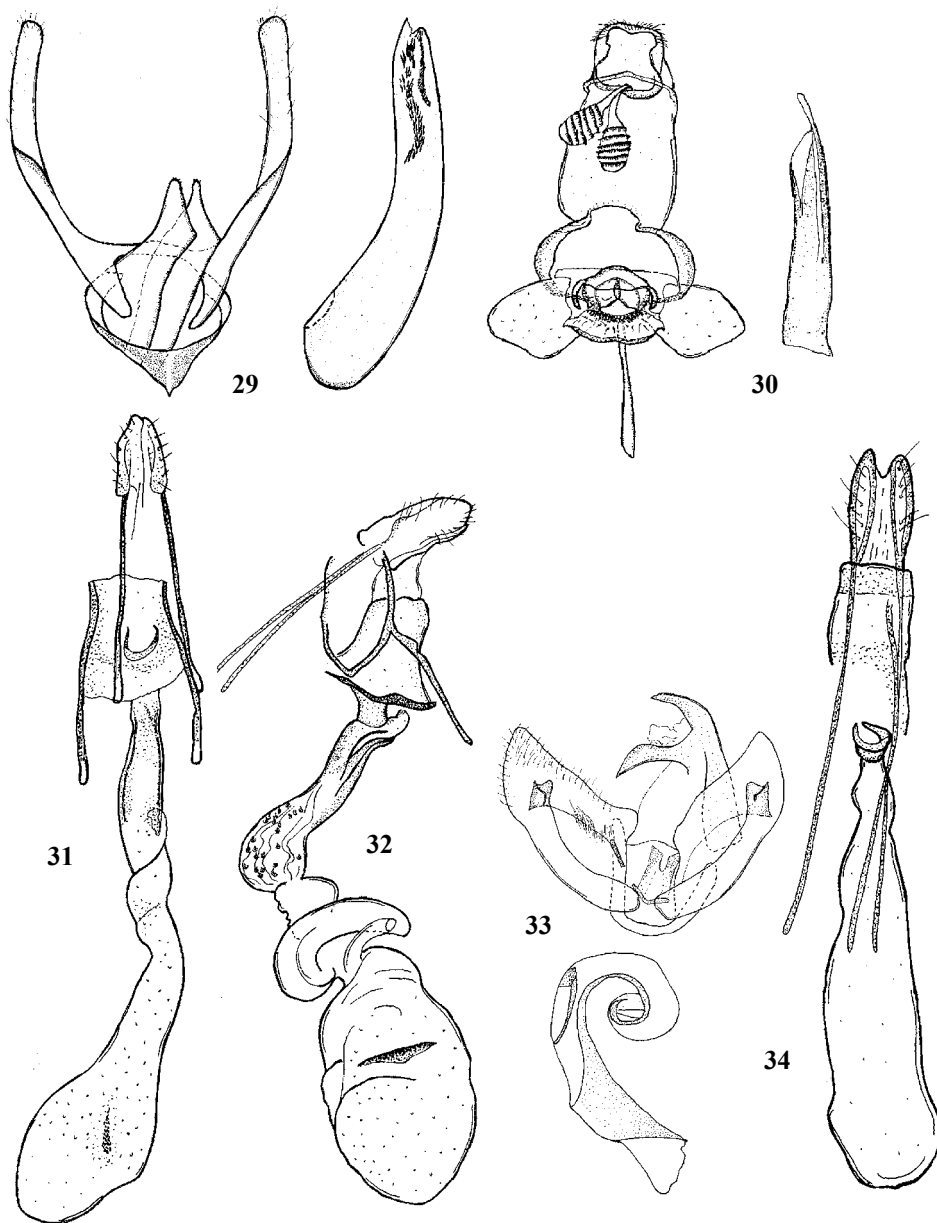

Figs 11-16 – Genitalia of lepidoptera species - *Incurvaria koernerella* (Zeller, 1839), ♂ (gen. praep. INCU 4, M. Pinzari) (11); *Nemapogon picarella* (Clerck, 1759), ♂ (gen. praep. TINEI 10, M. Pinzari) (12); *Cedestis subfasciella* (Stephens, 1834), ♀ (gen. praep. YPO 13, M. Pinzari) (13); *Agonopterix scopariella* (Heinemann, 1870), ♂ (gen. praep. DEPRE 102, M. Pinzari) (74); *Delplanqueia dihutella* (Denis & Schiffermüller, 1775), ♂ (gen. praep. PIRA 3, M. Pinzari) (75); *Acrobasis advenella* (Zincken, 1818), ♂ (gen. praep. PIRA 111, M. Pinzari) (76).

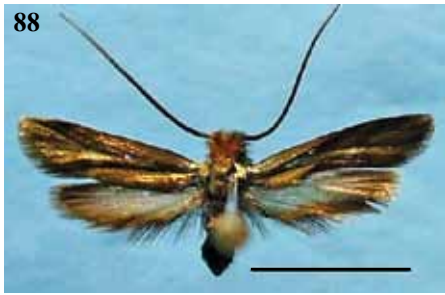

Figs 77-79 – Genitalia of lepidoptera species - *Asartodes zapateri* (Ragonot, 1882), ♀ (gen. praep. 957, A. Zilli) (77); *Scoparia basistrigalis* Knaggs, 1866, ♀ (gen. praep. PYRA 34, M. Pinzari) (78); *Evergestis infirmalis* (Staudinger, 1871), ♀ (gen. praep., A. Zilli) (79).

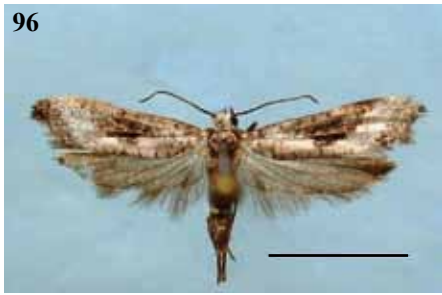

Figs 80-83 – Genitalia of lepidoptera species - *Eudonia lacustrata* (Panzer, 1804), ♂ (gen. praep. PYRA 75, M. Pinzari) (80); *Mecyna lutealis* (Duponchel, 1833), ♂ (gen. praep. PIRA 71, M. Pinzari) (81); *Metasia carnealis* (Treitschke, 1829), ♂ (gen. praep. PIRA 104, M. Pinzari) (82); *Udea nebulalis* (Hübner, 1796), ♀ (gen. praep. PYRA 62, M. Pinzari) (83).

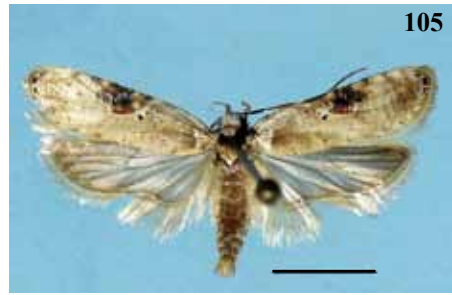

Figs 84-87 – Genitalia of lepidoptera species - *Bryophila felina* (Eversmann, 1852), ♀ (gen. praep. NOCT 50, M. Pinzari) (84); *Idaea spissilimbaria* (Mabille, 1888), ♂ (gen. praep. GEOM 126, M. Pinzari) (85); *Euphyia biangulata* (Haworth, 1809), ♂ (gen. praep. GEOM 233, M. Pinzari) (86); *Eupithecia actaeata* Walderdorff, 1869, ♂ (gen. praep. AZ 1569, A. Zilli) (87).

Figs 88-95 – Habitus of lepidoptera species - *Cauchas albi antennella* (Burmman, 1943) (88); *Incurvaria koeneriella* (Zeller, 1839) (89); *Nemapogon picarella* (Clerck, 1759) (90); *Neurothaumasia ankerella* (Mann, 1867) (91); *Tinea murariella* Staudinger, 1859 (92); *Epichnopterix plumella* (Denis & Schiffermüller, 1775) (93); *Apterona crenulella* (Bruand, 1853) (94); *Cedestis subfasciella* (Stephens, 1834) (95). Scale bar = 5 mm.

Figs 96-103 – Habitus of lepidoptera species - *Prays fraxinella* (Bjerkander, 1784) (96); *Ypsolopha lucella* (Fabricius, 1775) (97); *Ypsolopha sylvella* (Linnaeus, 1767) (98); *Ypsolopha ustella* (Clerck, 1759) (99); *Agonopterix thapsiella* (Zeller, 1847) (100); *Agonopterix scopariella* (Heinemann, 1870) (101); *Agonopterix arenella* (Denis & Schiffermüller, 1775) (102); *Agonopterix propinquella* (Treitschke, 1835) (103). Scale bar = 5 mm.

Figs 104-111 – Habitus of lepidoptera species - *Agonopteryx silerella* (Stainton, 1865) (104); *Agonopteryx alstromeriana* (Clerck, 1759) (105); *Agonopteryx conterminella* (Zeller, 1839) (106); *Agonopteryx heracliana* (Linnaeus, 1758) (107); *Agonopteryx cnicella* (Treitschke, 1832) (108); *Agonopteryx selini* (Heinemann, 1870) (109); *Agonopteryx liturosa* (Haworth, 1811) (110); *Agonopteryx doricella* (Wocke, 1849) (111). Scale bar = 5 mm.

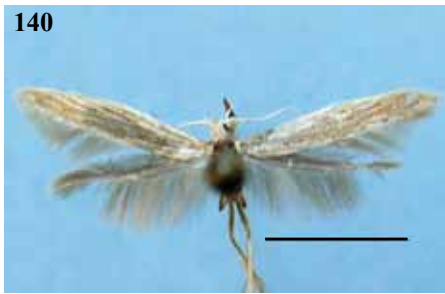

Figs 112-119 – Habitus of lepidoptera species - *Depressaria absynthiella* Herrich-Schäffer, 1865 (112); *Depressaria chaerophylli* Zeller, 1839 (113); *Depressaria libanotidella* Schläger, 1849 (114); *Depressaria zelleri* Staudinger, 1879 (115); *Depressaria albipunctella* (Denis & Schiffmüller, 1775) (116); *Depressaria ululana* Rössler, 1866 (117); *Depressaria discipunctella* Herrich-Schäffer, 1854 (118); *Stephensia abbreviatella* (Stainton, 1851) (119). Scale bar = 5 mm.

Figs 120-127 – Habitus of lepidoptera species - *Spuleria flavicaput* (Haworth, 1828) (120); *Haplochrois albanica* Rebel, 1931 (121); *Diurnea lipsiella* (Denis & Schiffermüller, 1775) (122); *Schiffermuelleria schaefferella* (Linnaeus, 1758) (123); *Kasiniana diminutella* (Rebel, 1931) (124); *Hofmannophila pseudospretella* (Stainton, 1849) (125); *Borkausenia fuscescens* (Haworth, 1828) (126); *Herrichia excelsella* Staudinger, 1871 (127). Scale bar = 5 mm.

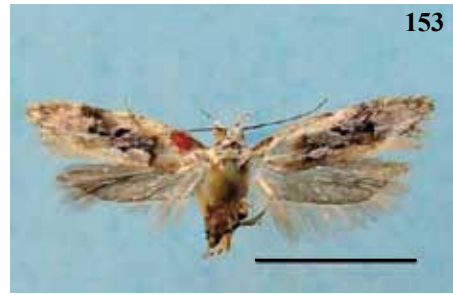

Figs 128-135 – Habitus of lepidoptera species - *Crassa tinctella* (Hübner, 1796) (128); *Crassa unitella* (Hübner, 1796) (129); *Harpella forficella* (Scopoli, 1763) (130); *Pleurota pungitella* Herrich-Schäffer, 1852 (131); *Coleophora trifariella* Zeller, 1849 (132); *Coleophora recitilineella* Fischer v. Röslerstamm, 1843 (133); *Coleophora serpylletorum* E. Hering, 1889 (134); *Coleophora dignella* Toll, 1961 (135). Scale bar = 5 mm.

Figs 136-143 – Habitus of lepidoptera species - *Coleophora bilineella* Herrich-Schäffer, 1855 (136); *Coleophora vestianella* (Linnaeus, 1758) (137); *Coleophora thymi* M. Hering, 1942 (138); *Coleophora trochilella* (Duponchel, 1843) (139); *Coleophora adpersella* Benander, 1939 (140); *Symmoca italica* Gozmány, 1962 (141); *Pseudatemelia latipennella* (Jäckh, 1959) (142); *Pseudatemelia josephinae* (Toll, 1956) (143). Scale bar = 5 mm.

Figs 144-151 – Habitus of lepidoptera species - *Eteobalea albiapicella* (Duponchel, 1843) (144); *Metzneria neuropterella* (Zeller, 1839) (145); *Metzneria artificella* (Herrich-Schäffer, 1861) (146); *Metzneria santolinella* (Amsel, 1936) (147); *Eulamprotes atrella* (Denis & Schiffermüller, 1775) (148); *Bryotropha desertella* (Douglas, 1850) (149); *Stenolechia gemmella* (Linnaeus, 1758) (150); *Teleiodes italica* Huemer, 1992 (151). Scale bar = 5 mm.

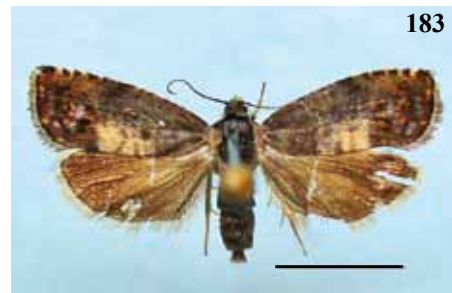

Figs 152-159 – Habitus of lepidoptera species - *Carpatolechia fugitivella* (Zeller, 1839) (152); *Altenia scriptella* (Hübner, 1796) (153); *Gelechia sestertiella* Herrich-Schäffer, 1854 (154); *Gelechia mediterranea* Huemer, 1991 (155); *Psoricoptera gibbosella* (Zeller, 1839) (156); *Mirificarma maculatella* (Hübner, 1796) (157); *Mirificarma cytisella* (Treitschke, 1833) (158); *Filatima spurcella* (Duponchel, 1843) (159). Scale bar = 5 mm.

Figs 160-167 – Habitus of lepidoptera species - *Neofriseria peliella* (Treitschke, 1835) (160); *Neofriseria singula* (Staudinger, 1876) (161); *Scrobipalpa amseli* Povolny, 1966 (162); *Klimeschiopsis kiningerella* (Duponchel, 1843) (163); *Caryocolum tischeriella* (Zeller, 1839) (164); *Caryocolum alsinella* (Zeller, 1868) (165); *Caryocolum amaurella* (M. Hering, 1924) (166); *Caryocolum cauligenella* (Schmid, 1863) (167). Scale bar = 5 mm.

Figs 168-175 – Habitus of lepidoptera species - *Caryocolum leucothoracellum* (Klimesch, 1953) (168); *Caryocolum schleichi* (Christoph, 1872) (169); *Caryocolum marmorea* (Haworth, 1828) (170); *Caryocolum kroesmanniella* (Herrich-Schaffer, 1854) (171); *Pogochaetia solitaria* Staudinger, 1879 (172); *Nothris lemniscella* (Zeller, 1839) (173); *Phtheochroa sodaliana* (Haworth, 1811) (174); *Cochylimorpha meridiana* (Staudinger, 1859) (175). Scale bar = 5 mm.

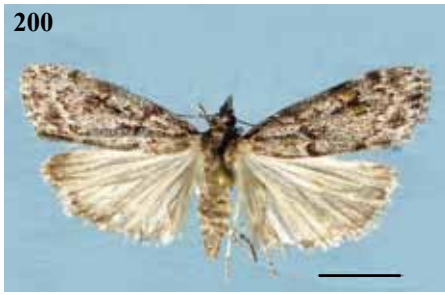

Figs 176-183 – Habitus of lepidoptera species - *Cochylimorpha perfusana* (Guenée, 1845) (176); *Gynnidomorpha luridana* (Gregson, 1870) (177); *Archicnephasia hartigi* Razowski, 1983 (178); *Eucosma cumulana* (Guenée, 1845) (179); *Eucosma albunea* (Zeller, 1847) (180); *Corticivora piniana* (Herrich-Schäffer, 1851) (181); *Cydia pyrivora* (Danilevsky, 1947) (182); *Pammene herichiana* (Heinemann, 1854) (183). Scale bar = 5 mm.

Figs 184-191 – Habitus of lepidoptera species - *Pammene regiana* (Zeller, 1849) (184); *Pammene aurita* Razowski, 1991 (185); *Trachonitis cristella* (Denis & Schiffermüller, 1775) (186); *Elegia fallax* (Staudinger, 1881) (187); *Delplanqueia dilutella* (Denis & Schiffermüller, 1775) (188); *Sciota imperialella* (Ragonot, 1887) (189); *Selagia spadicella* (Hübner, 1796) (190); *Acrobasis repandana* (Fabricius, 1798) (191). Scale bar = 5 mm.

Figs 192-199 – Habitus of lepidoptera species - *Acrobasis advenella* (Zincken, 1818) (192); *Acrobasis legatea* (Haworth, 1811) (193); *Acrobasis obtusella* (Hübner, 1796) (194); *Megasis rippertella* (Zeller, 1839) (195); *Seeboldia korgosella* Ragonot, 1887 (196); *Asartodes zapateri* (Ragonot, 1882) (197); *Euzopherodes charlottae* (Rebel, 1914) (198); *Homoeosoma inustella* Ragonot, 1884 (199). Scale bar = 5 mm.

Figs 200-207 – Habitus of lepidoptera species - *Scoparia basistrigalis* Knaggs, 1866 (200); *Eudonia lacustrata* (Panzer, 1804) (201); *Eudonia laetella* (Zeller, 1846) (202); *Eudonia delunella* (Stainton, 1849) (203); *Scoparia ganevi* Leraut, 1985 (204); *Agriphila selasella* (D.&S., 1775) (205); *Catoptria permutatellus* (Herrich-Schaffer, 1848) (206); *Cynaeda dentalis* (Denis & Schiffermüller, 1775) (207). Scale bar = 5 mm.

Figs 208-215 – Habitus of lepidoptera species - *Atralata albofascialis* (Treitschke, 1829) (208); *Eurrhysis pollinalis* (Denis & Schiffermüller, 1775) (209); *Evergestis infirmalis* (Staudinger, 1871) (210); *Evergestis umbrosalis* (Fischer v. Röslerstamm, 1842) (211); *Udea fulvalis* (Hübner, 1809) (212); *Udea prunalis* (Denis & Schiffermüller, 1775) (213); *Udea nebulalis* (Hübner, 1796) (214); *Udea olivalis* (Denis & Schiffermüller, 1775) (215). Scale bar = 5 mm.

Figs 216-223 – Habitus of lepidoptera species - *Paracorsia repandalis* (Denis & Schiffermüller, 1775) (216); *Loxostege manualis* (Geyer, 1832) (217); *Ecpyrrhorrhoe rubiginalis* (Hübner, 1796) (218); *Ecpyrrhorrhoe diffusalis* (Guenée, 1854) (219); *Pyrausta castalis* Treitschke, 1829 (220); *Pyrausta ostrinalis* (Hübner, 1796) (221); *Pyrausta coracinalis* Leraut, 1982 (222); *Anania lancealis* (Denis & Schiffermüller, 1775) (223). Scale bar = 5 mm.

Figs 224-231 – Habitus of lepidoptera species - *Anania crocealis* (Hübner, 1796) (224); *Mecyna lutealis* (Duponchel, 1833) (225); *Mecyna trinalis* (Denis & Schiffermüller, 1775) (226); *Metasia carnealis* (Treitschke, 1829) (227); *Poecilocampa populi* (Linnaeus, 1758) (228); *Idaea spissilimbaria* (Mabille, 1888) (229); *Catocala optata* (Godart, 1824) (230); *Bryophila felina* (Eversmann, 1852) (231). Scale bar = 5 mm.

RIASSUNTO

I Lepidotteri del comprensorio del Monte Cagno (Lazio, Italia centrale), un'area ad elevata diversità lepidotterologica (Lepidoptera).

Nel lavoro si riportano i dati relativi ad oltre 40 anni di ricerche lepidotterologiche condotte in una ristretta area dell'Appennino Centrale, con precisione nei dintorni del Sito di Interesse Comunitario "Monte Cagno e Colle Pratoguerra" (SIC IT6020028), in provincia di Rieti. Dal 1967 al 2010 sono state registrate ed identificate 1504 specie di Lepidotteri, di cui oltre 100 inedite per l'Italia centrale o peninsulare e 13 nuove per la fauna italiana: *Stephensia abbreviatella* (Stainton, 1851), *Haplochrois albanica* (Rebel & Zerny, 1832), *Scrobipalpa amseli* Povolny, 1966, *Caryocolum tricolorella* (Haworth, 1812), *C. kroesmanniella* (Herrich-Schäffer, 1854), *Eucosma cumulana* (Guenée, 1845), *Pammene herrichiana* (Heinemann, 1854), *Sciota imperialella* (Ragonot, 1887), *Seeboldia korgosella* Ragonot, 1887, *Scoparia ganevi* Leraut, 1985, *Asartodes zapateri* (Ragonot, 1882), *Evergestis infirmalis* (Staudinger, 1871) and *Idaea spissilimbaria*, (Mabille, 1888).

APPENDIX

Index to taxa

In the following register the number indicates the position of the taxon in the systematic list provided in the work.

| | | | | | |
|-----------------------|------|-----------------------------|------|-----------------------------|------|
| <i>abbreviana</i> | 431 | <i>advenella</i> | 566 | <i>albipunctella</i> | 120 |
| <i>abbreviatella</i> | 123 | <i>Aedia</i> | 1150 | <i>albistria</i> | 74 |
| <i>abietella</i> | 559 | <i>aegeria</i> | 821 | <i>albofascialis</i> | 629 |
| <i>abrasana</i> | 383 | <i>aemilianus</i> | 5 | <i>albula</i> | 1459 |
| <i>Abraxas</i> | 851 | <i>aerifrons</i> | 332 | <i>albulata (Perizoma)</i> | 1037 |
| <i>Abrostola</i> | 1176 | <i>aeruginea</i> | 1300 | <i>albulata (Asthena)</i> | 1083 |
| <i>abruptaria</i> | 890 | <i>aescularia</i> | 923 | <i>albuneana</i> | 447 |
| <i>absinthiata</i> | 1055 | <i>Aethes</i> | 349 | <i>alceae</i> | 717 |
| <i>absynthiella</i> | 110 | <i>affinis (Bryotropha)</i> | 217 | <i>alcetas</i> | 772 |
| <i>acaciae</i> | 766 | <i>affinis (Pyropteron)</i> | 330 | <i>alchemillata</i> | 1034 |
| <i>accentifera</i> | 1174 | <i>affinis (Cosmia)</i> | 1258 | <i>alchimiella</i> | 54 |
| <i>aceraria</i> | 924 | <i>Agapeta</i> | 346 | <i>alchymista</i> | 1149 |
| <i>aceris</i> | 1112 | AGDISTINAE | 517 | <i>alciphron</i> | 758 |
| <i>acetosellae</i> | 1255 | <i>Agdistis</i> | 517 | <i>Alcis</i> | 896 |
| <i>achatana</i> | 468 | <i>agenjoi</i> | 33 | <i>alcon</i> | 777 |
| <i>Acherontia</i> | 705 | <i>agestis</i> | 780 | <i>alcyone</i> | 837 |
| <i>Achroia</i> | 535 | <i>Aglais</i> | 804 | <i>Aleimma</i> | 366 |
| <i>Acleris</i> | 367 | <i>aglaja</i> | 795 | <i>alexis</i> | 775 |
| <i>Acompsia</i> | 291 | <i>Aglossa</i> | 540 | <i>alfacariensis</i> | 752 |
| <i>Acontia</i> | 1181 | <i>agnorista</i> | 1179 | <i>algae</i> | 1117 |
| ACONTIINAE | 1180 | <i>Agonopterix</i> | 91 | <i>algira</i> | 1142 |
| <i>Acrobasis</i> | 564 | AGONOXENIDAE | 127 | <i>alliaris</i> | 1047 |
| <i>Acronicta</i> | 1111 | <i>Agriopis</i> | 884 | <i>Allophyes</i> | 1296 |
| ACRONICTINAE | 1111 | <i>Agriphila</i> | 607 | <i>alpella</i> | 78 |
| <i>actaeata</i> | 1052 | <i>Agrius</i> | 704 | <i>alpigenella</i> | 556 |
| <i>acteon</i> | 732 | <i>Agrochola</i> | 1266 | <i>alpina</i> | 682 |
| <i>Actinotia</i> | 1250 | <i>Agrotora</i> | 673 | <i>alpinana</i> | 506 |
| <i>Arctornis</i> | 1456 | <i>Agrotis</i> | 1439 | <i>alsinella</i> | 253 |
| <i>acuminatana</i> | 502 | <i>ahenella</i> | 561 | <i>Alsophila</i> | 923 |
| <i>Adactylotis</i> | 904 | <i>alacella</i> | 287 | <i>alstromeriana</i> | 98 |
| <i>adansoniella</i> | 14 | <i>alba</i> | 952 | <i>Altenia</i> | 233 |
| <i>Adela</i> | 10 | <i>albanensis</i> | 323 | <i>alternata (Macaria)</i> | 856 |
| ADELIDAE | 7 | <i>albanica</i> | 130 | <i>alternata (Epirrhoe)</i> | 994 |
| ADELINAE | 7 | <i>albella</i> | 154 | <i>alternella</i> | 377 |
| <i>adelogrammella</i> | 181 | <i>albiantennella</i> | 13 | <i>alticolana</i> | 385 |
| <i>adippe</i> | 796 | <i>albiapicella</i> | 199 | <i>Alucita</i> | 513 |
| <i>Adscita</i> | 298 | <i>albiceps</i> | 225 | ALUCITIDAE | 513 |
| <i>adspersella</i> | 185 | <i>albicomella</i> | 23 | ALUCITOIDEA | 513 |
| <i>adulatrix</i> | 1162 | <i>albimacula</i> | 1357 | <i>alveus</i> | 727 |
| <i>adusta</i> | 1314 | <i>albiocellaria</i> | 938 | <i>amandus</i> | 784 |
| <i>adustata</i> | 853 | <i>albipuncta</i> | 1372 | <i>Amata</i> | 1481 |

| | | | | | |
|-------------------------|------|-----------------------|------|----------------------|------|
| <i>amaurella</i> | 256 | <i>Aphomia</i> | 532 | <i>asclepiadis</i> | 1177 |
| <i>ambigua</i> | 1236 | <i>apiformis</i> | 52 | <i>Ascotis</i> | 900 |
| <i>Ammoconia</i> | 1307 | <i>Aplasta</i> | 926 | <i>ashworthii</i> | 1419 |
| <i>amoenissima</i> | 1121 | <i>Aplocera</i> | 1080 | <i>asperaria</i> | 862 |
| <i>Amphipoea</i> | 1337 | <i>Apocheima</i> | 878 | <i>aspersa</i> | 1227 |
| <i>Amphipyra</i> | 1210 | <i>Apoda</i> | 294 | <i>Aspilapteryx</i> | 55 |
| AMPHIPYRINAE | 1210 | <i>Apodia</i> | 208 | <i>asseclana</i> | 386 |
| AMPHISBATIDAE | 193 | <i>Apopestes</i> | 1148 | <i>Asteroscopus</i> | 1213 |
| <i>amplana</i> | 490 | <i>Aporia</i> | 744 | <i>Asthena</i> | 1083 |
| <i>amseli</i> | 248 | <i>Aporodes</i> | 626 | <i>atalanta</i> | 802 |
| <i>Anacampsis</i> | 276 | <i>Aporophyla</i> | 1288 | <i>Ateliotum</i> | 20 |
| <i>Anania</i> | 662 | <i>aprilina</i> | 1299 | <i>athalia</i> | 817 |
| <i>Anarsia</i> | 282 | <i>Aproaerema</i> | 275 | <i>Athetis</i> | 1241 |
| <i>Anarta</i> | 1342 | <i>Apterona</i> | 53 | <i>Athrips</i> | 247 |
| <i>anatolica</i> | 1206 | <i>aquilina</i> | 1429 | <i>atomaria</i> | 903 |
| <i>anceps (Peridea)</i> | 1107 | <i>arcania</i> | 824 | <i>atomella</i> | 93 |
| <i>anceps (Apamea)</i> | 1324 | <i>Archicnephasia</i> | 381 | <i>atra</i> | 128 |
| <i>ancilla</i> | 1483 | <i>Archips</i> | 399 | <i>Atralata</i> | 629 |
| <i>Ancylis</i> | 466 | <i>Arctia</i> | 1500 | <i>atrata</i> | 1082 |
| <i>Ancylolomia</i> | 624 | ARCTIIDAE | 1467 | <i>atrella</i> | 211 |
| <i>Ancylosis</i> | 583 | ARCTIINAE | 1486 | <i>atricomella</i> | 125 |
| <i>anella</i> | 534 | <i>arcuella</i> | 424 | <i>atriplicis</i> | 1247 |
| <i>Angerona</i> | 877 | <i>arenacearia</i> | 861 | <i>atropos</i> | 705 |
| <i>anglicella</i> | 56 | <i>arenaria</i> | 899 | <i>atropunctana</i> | 422 |
| <i>angularia</i> | 982 | <i>arenella</i> | 95 | <i>aurago</i> | 1263 |
| <i>Angustalius</i> | 606 | <i>argentana</i> | 378 | <i>aurantiaria</i> | 886 |
| <i>angustana</i> | 348 | <i>argentella</i> | 124 | <i>aurata</i> | 653 |
| <i>angusticolella</i> | 19 | <i>argentina</i> | 1110 | <i>aurifluella</i> | 88 |
| <i>angusticostella</i> | 22 | <i>argiolus</i> | 773 | <i>aurinia</i> | 810 |
| <i>anilis</i> | 1316 | <i>argus</i> | 778 | <i>aurita</i> | 500 |
| <i>ankerella</i> | 36 | <i>Argynnis</i> | 793 | <i>ausonia</i> | 743 |
